

Hampson + others (Ken McSheehy). 6

Spent most of day going through the details of arrival. Mr. Williams & I were sent to Mrs. Burke's place at 89 Sussex Gardens, where I had been before, and were given a smelly little double room with the promise of a better one.

We called on Dudley Ward & had a very useful chat about Poland. We shall try to get off for Poland with D. Goodman on Friday, Nov. 9.

Found out that we shall be limited to 55 lbs each on the plane & shall have to send the excess by air express.

Met ~~Mr.~~ Commander Jackson on the stairs & talked about Poland.

Mr. Brown came for his papers brought from London.

Went to cinema & movie with Mr. Williams.

Nov. 7, 1945. Wed. Took my leather suitcase, containing materials to be shipped to Poland (above allowed weight) to Western House & arranged for air expressage to the Mission in Warsaw. This was done in Mr. E. P. Williams name & he paid insurance on £100 value.

7 Took the package, which
Mr. Dai of the Hdy. Secretariat
gave me, to an FRO office
at 11 A Portland Place, 5th floor.

Conversed with A.T. Topping & ^{Mr.} ~~Lordman~~
about the future. A.T. is acting for
Miss Mary Gibbons, Deputy Director
General, over Health, Welfare and
Displaced persons, is away in the
field. When she returns it will be
apparent whether ~~A.T.~~ A.T. has an
~~real~~ important position as Asst.
Dep. Dir. General or not. If not
he might be interested in returning
to the Health Division, as Dir. of Health,
if NMQ were called to the U.S.A.
as Dep. Dir. of Health there.

A.T. says Dr. Gould is doing important
work in the Yugoslav Mission, but ~~was~~
had better discuss with Sinclair Houtitt
before cabling to U.S.A.

Met Dr. Cannon & discussed Yugoslav
situation. He is pessimistic about it.
Learns that there will be no second
Epidemiologist sent for training to U.S.A.,
as govt did not approve. A.T. says
that the 5 nurses in Yugoslavia are actually

at work & doing useful work. 8
Reports for AGO copy.

Visited with Dr. Stuart. Mr. Senthoshaman
left London for Germany about 12 days ago.
He should return in about a week & stay
in London another week with Dr. Stuart; and
then return to U.S.A.

Dr. Goodman brought in & discussed
a letter from Foreign Secretary Bevan asking
whether the time had not come for VAKRA
to act under its power to require
reporting of other diseases than the
five fundamental notifiables.

NM& will write to Dr. Sand asking
that the cards & codes of the G.P. industry
be sent on to Saraga & his Commission.

Had dinner with Dr. ^{4th}Topping (head) and
D. J. Stuart at the Athenaeum Club.
Met John Marshall there.

Nov. 8, 1945 ^{Thurs} Staff meeting of H. Div. in
Dr. Goodman's office. Dr. Stuart reports
on influenza vaccine. Apparently Parker
Davis at St Mary's hospital is making
a mouse-lung influenza A vaccine
& recommends accompanying it
with a bacteried vaccine. The army A+B
vaccine is not available, but possibly
we can send some people for immunizat.
by the army (100?). Dr. Loutit talked on

9 the program in Yugoslavia. The tubercular survey by Dr. Gould has covered the country, as shown by a map of places visited. Dr. Stuart raised the question of vaccinating infants against *g.f.* Some unvaccinated ones have been held up and now policy in England, ^(Wellcome Inst.) is to vaccinate all. No untoward reactions have resulted.

Dr. Cong Coigny explained that the investigation of relapsing fever in Algiers was purely French but that Dr. Sand and Dr. H. Morgan had been invited, and urged by Brigadier Fraser of the Fr. Mission, to serve as observers, and ~~make~~ ^{participate} (probably at UNRRA expense).

Dr. Banks has been assigned for the time being to the U.S. Zone of Germany to supervise German hospitals treating displaced persons. This function had suddenly been put on UNRRA by the military government mission,

Dr. Boutin, ^{acting as} spoke of the conflict of the Ministry of Health within the Mission and the attitude of the Chief against the services (health, etc).

Dr. Vine has been temporarily loaned to a British mission in

11 to the order of Dr. B. and sent it to Dr. John B. Grant to be held for him.

Col. Martin, M.D., had a visit with WAS and took the latter to luncheon at the Conservative Club on St James St. He is interested in medical research and has been in West Africa. He has been granted a fellowship by the M.S. of the R.F. effective in March 1946. Now he is ~~working~~ acting for Dr. Meislerjohn on nutrition. He is trying to complete a plan for dropping food behind the Pindus Mts. of Greece from airplanes.

