

JOHN E. PFEIFFER  
NEW HOPE, PA.

November 23, 1959

Dear Dr. Lederberg,

Just a note to let you know that I'm hoping very much and increasingly that our paths will intersect in the not too distant future. When I am next in California, which is rare for me, I shall certainly be in touch with you to find whether you may have time to see me. But perhaps you will be east before then, and I'm writing to learn your itinerary in the New York, Princeton, Philadelphia area.

I've just returned from three exciting weeks in England, including five days in Cambridge with Crick, Kendrew, Brenner etc. where new work is progressing rapidly. In London--Medawar, Humphrey at Mill Hill (Czech work doesn't check although it seems that injected ~~RNA~~ RNA may stimulate the production of gamma globulin), Foulds at the Royal Cancer Institute, Abercrombie and Curtis at University College. and so on.

I look forward to hearing from you.

Sincerely,

A handwritten signature in cursive script, appearing to read "John Pfeiffer".
