Dear Dr Kornberg

It is with the greatest interest that we hear of your experiments on the syntheses of DNA. We are now finishing the details of our X-ray diffraction work on DNA & would be very interested to widen our studies somewhat. I wonder if your work has yet reached a stage where you might be able to produce sufficient material for X-ray study? (one or 2 mgms would do) ~~?~~ If you are  
In any case we would be very glad if you could send us reprints of your publications on this subject.

Yours sincerely

M H F Wilkins
