Dear Josh:

I understand from Twitty that the Growth Symp. was quite successful, wish I could have attended.

This is only a hasty note, albeit delayed more than it should have been, to ask for your suggestions, etc - on the distinct symposium in Nov. What are your thoughts on sequencing papers scheduled, and particularly on added "discussions" or "participants". What is likely to be the nature of your "summing-up"?

I'm still hoping we can get you and Esther out here for a some early next year - perhaps for spring quarter - How is the possibility shaping up?

Best to you & E.

Ed