At 3 p.m. ~~Dr.~~ Mr. Williams, Mr. Adair, and WAS had an interview with Lt. Gen. Gale, the D.D.'s personal representative in E.R.O.

Sept 7 with Mrs. Hampstead for safe-keeping + Mr. Williams left 7 4.

Nov. 10, 1945 Sat At 5:15 am UARRA station wagon called for us, ^{Mr. Williams & me} + then picked up Dr. Goodman in Crees. We drove out to the Black Bush airport to be told that the plane for

Warsaw would leave at 9 a.m.
+ that we could have a ~~cup~~ ¹²
of coffee + some vacuums. At 11
it appeared that there was trouble
with the plane. We finally pushed
off at 11 a.m. The flight was very
bald and the windows were frosted.
Flew at 9500 feet. No blankets.
Were lucky to have ~~some~~ ^{some} heating
seats instead of bucket seats.
Arrived in Berlin at the
Gatow air field, where we ~~left~~
at 5:30 Berlin time + 3:30 London time.
It was raining, dark, + cold.
Were given ~~some~~ supper at the mess
and rooms.

Read an article in the Brit Med Jour.
on the new anti-malarial, "haludrine".

Nov. 11, 1945. Sunday. Left at 9 a.m.
for Warsaw. There was little to see
in Warsaw. There was little to see
but we crossed Berlin and saw
something of the ruins.

* Inert in J. 10. Called at Dr. O'Brien's
office and arranged through his secretary to dine
with him. Went out to the School of Hygiene
to talk with Dr. C. N. heading of the I.S.D. He has
not heard from Dr. Bazar for a long time
and wants WHO to "get him out". CNH says

13. that his family, wife & son, will
join him in London in about a
fortnight, but later the R & F offices will
move to Paris where Mrs. Le Tour
is now.

In the evening D.B. had dinner
with Dr. Pat O'Brien, and afterwards
they were joined by Mr. Glen Marshall
and a Dutch "sub-minister" of Education,
Mr. Renniech.

After a little over 4 hrs, flying
mostly over cloud or in fog, we
found ourselves landing in Berlin
again, at Gatow aerodrome, at
about 2:30 pm. We had gone within
15 miles of Warsaw, when a message
came that there was heavy snow
there & we should return to Berlin.
After a good lunch we went into
town at 3 pm on the army lorry and,
after about 15 miles of road were
landed on what had been one
of the main streets. Walked to
the Hotel Saxon to arrange for
our dinner, but found that
you could not ~~stay~~ have a meal

unless you stayed over night
had a room. Nevertheless we will
given tea ^{the man of change, a Belgian. Had been held up of pretty things.} sandwiches.

Dr. Vine in the lobby sitting room.
He is with the ^{Missim} studying health
conditions, on loan from ONRRA.
Met also a Dr. (what?) Vine who knew
Dr. W. A. Davis well + had worked with
him in typhus. W.A.D. had advised W.B.S. to
try + get him to join ONRRA for typhus
work. Dr. P., however was not interested
in going to China, especially for
typhus work. However he did not expect
to get out of the army till June.

Mr. Carlin, ^{ONRRA} succeeded in getting
a small car and driver from the
British army. We drove in semi-darkness
through light rain + saw some of
the sights! ^{passed through the [unclear] [unclear]} The new Russian memorial
to the war dead had been opened on
that day, and a huge bronze soldier
stood on top guarded below by two
live soldiers with machine guns.

Drove past the ruins of the Chancellery
and the Propaganda Ministry and
saw whole streets of ruined
buildings. Then drove out to the country

15 Club. near the audience.

Had a good dinner, well served,
for 6 marks each. I walked to
the audience (about a mile).

Nov. 12, 1945 - Monday. Again the weather
was reported as bad & flights were
postponed & train cancelled. Interim that rain
very little heat & we were not overcast in the house.
In the afternoon we crowded into a small
lorry, standing or sitting and drove to
the Bristol Mess where we met
Dr. Krauss of the U.N.R.R.A. Displaced
Persons Center in Berlin. He had brought
his car. First he took us (V.N.G., W.S.S.,
Mr. Williams, Mr. Kaplan of the U.N.R.R.A.) on a
sight seeing drive. Viewed the ruins
of the ~~Third~~ Reich Chancellery, the Opera,
the Peace, the Propaganda Ministry,
~~Stalins Palace~~, etc, etc. Saw ^{small} crowds
of people in the Tiergarten woods &
elsewhere in the so-called black
markets, bartering. Cigarettes are
a common medium of exchange.
At various places there were bulletin
boards or exchanges where people
put up notices of what they had
& what they would trade for.

