Erode. 1st June 62

Dear Ester and Josh,

Your kind letter dated 24th may. I hope you are finding the new office with Mrs Friedman quite satisfactory. I hope Hanka stays with us next year.

The samples I sent are the possible likable colours for Ester, which I thought was good 2 of them are bit rough and the other two are the best quality. They are probably not the exact stuff you wanted. But this is much better for washings and durable. If Ester has the samples please send it to me (Delhi add) If not I can remember it and get the same. I am also bringing few other things.

It will be interesting to see if there is any difference in P in phase I/II salmonella. If you need anything else, please write to me to my Delhi address, which is B-12, Library Road New Delhi 12. India. Finally I got my brief case!

Hope to see you all soon.

Yours

Gen

I shall get 10 + 10 meters of both
