The Following from the Statement of Our Business Policy is Pertinent

NLM

THE SALE OF DOMESTIC MEDICINES

Recognizing the necessity for domestic medicines and the advantage of confining this class of preparations to reliable and skilled manufacturing pharmacists, insuring reliable products with accurate statements concerning formulas, dosage and therapeutic claims, in contradistinction to secret or so-called patent medicines, and with the object of reserving the Mulford label to protect professional interests, a limited number of preparations will be manufactured by the H. K. Mulford Company and distributed under the name of the Waverly Chemical Company, a regularly chartered corporation.

Full formulas and accurate statements will appear on the labels and literature, and all preparations distributed by this company will conform to the requirements of the Food and Drugs Act. Guaranty No. 3047.

Unwarranted or misleading statements as to the therapeutic value will not be made. No article will be offered as a specific or as a cure.

Information on labels and circulars will be confined to statements taken from standard authorities, giving information which the public should know in order to discriminate against secret remedies. Our object is to educate the lay public to discontinue the use of secret remedies, to consult their physicians concerning any medicinal preparation that is to be used for household purposes and thus limit the field of self-medication.

TERMS

All goods are carefully packed by experienced men after double comparison with invoice, and our responsibility ceases as soon as goods are shipped. Claims for breakage should be made direct against the transportation company.

All shipments are regularly made f. o. b. Philadelphia, New York, Chicago or St. Louis. Positively no freight or express charges will be allowed in excess of 10 per cent of invoice.

Terms, 30 days, subject to a discount of 2 per cent for cash if remitted within 10 days from date of invoice.

The prices of preparations listed in this catalogue are subject to market fluctuations without previous notice.

Orders for assorted gross will be filled at the lowest or gross price, provided that not less than three dozen of each preparation desired is ordered.

We will not under any condition furnish bottles, labels or wrappers. While appreciating such requests are made in good faith, we are personally responsible for the identity and quality of these products and are forced to adopt this arbitrary rule; any other policy would be unsafe.

IMPORTANT

Order by number and size of packages desired.

PREPARATION AND LABELING

We manufacture but one class of products and that the highest. The same care is exercised in the selection, testing and standardizing of the drugs and in the labeling of preparations supplied under Waverly name as though offered under our own label. Every preparation manufactured by our firm conforms to the Pure Food and Drugs Act, and, in addition, the full formula is printed on label and wrapper.

SPECIAL NOTICE

We find the careful druggist recognizes the importance of confining the use of his name to products of his own manufacture; this, together with the fact that as manufacturers we are responsible not only for the preparation but also the labeling and the accompanying literature, has determined our action in discontinuing to supply buyers labels on preparations manufactured by our firm.
