

OXIDAZE TABLETS

- How to stop a Cough and Cold :
- How to treat Acute or Chronic Bronchitis :
- How to check Whooping Cough :
- How to relieve Paroxysms of Asthma :
- How to quickly conquer Pneumonia :
- How to help stamp out Tuberculosis :

While scientists are evolving theories concerning these matters, we are producing results. People who are suffering demand no fine-spun theories, but simply ask for quick and tangible results.

The testimonials given herewith speak volumes, not of theories, but of ACTUAL RESULTS obtained from the use of Oxidaze Tablets.

THE PEOPLE SAY :

OXIDAZE TABLETS Give Quick Results

TESTIMONIALS

TUBERCULOSIS.

BE IT KNOWN that we, Samuel and Sarah L. Gaskill, husband and wife, are the parents of Nellie L. Crafts, who is 32 years of age, married, and lives in Waltham, Mass.

About two years ago last November, our daughter was attacked with pneumonia from which she seemed to make a good recovery. One year later she suffered from La Grippe, which left her with a severe cough and she soon suffered a loss of appetite and a manifest loss of flesh.

In May, 1909, she was much emaciated and she began to suffer hemorrhages of the lungs, with an accompanying high fever, which fever was almost continuous, and hemorrhages frequent, up to the following October. At that time her physician informed her husband and herself that she had a settled case of tuberculosis, and that in his judgement, she could not live through the following month of November, and of course, none of us had the slightest idea that she would ever recover. Just at this period, her attention was called to a new remedy known as "Oxidaze," by Dr. E. Howard, a long-time friend of the family. She began taking tablets about October 1, 1909, and within a week, her fever was reduced several degrees and in four weeks, her temperature became normal. She continued the use of Oxidaze only, no other medicine being taken, and within four months, all coughing had subsided, and she was gaining very rapidly.

At the present time, less than seven months from the beginning of the treatment, all symptoms of tuberculosis have disappeared and we attribute Nellie's present condition to the use of "Oxidaze," solely, as she took no other medicine during the entire time. When she began the use of this remedial agent, she was scarcely able to walk across the room.

Naturally, we feel most grateful that Oxidaze treatment was ever suggested to us, and we are confident that this, and this alone, is responsible for saving the life of our beloved daughter, and we subscribe our names to this testimonial, desiring that

the world may know of this marvelous cure, hoping that it may be the means of bringing relief to others suffering from a similar affliction of the dreaded White Plague.

(Signed) SAMUEL GASKILL,
SARAH L. GASKILL,

Milford, Mass., April 18th, 1910.

COMMONWEALTH OF MASSACHUSETTS.

Personally appeared before me Samuel Gaskill and Sarah L. Gaskill, each known to me as persons entitled to credibility, and made solemn oath that the above affidavit by them subscribed is just and true, before me.

(Signed) LOWELL E. FALES, Justice of the Peace.

LARYNGITIS.

To The American Oxidaze Co., Worcester, Mass.

I have been subject to attacks of Laryngitis for the past ten years, which inflammation extended to the vocal chords, resulting in an almost total loss of the voice, often from two to three months at a time. With every attack, I was usually treated by a specialist, with very unsatisfactory results, and was advised that in such cases, little could be done, and that as I grew older the attacks would probably grow more frequent. I was told that the most effective remedy would be to take up my residence in a different climate. The future in that respect looked dark to me, till I had tried and proved the efficacy of Oxidaze Tablets, which I have used now for the past six months, and have not only regained my normal voice but seem to be entirely free from a tendency to the old malady. The Oxidaze Tablets have been worth thousands of dollars to me, as they have not only fully restored to me my voice, but have removed all apprehension as to a recurrence of the malady.

Yours gratefully, F. H. HAMBLIN,

Worcester, Mass., January 7, 1911.

Treasurer of the Hamblin & Russell Mfg. Co.

TUBERCULOSIS.

To the American Oxidaze Co., Worcester, Mass.

Dear Sirs:—Your letter of the 4th inst. at hand, and will gladly say that it is no trouble for me to write anything regarding your wonderful medicine called Oxidaze, for before taking Tablets I was a complete wreck, had been given up by four Doctors besides two Specialists, who all claimed my case was one of Tuberculosis and that there was little chance for me. I suffered day and night, had those dreadful night sweats and coughed and raised all the whole time, had three severe hemorrhages and was so bad I had to be carried in and out of doors as the Doctors wanted me to live in the open air. I could not take a step unless some one would help me, as my legs were so weak I could not bear the least weight on them, or I would fall. Well, this was April the 5th 1910.

I was given up by the Portland Specialist, who said my case was one of Tuberculosis and that he could see little chance for me. I knew that it would be a matter of a short time, as I suffered so, I just prayed to be taken, until a very dear friend wrote me about the Oxidaze, while visiting her Niece in Massachusetts. Well, I thought I would give it a trial, but did not seem to have any faith in it, as I had taken so many things I was sadly discouraged, but before I had taken my whole box of Oxidaze, I could see and feel the change all through my body and by the time I had taken my tenth box, I was doing all my own work and felt as strong as anyone.

