

Memo from

To: James F Crow

JOSHUA LEDERBERG

NOV 15 1976

Ed Tatum

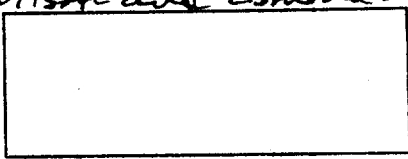

Jim - Could I ask of you the particular favor to check the University / State Library Archives \* if they have any files of <sup>& papers</sup> letters that might be helpful here.

Besides TATUM as a key word, E.B. Ford's papers just might have some letters bearing on 2 matters that still elude me:

What he worked on during  
1) ~~Anything about~~ his year at Utrecht with Kögl. (1936-37)

2) How his name came to Beadle's attention  
Fred or Peterson should have written some letters of recommendation and it would be illuminating to find them.

\* and the Bact. Dept. I wonder if there is anyone still at UCL who remembers Ed as a student. I have written to Perry Wilson and Edmund Snell.