Nearly all the people carried 16
bags or parcels and ^{heavy} carts were being
pushed by groups of men. Usually
the load was wood. Sometimes
women were doing the same.

The high spot of the tour was
a visit to the interior of the
Chancellory. A German in police(?)
uniform showed us through.
Saw the huge "Mosaic Hall", the
~~reception~~ the great room in which
Hitler had his table and the
~~rooms~~ wreckage of the table
itself. From the windows we
could see the ^{alleged} structures
above the air-raid shelters.

Saw the reception hall and
various long corridors. All pictures
had been stripped from the walls,
allegedly by the "Russians". There was
much polished stone in the walls.
The rooms were very spacious
and must have been elegant.

We passed ^{in one of the long corridors,} one Russian soldier with
extremely Mongolian features, ^{carrying big bundles,} who
yelled at us, presumably thinking
we were Germans, but it was not clear what he ^{meant}.

While driving through the streets we passed a troop of marching soldiers without guns and were impressed with the great variety of types, some extremely mongolian, others of the more usual Russian types.

Drove to the ~~Hotel~~ G-5 ~~Hotel~~ located Persons Center³¹ and called first on the UNRRA Director, Mr. C. J. Taylor. The UNRRA team ^{at the station} had been there since July 21, 1945. Dr. Krauss came at the beginning, and had been joined a few weeks previously by Dr. Santa Marina, a Cuban. There were three nurses in the team, Miss Butler (an Australian), Miss Buchin (Polish), and Miss Baeyens (a Belgian). Saw the first two. There was also one S.P. nurse and one Finnish doctor who had almost qualified. Eight Russian girls worked for the group and were paid by the Burgermeister. The center hospital contains an average of 10 persons ~~per day~~ and the clinic receives about 20 visits per day. About 165 transients are

examined and tested daily 18
Diphtheria is prevalent, ^{antitoxin} is given to
adults because they have been exposed
and both antitoxin & word to children
There is a "permanent" group of about
100 persons, most of whom claiming to
be Americans. The others move
through us from 1 to 3 days. Some
cases have to be hospitalized in
the several rooms available. Seven
cases go to German civilian
hospitals. The people are coming
mostly from the Russian zone
The people at the center get 3500
salaries per day.

All the d. ps go from Berlin to
Heselingen near Hannover, a British
Army Displaced Persons Camp.

The staff ^{in Berlin} seems competent, ^{apparently very} busy, and
reasonably contented.

Visited the large dining room, cafeteria
system. The kitchens were ~~also~~ clean.
Cooking by electricity, with a stove for
emergency use.

Dr. Krauss took us way out to the
flying field & had dinner with us.

Nov. 13, 1945. Tues Snowing! Also chilly.

19 A couple of kerosene stoves helped out a little in the huge & high living rooms. After lunch a group of us passengers took a walk for a couple of hours. Went past the G.M.C.A. Officers Club at Szatan, where we had had dinner on Sunday (The "Country Club"). Walked down to the large river Hafel (or Apel?) and followed its shore. Returned to the Officers Club & had afternoon tea. Walked a while longer in the pine woods. Saw farmers plowing with horses & passed fields of young grain.

Nov. 14, 1945. Wednesday. Cloudy & rainy.
Took off for Warsaw at 9 a.m. Arrived at about 11:45 at Warsaw Airport. Were met by Dr. Holle & taken to Hotel Polonia, Room 554. Shared by Dr. Goodman & me.
* Mr. Teesdale issued us some glotys at the rate of 900 per day. (Rec'd 900 x 2 1/2 to midnight Friday). Met Mr. Hayes of Agriculture and rehabilitation ^{and temporary in charge of supply} and Mr. Brown of Finance and Administration (Dep. Chief of Mission). Mr. Teesdale's office is Room 103 of the Polonia, and Dr. Holle's room & office is #508. Dr. Litwin is Minister of Health and he expects to go to the U.S.A. in 8. Found.

