BALTIMORE 18, MARYLAND

McCOLLUM-PRATT INSTITUTE
INVESTIGATION OF
MICRONUTRIENT ELEMENTS

July 21
1959.

Dear Jack - Est,

Tak for sidst! Det var härligt! - I am sending the articles (more detailed) again. Please, give me reference to your work on the triple deficient strains.

Cleland in Bloomington told me that the fall meeting (Nov 16-18) of the Nat. Acad. will take place there. As a newly elected member I am expected to give a paper. Moreover, he asks me about the possibility of a Symposium. Perhaps one could have one on something like "Metabolic Markers in Bacterial Genetics" With you, Arthur Kornberg, Luria, Seymour Cohen, Hartman & Ames, Bonner & Yanofsky. Give me a better idea - I still find the title more or less meaningless.

We could also select Human Genetics – but aside from Hemoglobin there is not as yet too much to say. In a couple of years it will be better.

I could easily suggest a pure biochemical one solely on "Selective Metabolism and its Role in Biology" (Lehninger, Kalckar, Lederberg, Novick, H. G. Wood & Kennedy)

Perhaps that is better altogether — Fondest greetings

Sincerely

Asa.
