Dear Francis,

I have recently declined to write for Britannica Yearbook on Science etc. an article on current disapproval of the Einstein's general theory of relativity, and heard in this connection that you also do not want to write on Kornberg's $\phi X 174$ homunculus. Shall we organize the Antiencyclopedia Club?

I am also enjoying ~~the~~ glancing through Jim's psychedelic story in Atlantic Monthly.... And all this in addition to Vietnam and Blackpower.... World is getting crazy!

Well, if the ship will be still sailing across Atlantic Ocean this coming summer, we will be in Cambridge (Blue Boar) beginning June 15th mostly for radioastronomicalcosmological purposes. Hope to see you during that visit.

Yours George.

P.S. Looking up your address in Who is Who, I ~~was~~ noticed that your recreation is taking to pritty women. It is good.
