November 1, 1949.

Dr. Wilton S. Stone,
Dept. of Zoology,
University of Texas,
Austin, 12, Texas.

Dear Dr. Stone

In response to your request, I have sent E. coli K-12 under separate cover.

Will nothing else do for Y-24? I have not maintained this culture at Wisconsin, because I had no special need for it and it was a nuisance adding extra cystine to stock agar slants. If you have to have it, you may be able to get it either from Bonner at Yale, or Tatum at Stanford. It was very likely lyophilized.

Yours sincerely,

Joshua Lederberg
Assistant Professor of Genetics
