Dr. J. Lederberg
Dept. of Genetics
Univ. of Wisconsin
Madison 6, Wis.

Dear Dr. Lederberg:

We are planning to publish, early in 1956, a "Handbook of Genetics" (ca. pp. 850). The main portion of the handbook will be published in Japanese, but a directory of geneticists and institutes will be included in English. Important among the contents will be descriptions of the present status of genetical research institutes and agencies and introduction of eminent geneticists and their major works.

In order to assure accuracy of description, we are sending questionnaire blanks to the pertinent individuals. May we request your cooperation in filling and returning the blanks to us at your earliest convenience? In order to complete our edition in time, it would be greatly appreciated if your answer could reach us by the end of August, 1955. Please mail your answers addressed to:

Dr. S. Matsumura
National Institute of Genetics
Misima, Sizuoka-ken, Japan

We shall appreciate it very much if you could enclose a copy of your recent photograph.

Sincerely yours,

Yosito Sinotô

Yosito SINOTÔ, Editor in Chief