Oh! it has been such a God-send to me. Why, I cannot praise it enough, it really has done wonders in my case. I am strong and well today, and everybody tells me, I am the picture of health. I can now eat my three hearty meals and enjoy my long walks. God bless you in helping suffering humanity.

Respectfully yours, MISS IDA M. YORKE,

December 8, 1911.

135 Hill Street, Bliddeford, Me.

American Oxidaze Company,

December 30, 1911.

My dear Mr. Merriam:—I am sending you a statement for the Oxidaze Tablets. Will say, that about eleven months ago, I had a bad cough with night sweats and a pain in my lung. I was very weak and could not get around the house without help. Neither my Physician or my Friends thought I could live but a few weeks or months. At this period my attention was called to the Oxidaze Tablets, which I tried with great success. My cough and night sweats have stopped and I am better and stronger than ever before. I weigh more than ever before, have gained twenty pounds in the last few months, and I do all my own work and walk a distance of one half mile to Church on Sunday. I feel that I cannot say enough in favor of the Remedy, and am glad to give you this testimonial. Wishing you success in the business, I am

Yours sincerely, MRS. H. F. GILMAN,

198 Dewey Street, Worcester, Mass.

LOSS OF VOICE.

Mr. F. H. Hamblin, Worcester, Mass.

February 26, 1912.

Dear Sir:—I have been a long time in writing to you about the Oxidaze Tablets, but I wanted to wait and see the results. Now, I can say that my son has found great relief from them. His voice was down to a whisper. I wish you could have heard him sing last evening. I thought he would never sing again, but I think that he sings better than ever. His Father and I were very much surprised to hear his voice so strong. I am so glad that I read the advertisement and wrote to you. Thanks for your advice.

He has taken four boxes in all and still takes them. He says they did him a world of good, and he will tell everyone that is affected that he knows.

Yours respectfully, MRS. JOHN H. BARLOW,

5 Patterson Court, Waterville, Conn.

PNEUMONIA.

Dr. Eugene Howard, Worcester, Mass.

City of Mexico, Dec., 1910.

I have tried the remedy during two full years and will say that I do not know any better and more efficient cure for Pneumonia than Oxidaze. I have had the chance even to cure several cases of suppurative Pneumonia.

As to beginning tuberculosis, I dare to say that Oxidaze stops fever, night sweats, cough, and that it builds up the system; even in secondary tuberculosis it is most efficient. Just HOW the remedy acts, I am at a loss to explain—but it does act, that is all that I care for.

Yours respectfully,

SANITATSRAT G. PAGENSTECHER.

Late Director of Am. Hospital, Mexico City.
Honorary Gynaecologist to Am. Hosp., Mexico.
Honorary member of San Luis Potosi.
Gynaecological Society.

ASTHMA.

American Oxidaze Co., 553 Main St., Worcester, Mass.

April 28, 1911.

I was a great sufferer from Bronchitis for several years, while residing in Worcester. After removing to Saratoga Springs, Asthma developed in a very severe form, and for four years I was a great sufferer, for over two years I was under the care of a physician with no relief, then I tried every form of Asthma cure that was recommended to me, with no results.

About a year ago a friend recommended me to take OXIDAZE TABLETS. I was thoroughly discouraged with all former medical treatment and hesitated about taking the OXIDAZE TABLETS, finally I concluded to try them, and obtained a box of one hundred tablets, after a few days to my surprise, I began to mend, that is my breathing was better, did not wheeze and cough, could lie down and breathe comfortably, whereas before the treatment I was compelled to sit up.

I continued the treatment and after taking only one box of OXIDAZE I found I was completely cured, that was eight months ago and since the cure was made I have had no return whatever of this distressing disease. I owe the cure absolutely to OXIDAZE TABLETS and will recommend them to all sufferers of Asthma.

Persons wishing to inquire about this statement may address me as I will cheerfully tell them what OXIDAZE has done for me.

Yours very truly, MRS. JULIA E. GUY.

51 Putnam St., Saratoga Springs, N. Y.

Many other testimonials are on file at the offices of the Company, and may be seen by those interested.

We point the afflicted to the results obtained. Let these results declare the real merit of this remedy. It is the VOICE of the PEOPLE who are themselves conscious of having been either cured or greatly benefited by the use of Oxidaze Tablets.

We vouch for the truth of all statements herein.

Directions for Using Oxidaze Tablets

TUBERCULOSIS.

A faulty digestion in Tuberculous cases and a marked intolerance to both food and drugs is often observed. Hence great care should be exercised in the selection of easily digested food, as a good digestion is one of the very best assets of the tuberculous subject.

