Prof. John A. Moore

Ross

That was neat! No I don't think I have any other record of that lab work at USNH St. Albans; and it reassures me I was not imagining the cytology of Plasmodium.

Thank you so much, for saving it, and now for sending it back to me.

But have you any recollection why I should be sending you this information? Did I send you some slides? (for teaching? research?)

Yours,

John.
