ORSKOV 12-73

Ann Arbor 1973

Dear Josh and family

An unusual combined christmas, new years greeting, article request and sentimental reminiscence card. We would like very much to get a reprint of your article in Journal Research 40:315:1973. The picture is as you have already guessed from our 25th Anniversary in Hyannis in 1973. Jo and I – and hopefully Claus for a short time – expect to go to Washington DC as Fogarty scholars in late spring for 2-3 months. And we are certainly looking forward to get a good long look at US again. After "work" we hope that we shall get a chance to show Claus some of the many things which he enjoyed so much during our stay in Madison many years ago. Claus 15 was as you know the result of our more private reconstructive experiments in the cockpit, but also mid July atmosphere in Madison.

Yours Jo & Peter

Christmas 1977

Dear Jack and Family

Our minimal combined christmas, new years greeting, article request and sentimental reminder card. We would like very much to get a reprint of your article in Journal Research 40:315:1973. The picture is as you have already guessed from our 25th Anniversary in Hyannis in 1973. Jane and I - and hopefully Claus for a short time - expect to go to Washington DC as Fulbright scholars in late spring for 2-3 months. And we are certainly looking forward to get a good long look at US again. After "work" we hope that we shall get a chance to show Claus some of the many things which we enjoyed so much during our stay in Madison many years ago. Claus is now as you know the result of our more private reconstructive experiments in the cockpit, hut and thimble fully atmosphere in Madison.

Yours Jane & Dirk