Travel grant early (March) in 1946
\$5 U.S. = about 1000 ^{Polish} zlotys, Pl. 20

The mail address at Warsaw
is ~~Dr.~~ Dr. W. G. Sawyni, UNRRA, c/o U.S. Embassy,
Warsaw, Poland; ^{Adm. Office, Military Government,}
Germany, APO 472, % Postmaster, New York.

Talk with Dr. Rajchman at the Polonia
Hotel ^{in the evening.} He expects to leave by plane for U.S.A.
on Paris in the ^{forenoon} morning (actually ^{was} delayed
one day more). Mentioned that the number
of Polish physicians had been reduced to
5 or 6000. Stressed again the need for
lectures & mentioned proposal of Unitarians
of U.S.A. to supply lecturers in physiology,
medicine, and surgery. Dr. spoke of
the desirability of a malaria expert & of
instruction on DDT, the solution of the
typhus situation. He criticizes Dr. Stolle
for not doing something about it. An
interesting development is that Dr. Janicki
~~has~~ at Lodz Institut of Hygiene has completed
a malaria survey & we should see ^{the} ~~the~~ maps he
is preparing. Very important to overcome
prejudice against Cox vaccine & explain
it & help organize a real campaign.
There exists a Section of Epidemic Control
which is a special commissariat with
full powers. The Ministry of H., according to HR can
only ask local officials to do things. The

21 not are now integrated for monetary
Dr. Przesmycki ~~who~~ is ~~the~~ Genl
Director of all Institutes. A good administrator.
Could org. a special campaign against typhoid.
Should begin at the central institute and then
expand to the others, ~~the~~ increasing prejudice
against typhoid, etc. The Germans used a
non substituted for Cox sac, & brought it into
disrupts demonstrations ^{of technical of war} & of DPT
would be valuable.
Introduced WAS to Dr. Ludwika
Hirszfeld Hirszfeld, Dean of the Medical
Faculty in Breslau.

Sollins has asked for a monthly
supply program. L.R. has no objections
if ~~in~~ program carries through with
only additions & modifications. Rajchman
says he will have an assistant in Washing
to deal with supplies. ^(Woman) Dr. Holodziejewski is
Senior Assistant & Deputy Director of
Curie Radium Institute. He is now ~~conducting~~
investigating the whole UNRRA Program and
will call on WAS. ^(Sept. 36) A most promising
young ^{doctor} is Dr. Grzegorzewski. ^(Sept. 32)

There are 6 or 7 main centers: Warsaw,
Lodz, Lublin, Cracow, Breslau, Poznan,
& Gdansk.

There is a governor over each province
& an MOH under him from administrative
point of view & otherwise under the

23 increased.

~~Infectious~~ Diseases are separately reported.
Dr. Tubiasz will give figures to Dr. Koch &
will prepare a statement for the Epid. Info.
Bulletin. The figures for Poland
are not quite accurate as yet. Dr.
Bauer has forwarded to Dr.
Litwin a travel grant and
another to Dr. Pziesnicki & they
will go to USA next year. Dr.
Hirsfeld is also going in January.

The new ministry consists mostly
of practitioners & politicians & are not
experienced in public health. Health
centers are being organized. There
were 800 before the war & now 400 in
present Poland. Emphasis is being given
to the need for 1500.

* Insert in p. 22.

L.R. mentioned that the Gonococcus in Warsaw
was sulfa-resistant. He emphasized the
need for books & periodicals. Dr.

Konopka is librarian to ministry of health.
L.R. says a percentage of the total ^{UNESCO} ^{sum} ^{to}
be allocated to rehabilitation work of
all kinds of institutes. As for lecture
subjects he recommends VD, Child H. & Pediat.
T.B., Nutrition, Physiology, Epidemiol. &
and infectious diseases. If Unitarians

participate as Vol. Agency they ²⁴
should submit names for approval.

Talked with Tubiasz, Halle, + Dr. Doodman. The
Swedes have sent in three 400-bed hospitals
already, ~~together with~~

Brygada Drury. Discussion of Polish
exiled doctors in London. He thinks
their recruitment as consultants of
Polish government doesn't make sense.

D. Litwin, Minister of Health. Seen by
NMG, Halle, Tubiasz, + WAS. Pleasant
reception. Approved informally the
introduction of health consultants
and staff. A letter is to be sent by
him. He is going to U.S.A. about
March.

