Professor J. Lederberg
Department of Genetics
School of Medicine
Stanford University
Palo Alto, California

Dear Joshua:

It has been proposed by Ted Puck and Dr. Waring that I apply for a Public Health Service Senior Research Fellowship. In order to do this I must submit the names of individuals to whom the Fellowship Branch may write. I wish to submit your name as one of my references. I realize that you are quite busy, but would you be able to fill out the form the Fellowship Branch would send to you?

Everyone is quite well here and using his time productively. Margaret is enjoying summer activities and Helvise is busy making pneumococcal mutants. We hope to have a visit from Jim Crow any moment as he is teaching at Rocky Mountain Biological Laboratory in a week or two.

As ever,

M. L. Morse, Ph.D.
