

Personal memo from  
JOSHUA LEDERBERG

Ed Johnson

MAY - 4 1988

Usuy' aspects for transfer.

If the process is efficient  
(and you might enhance that  
further) you might want to  
consider applying for a patent, as  
it may have some commercial value.

I have 1 review lined up,  
not as the trail of the 2d.

Sincerely,  
Jon Lederberg

P.S. How do you relate the synergy  
with sm/dsely? Citric inhibition  
and deeper ingress of the fibers?  
(Can that be verified directly?)

J.

Pilot  
Saburo?