Mr. Kolaczowski. In charge of Transport
of Ministry of Health. Discussed the
shortage of trucks for the distribution
of Med. Supplies. Have about 3000 tons
of med. supplies to distribute. Have 15
trucks in Ministry of 3 tons capacity.

XX Dec 1. 29

Nov. 16, Fri. Visited points of interest in
Warsaw. Went to the "Saint Spirit"
Hospital, or rather its ruins. It was
a ^{large} municipal hospital before the war, but

25 is now completely ruined. At one place a sign on the wall indicates that there were still bodies under the rubble. Drove through ~~the~~ several streets to view the complete destruction of the buildings by systematic demolition and burning. The acme of destruction was in the ghetto, where even there were practically no standing skeletons of walls, - just piles of bricks & rubble.

Called on Dr. Grzybowski, Professor of Dermatology at his Clinic (Hospital). ^{of the Univ. of Warsaw} Went through his laboratories, consulting rooms and wards. He carried much equipment away & concealed it until after the occupation was over. He gave the impression of being a very competent and energetic, but nervous, individual.

In the evening Dr. Goodman, Dr. Holle, and WGS had Dr. Kacprzak to dinner at the Polonia Hotel. He is director of the State ~~Institute~~ ^{Department} of Hygiene at Lodz and Pres. of the Advisory Council on Public Health.

He talked of his experiences ²⁶
and risks during the recitation, and
the rising anti-Semitism.

Met Mr. + Mrs. Shaw Jones. The
former is photographer + the latter
writer. Met also Mr. Larry Allen,
representative of the Associated Press
in Poland.

Nov. 17, 1945. ~~Friday~~ Saturday.

A car was put at our disposal
by Mr. Teesdale of UNRRA. Dr. Goodman,
Dr. Tuhasz and W.A.S. drove about
15 miles westward to the town of
Sochaczew, ^(population - about 20,000) to inspect conditions.
On the way we saw an UNRRA
tractor actually pulling a plow. There
were two others of the bright red machines
on the road. Found the doctor who
is in charge of the Infectious disease
hospital + he took us to see it. There
were typhoid cases in the wards but
no typhus. One nurse, ^{rather dark} took care of
them. They lay on straw ~~beds~~
mattresses ~~of~~ which could be
burned and were covered with ~~wool~~
ragged blankets + sometimes own clothing.

27 No minute request had been put in for UNRRA supplies. This hospital illustrated the poor state of infectious disease hospitals.

Went next to the health center with the District Physician. This seemed to be an effective institution. Some UNRRA drugs were on hand. In the office were modern typewriters. There are clinics for VD, TB, trachoma (130 cases), maternal & child welfare.

The ^{district} sanitary inspector is also a sort of manager on the unit. There is a small diagnostic laboratory. The principal activity of the sanit. inspector and his team of 6 persons is food inspection in the district. Saw the rather primitive hot air sterilizer on wheels which is used to disinfect clothes when typhus is present. There is no DDT on hand.

Visited also the general hospital. It was crowded, but had mattresses, sheets, potted plants, and apparently plenty of equipment. Nothing is needed from UNRRA. The food is limited. There is meat only ^{about} once a week, and no milk for adults.

~~See Dr. Trubas~~

28

Returned in time to see a
brigade of Polish soldiers who had
been serving with the French Army
return to Warsaw and parade
past the hotel. They were
decorated with flowers.

Nov. 18, 1945. Sunday. During the
night there was first music
from a dance given by the hotel
and finally, between 4 and 5 a.m., a
great noise in the court yard
and two gun shots and also
loud talk and the pleading
of someone ^{presumably} being arrested and
taken away.

Saw Dr. Goodman A.M.
the plane for Berlin + London.

x Insert in p. 22 (second insertion)

A telegram was read as follows:

Praha, Nov. 13, etc. ~~On the occasion~~

Dr. Sanyer, Medical Director, Hotel
Polonia, Warsaw. On the occasion
of your stay in Europe may I invite
you sincerely to visit Czechoslovakia
and give us the benefit of your

29 advice and criticism and
accept our thanks for the
work which is being done by
the UNRRA in this country -
Dr. Prochazka Minister of Health
Prague."

xx Insert in p. 27.

