Dear Dr. Lederberg,

Many many thanks for your prompt reply. These letters helped a lot in filling the gap! I am enclosing 2 missing items in that correspondence.

Do you have a copy of the article(s) under discussion? (References are made to "Cell Genetics and Hereditary Symbiosis," and to a paper published in a Growth Society Symposium by Princeton U. P. ca. 1955).

I am also enclosing the correspondence of Von Neumann and Spiegelman*. I thought you may be interested. If you know more about Spiegelman's (and others) interest in self-reproducing automata I would be very grateful if you share your memories with me.

With warm regards,

Lily (Kary)

* apologies for the underlining.
