with Wounds that Discharge or do not Heal!

They may be swollen or surrounded with inflammation, which when pressed with the fingers leaves its impression. If so there is a poison under the skin, which if not extracted will cause the sore to grow larger and larger and soon result in death. Perhaps your knees or ankles are swollen, the joints being ulcerated, while the skin is more or less discolored at the affected parts. Do not let this continue, or you may be deprived of your power to walk. Some may have told you that your case is hopeless, or that amputation was necessary.

Drefs' Family Ointment, used in connection with Drefs' Pills, will cure such wounds and sores, when everything else has failed.

Quick results will always follow the use of these two remedies. The Pills drive the poison from the system, while the Ointment heals the wounds. Both remedies will be sent to any part of the U. S. or Canada on receipt of 40 cents for the Ointment and 65 cents for the Pills.

The skin is the largest organ of the body and is the  
first line of defense against the elements. It is  
the most sensitive and the most important part of  
the body. It is the skin that keeps the body  
warm and protects it from the sun, wind, and  
cold. It is the skin that keeps the body  
moist and prevents it from drying out. It is  
the skin that keeps the body healthy and  
beautiful. It is the skin that keeps the body  
safe and sound. It is the skin that keeps the  
body in the best of health. It is the skin that  
keeps the body in the best of health.
