August 14

Dear Mr. Lederberg:

Under separate cover, I send you a reprint of my paper
issued in *Revue Canadienne de Biologie*.

The reprints of the paper dealing with shape growth on irradiated
bacteria are still in France. As I go back to my country ~~at~~
by the end of next month, I shall send you one of them
from over there.

Perhaps would you be interested in another paper by
myself and R. Weill, issued in *Annales de l'Institut Pasteur*
1945 entitled "Précisions sur l'action des rayons ultraviolets
sur les bactériophages".

I would be glad to keep in contact with Dr. Tatum and
you, and to receive in France news of your work. My

address is
Institut du Radium
26 rue d'ULM
Paris (5) France

With best regards to Dr. Tatum and to you

Sincerely yours

Georges Latafret

M.D., Ph.D.