The following telegram number 360
was received from London dated
13 Nov.:

" 360 Following repeats No. 6792 from
Washington Personal for Sawyer from
Byrd letters received from Poveras
and Abrams to you strongly urging
you visit China soon. In interim ^{phase}
presented these letters and delays
Boric's travel to Washington
we consider wise to send him
directly to China via Rome
immediately. We exploring
possibility travel arrangements
in cables to Rome and Belgrade.
If Boric does not visit Washington
en route you visit China to
Orient visit appears indicated.
Dir. Dury says "Dr. Kujerman has
suggested that Dr. Alan Gregg might ^{be} useful."

advise on names of lectures³⁰
for Poland to be sent by UNRRA or
the Unitarians."

(Nov. 18, contd)

Dr. Goodman gave me the following figures:
Supplies (all types) shipped to Europe up
to Sept 30.

Tons 2,012,389

Cost 504.1 million dollars.

DPs Germany (U.S. & Fr. zones only)
at 2 Nov. '45.

790,245 - United Nationals

of which 719,257 were Poles.

Doctors & nurses in Europe = 1157,
including DPs and Vol. Agencies.

Of these, France 281, USA 158,
Belgium 156, UK 92. 29 nationalities.

Nov. 19, 1945, Monday. Mrs. Shaw prepares
a press statement on my arrival.

Sent another cable on the missing
suit-case from London. Worked on
lecture No. 2.

Nov. 20, 1945, Tuesday. At 10 a.m. Dr. Holt
and I went to the Ministry of Health

31 in the building of the ~~Institute~~ School

of Hygiene. At about 10:15 I gave a lecture on "The Epidemiology and Control of yellow fever and influenza", the first in a series of three. Dr. Franciszek Litwin, Minister of Health, presided and Dr. Stanislaw Tubiass translated section by section. There were about 50 physicians present in the conference room, including Prof. Dr. Kacprzak, Dean of the School of Hygiene (pronounced like "Cotzprzak"). He is also ~~President~~ Chairman of the National Public Health Council.

Dr. Litwin is introducing me expressed gratitude for the assistance UNRRA was giving.

After the lecture, the ~~Director~~ ^{Director} of the Central Institute of Hygiene, ~~Dr. Puzosmycki~~ ^{Dr. Puzosmycki} took me through the ^{various} ~~institute's~~ laboratories. The buildings put up with Rockefeller ^{Foundation} funds consisted of two connected structures, - the School of Hygiene, now housing the Ministry of Health and the ~~diminished~~ ^{diminished} School, and the Institute of Hygiene. There was practically no destruction of these buildings, but

a great deal of wear and ³²tear and destruction or removal of equipment. The laboratories, except the chemical ones, were very bare and obviously were just getting started again. Went through the rooms of the School of Hygiene with the Dean, Dr. Kacprzak, a very dynamic English-speaking person.

~~Washed~~ The Institute of Hygiene is the central one, ^(improving at 1932) and has 11 branches.

A letter was brought to me by one of the doctors from Prof. Dr. Z. Szymanowski, Rector of the Medical School (Faculty?) of Lodz. The date was Nov. 18. He invited me to visit that city and present before the Medical Association the "results of my work on yellow fever, malaria and disinsection." Accepted orally for the evening of Dec. 4. Will write also.

Met Dr. E. Inzeqorski, Dean of the Medical School of Danzig. ^(Danzig) Invited him to dinner and broke the news that I should have to give up my plan to visit Gdansk.

Talked with the Propaganda Chief of the Ministry of Health, Dr. Jagielski. He wishes to take with me again after my tour of Poland.

33 Dr. Edward Ingegorzewski, Prof.
of Hygiene at the University of Gdanek
was ~~our~~ dinner guest of Dr. Holle + WAS.
He is opening the medical school
there with a beginning class of 200
first year students. I explained my
inability to go to ~~the~~ Gdanek. E.G.
is a former fellow at Johns Hopkins.

Wednesday, Nov. 21, 1945. At 9:30 a.m.
Mr. + Mrs. Shaw Jones with Dr. Holle + WAS
drove to the ~~chemical~~ warehouse for
medical supplies in a former chemical
establishment in the suburbs. Mr.
Shaw-Jones took many photographs
of supplies in the warehouse or being
loaded, with H.H. or WAS included.

Called on Mr. Hejret, Minister of
Czechoslovakia, ~~who~~ at his office in Room
202 Polonia Hotel. He had a message from
the Minister of Health at Prague to the
effect that Dr. Vesely, Department Chief
at Ministry + former fellow of Rockefeller
Foundation, would be available right
away for a position with UNRRA. He is
expert in organizing public service. He
speaks English well. Mr. Hejret is leaving
for Prague in a couple of days + will
