Dear Dr. Lederberg:

I am writing a short review article entitled "The Mechanism of Action of Penicillin". I would very much appreciate permission to reproduce Figure 1 from your article in the Proc. Nat'l Acad. Science, 42 574, 1956. In this article I would of course make proper acknowledgment to the Proc. Nat'l Acad. Science and to you. I am writing simultaneously to them for their permission.

Sincerely yours,

Jack L. Strominger

JLS:mt

Dear Jack:

This was done by our secretary along with several others - hence the formality. The article is for a book being published in celebration of the centennial of Pasteur's discovery of lactic acid fermentation. Points very much for the cultures and the manuscript. I have made the extracts for you, and just have to test them before sending them. They'll be in the mail by the end of the week. I'm embarrassed not to have written earlier but I've been waiting until I had the extracts to send.

Best regards. Sincerely, Jack

OF COURSE, YES

Joshua Lederberg
