LONDON 6 15PM 8 JNE 1959

DAIRY FESTIVAL

LONDON — 8 June.

Just back from Conferences Royaumont et al., and resting here briefly before setting off again for home. 'Sir M.' in splendid form as is selection theory — now at stage "why what else could anyone ever have supposed" except for details such as the identity and number of mutable sites per cell. Sir M. showed me your letter & the discrepancy & think becomes more puzzling. Perhaps the track is prolonged, in tissue & systemic immunization? Stocker will help us make some large scale preps of flagellins. 'til August

Love & Cotton.
