

1. The first part of the document is a list of names and titles, including the names of the authors and the titles of their respective works. This list is organized in a structured manner, with each entry consisting of a name followed by a title and a brief description or reference.

2. The second part of the document is a detailed list of references or citations. Each entry in this list includes the author's name, the title of the work, and the publication details, such as the journal name, volume, and page numbers. This section is crucial for providing context and credibility to the information presented in the document.

3. The third part of the document is a list of symbols and icons. These symbols are arranged in a vertical column and include various geometric shapes, such as circles, squares, and triangles, as well as more complex symbols like a cross and a star. These symbols are likely used as a key or legend for the information presented in the document.

4. The fourth part of the document is a list of numbers and mathematical symbols. This list includes various numerical values, such as integers, fractions, and decimals, as well as mathematical symbols like the plus sign, minus sign, and multiplication sign. This section is likely used to provide a key or legend for the mathematical information presented in the document.

5. The fifth part of the document is a list of letters and characters. This list includes various letters, such as uppercase and lowercase letters, and special characters. This section is likely used to provide a key or legend for the text-based information presented in the document.

CONFERENCE AGENDA

A Symposium at the
National Library of Medicine

Lister Hill Auditorium

Friday
December 6, 1991

Morning

- | | |
|------------|---|
| Session I | How and Why Were RMPs Established? |
| Session II | How Did RMPs Function and What Did They Accomplish? |

Afternoon

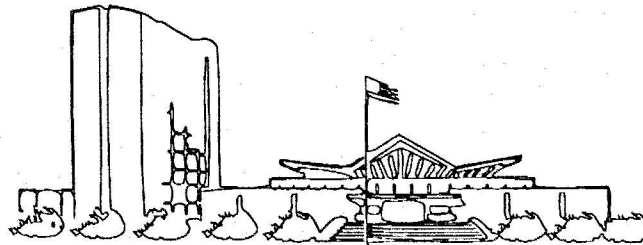

- | | |
|-------------|--|
| Session III | Why Were RMPs Terminated? |
| Session IV | What Can We Learn From the RMP Experience? |

BACKGROUND

The National Library of Medicine is organizing a conference to commemorate the twenty-fifth anniversary of the establishment of the Regional Medical Programs Division at the National Institutes of Health in December, 1966. The conference will help to record the history of this innovative program and will also provide an opportunity to apply lessons learned from the RMP experience to contemporary health care problems.

The conference will address these issues via panels of speakers and audiovisual presentations rather than through formal papers. Among those who have agreed to participate in the meeting are . . .

A conference reception, sponsored by the Friends of the National Library of Medicine, will be held in the lobby of the Lister Hill Building at 6:00 p.m. on Thursday, December 5.