Whenever the digestion is impaired the quantity of both food and medicine should be reduced. If the temperature runs high absolute rest in bed is imperative. Regulation of the bowels should receive scrupulous attention and constipation avoided. Sleeping in the open air or in well ventilated rooms is beneficial. Attention should also be given to proper clothing. Exercise moderately indulged in when there is no fever is also beneficial. Exercise to the point of fatigue should never be tolerated. Personal cleanliness should be observed. Alcoholic stimulants are of very questionable value. Always cover the mouth when coughing or sneezing, and use paper napkins instead of washable napkins for the sputum, after which burn the napkins. Hours spent in sleep are hours well spent, as sleep is a great restorer of vital energy. Never, under any circumstances, expose yourself to reinfection by associating with others who have Pulmonary Tuberculosis. Absolute isolation from all such should be strictly adhered to.

By the constant observance of the above, the system will become better able to make a successful fight against this disease.

The great value of Oxidaze, in Tuberculosis, seems to consist in its ability to so augment the vital defensive resources of the body as to enable its normal physiological processes to finally conquer the germ of infection, and eliminate from the system the products of its toxic devastation.

The dose of Oxidaze Tablets and frequency of dosage should be as follows: In beginning Oxidaze Treatment for Tuberculosis which must necessarily be continued for months, commence with one No. 2 light Tablet, once every two waking hours, for the first week and then gradually shorten the intervals to one tablet every hour for three or four weeks, after which take one No. 1 dark Tablet, once every two waking hours for one week and then increase to one Tablet every waking hour and continue through treatment, except omit taking any tablets for two or three days once each month.

Always recollect that the vital resistance of the individual is the important factor in the complete arrest of Tuberculosis; therefore always make use of the **Oxidaze Tablet**, as its important function is to augment this vital individual resistance to infection. Therefore take **Oxidaze** as directed. Exercise patience. Regard the rules above and all other hygienic measures, and expect a gradual improvement after two or three months' treatment and look with confidence for a final victory in the end.

By the faithful and patient use of **Oxidaze Tablets** coupled with what is termed the "fresh air", "good food" and "rest treatment", surprising results have certainly been realized.

As a decided help, use in connection with the **Oxidaze Tablets**, **Oxidaze Emulsion of Cod Liver Oil and Olive Oil** with Hypophosphites, representing the nutritive and medicinal value of the best Oils, the tonic and building properties of the Hypophosphites and the curative value of the **Oxidaze Tablet** medicament.

Testimonials furnished on application.

PNEUMONIA.

From the very beginning of Pneumonia take one No. 1 dark **Oxidaze Tablet** crushed and dissolved in a little hot milk each half hour; and if the symptoms do not improve within 24 hours and the temperature runs high, double the dose and continue till the temperature becomes normal, after which resume the former dose once each half hour, and gradually reduce the frequency of the dosage till full recovery is well established.

Oxidaze Tablets quickly conquer those Coughs and Colds, so commonly the first noticeable symptoms of Pneumonia, and they also help to fortify the lungs against any successful attack of that very fatal disease, if taken in season. Don't neglect early treatment. During treatment keep the patient well covered in bed and allow plenty of fresh air in the room.

ASTHMA.

In consequence of the variety of causes of Bronchial Asthma a complex remedy is more generally useful than any simple drug.

Oxidaze is a remedy consisting of several highly important ingredients, and enjoys the reputation of quickly relieving a majority of Asthmatic cases.

In Bronchial Asthma one No. 1 dark tablet each half hour may be necessary in order to give quick relief, after which one tablet each hour or even every two hours should be sufficient to produce the desired results.

BRONCHITIS.

Take one No. 1 dark tablet hourly or at shorter intervals according to the urgency of the case.

One tablet each hour is usually sufficient to relieve the cough and enable the patient to raise freely. In acute cases a tablet every half hour may be needed, while in chronic cases a tablet every two hours should prove sufficient. The patient must use his best judgement as to frequency of dosage.

ORDINARY COUP.

One No. 2 light tablet taken each half hour crushed and dissolved in a spoonful of hot milk usually gives speedy relief.

WHOOPIING COUGH.

In children: One No. 2 light tablet crushed and dissolved in a spoonful or two of hot milk every hour will generally be found sufficient to relieve and within a few days entirely break up a case of Whooping Cough. In very persistent cases double the above dose may be required. They contain no Opium or other Narcotic substances.

LARYNGITIS. Coughs and Colds.

One tablet of either No. 1 dark or No. 2 light each hour or half hour according to the urgency of the case should give the desired results.

Children under 8 years of age one-half the adult dose.

TAKE NOTICE.

In any of the above cases where the mouth or throat are too sensitive to bear the pungent taste of a **whole Tablet**, break it into two or three pieces and take it in fragments at much shorter intervals, either with or without hot milk. Never use water in taking **Oxidaze Tablets**. These tablets to be dissolved in the mouth or chewed and swallowed.

Oxidaze Tablets are on sale at your druggists.—If not found there, they can be obtained at the office of this company.
Large Package, 200 Tablets, \$3.00; Small Package, 100 Tablets, \$1.50; Trial Package, 20 Tablets, 35 cents.
