Dear Josh, –

Enclosed is the information you solicited; it wasn't I who had written the piece, but Clifford Dobell, much as I might wish otherwise. I suppose that "Parasitology" is available or accessible to you on the campus; the "biography" is a minor masterpiece!

You have whetted my appetite; some time soon I hope to be in a position to read Merton's book, with which I am not (yet) familiar.

All good wishes,

as ever

Kees.
