Dr. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
Madison, Wisconsin

Dear Dr. Lederberg:

Just a line to thank you on behalf of the Society for the excellent paper you gave at the Amherst Symposium. Every one was most enthusiastic about it, and I hope also that you enjoyed and profited from the meetings yourself. I am glad I had the opportunity of meeting you, and also of seeing your wife Esther again.

Thank you also for the reprint describing the procedure for isolating single cells in culture. I plan to try it, and feel it should lend itself to work with tissue cells.

Very best regards.

Sincerely,

  
Victor Twitty
