April 19, 1978

Joshua Lederberg, Ph.D.
Chairman, Department of Genetics
Stanford University School of Medicine
Palo Alto, California

Dear Dr. Lederberg:

According to the February newsletter from Rockefeller University, you have authored a series of columns aimed at lay audiences, on the social impact of scientific programs. How may I obtain copies of these writings?

At The Medical Foundation we are trying to build local awareness and understanding of the relationship of research to health and medicine. Unfortunately very few scientists have either the time or the inclination to write about these matters for audiences of non-scientists. This is why we are particularly interested in seeing what you have written.

Please advise me how we can obtain copies of these articles. If you have any available, please send them to me along with an invoice for any charges. I am enclosing our most recent annual report for your information.

Thank you.

Cordially,

Michael Valentine
