Dear Aaron,

You will, I know regard these business letters as addressed both to Szilard and yourself.

Thank you for your note on the results of the phage-recombination-test experiment on K-12.... I am not clear, however, whether you have had any indication that recombination occurred. Were all of the nutritional tests of the parental types?

Before you leave, I would appreciate it very much if you could send me some stocks of a decent titer of the phages T1-T7 (including T3k.) T-1 is the only decent stock I have now, and I am not certain that it is not contaminated with T5.

I just sent you the two Bemelmans books I borrowed. Thanks very much.

Best regards

Sincerely,

Joshua Lederberg
