TOURNEISSERUS (L.) Historia sive descriptio plantarum omnium, tam domesticarum quam exoticarum: Earundem cum virtutes influentiales, elementares, & naturales, tum subtilitates, necnon icones etiam veras, ad vivum artificiose expressas proponens: atque una cum his, partium omnium corporis humani ut externarum ita internarum picturas, & instrumentorum extractioni chymicæ servientium delineationem usumque, ac methodos denique pharmaceuticas quasvis, ad curam valetudinis dextre tractandam necessarias complectens: Utilitatis vere publicæ gratiâ. fol. [*Berlin*, 1578.]

TOURNEFORT (P.) The compleat herbal: or the botanical institutions of Mr. Tournefort, chief botanist to the late French king. Carefully translated from the original Latin with large additions from Ray, Gerarde, Parkinson, and others. 2 v. 4°. *London*, 1719-30.

TOXITEN. The ancient medical herbal, containing the description, preparation, and medical use of a large number of herbs. Also, the method of distilling and preparing many medicated waters

Botany (*Medical*).

and oils; to which is prefixed a concise astrological description of the signs and planets, showing their connection with man and with medicine. From the German; first published at Strasburg, 1576. Translated, abridged, the style somewhat modernized, and republished by Dr. James A. Harbeson. v. 1. 8°. *New York*, 1849.

TURNBULL (A.) On the medical properties of the natural order ranunculaceæ; and more particularly on the uses of sabadilla seeds, delphinium staphisagria, and aconitum napellus, and their alcaloids. 8°. *Philadelph.*, 1848.

TURNER (W.) [Herbal.] fol. [*London.*]

The title-page is "A most excellent and perfecte homisch apothecarye or homely physick book wherein all the greefes and diseases of the bodye; translated out of the Almaine speche into English by Jhon Hollybush. Imprinted at Collen by Arnold Birckman, 1561." The work is known as "A new herbal, [etc.], imprimed at London by Steven Mierdman, 1551." This is probably one of the original London imprints of 1551, with a new title-page printed at Cologne. See next title.

——. The seconde parte of Guilliam Turners herball, wherein are conteyned the names of herbes in Greke, Latin, Duche, Frenche, and in the apothecaries Latin, and sontyme in Italiane, wyth the vertues of the same herbes, [etc.] Here unto is joyned also a booke of the bath of Baeth in Englande, [etc.] fol. *Collen*, 1562.
