

Professor Joshua Lederberg
The Rockefeller University
New York, N Y 10021-6399

Dear Dr. Rosqvist - I would be grateful to
you for reports of your further work on genetics
of virulence in Yersinia.

Do you know of any study of the "subacute -> pneumonic"
transition? Incredibly, the portal of infection suffices to
control this; but I have long suspected a metastasis. Is
there any evidence, one way or the other?

Sincerely,
Joshua Lederberg
