

Juhaz

The 17th of March, 1956 identical

Dear Professor Lederberg,

many thanks for your kind letter from the 27th of January, 1956. I have fled already to Vienna, when they sent it after me.

You can imagine how pleased we should ^{be} both wife and me if we had the chance to work in your laboratory, but we realize, that it takes time to find space etc. at your institute.

I hope you've got since then the reprints I've mailed you in December, last year. Let me know, please, your opinion and criticism about our work. - Since our latest publication we have been able to obtain regularly a material of pure plasma globules to be produced at will. It is completely appropriate for biochemical and functional investigations.

You might be interested, that we fled from Budapest on the 3rd of January. We have spent 7 weeks in Vienna (that was our second leave from Hungary. In 1944 we were deported like Jews to Dapau-Belzec, esp. Lichten-wool (by the SS). - Although quite aware of the favorable conditions at disposal for basic research in the U.S.A. we had to choose Canada for our new home, since it was much easier to get visa to enter here, than to the U.S.A.

Now we have many a difficulties in finding here job, since basic research (without any apparent ~~value~~ practical value) seems to be somewhat neglected in

Canada. We have still the hope, that we'll find
 easier job in Toronto, than in Montreal, where we
 have looked for. I should be much obliged to
 you, if you had an idea about a suitable job (please)
 for us here somewhere. On the other hand, we do not
 give up the hope to meet you in the future
 and thanking you, help in advance.

I remain devotedly
 Yours

William
