Personal memo from  
JOSHUA LEDERBERG

Harold Ginsberg.  
P+S.

Dear Harold

MAR 14 1988

Mel Cohn's contributions to  
clonal selection.

Harold - Mel has done some  
wonderful things - but this is  
not one of them. He was ada-  
mantly opposed to clonal selection.  
His papers with Attardi were  
wrong and set the field back  
several years.

I can't imagine who wrote  
this up; and it does Mel no  
service to pretend lies about  
him. It's incomprehensible! \*

But please have my name out  
of it. Just read the papers you  
self, ask Barry Beirnachny.

Jon  
I'm sure he would disapprove of the  
attribution!
