1875.

# A Series of American Clinical Lectures.

---

G. P. PUTNAM'S SONS have the pleasure of announcing to the Medical profession that they have commenced the publication of a series of *Clinical Lectures* by representative American Medical Teachers, upon topics of practical interest.

It is intended to select for publication in the series only lectures by recognized Medical instructors; either Professors in Colleges, or Hospital Physicians, in the large cities of the United States. These lectures to be upon medical, surgical, and a few special topics.

They will express not only the personal views of the lecturers upon the subjects treated of, but also the latest pathological and therapeutical opinions connected with these topics, and will therefore be trustworthy guides to practice. It is expected that these lectures, presenting in compact and economical shape the most advanced thought, combined with practical instruction, will be found equally valuable by advanced medical students and by practitioners.

They will be carefully and handsomely printed in pamphlet form; each number to contain from twenty to thirty octavo pages, which will be so proportioned as to leave ample margin for binding.

The lectures will be sold separately at from 30 to 50 cents each, and subscriptions will be received for the first Six Nos. at \$2, or for the first Twelve at \$4.

The series will be under the editorial control of Dr. E. C. SEGUIN, who desires to state that he has already received the most encouraging support for the enterprise, and has arranged for early contributions from Prof. AUSTIN FLINT, Sr., Prof. LEWIS A. SAYRE, Prof. ALFRED L. LOOMIS, Prof. A. JACOBI, Prof. T. G. THOMAS, Prof. W. H. THOMSON, Prof. H. B. SANDS, Prof. W. H. DRAPER, Dr. S. WEIR MITCHELL, Prof. C. E. BUCKINGHAM, Prof. CALVIN ELLIS, etc., etc.

## No. I.—ON DISEASE OF THE HIP-JOINT.

By LEWIS A. SAYRE, M.D., Professor of Orthopedic Surgery in Bellevue Hospital Medical College, N. Y. 40 cents.

## No. II.—ACUTE RHEUMATISM IN INFANCY AND CHILDHOOD.

By A. JACOBI, M.D., Professor of Diseases of Children in the College of Physicians and Surgeons, N. Y. 40 cents.

## No. III.—PNEUMO-THORAX.

By AUSTIN FLINT, Sr., M.D., Professor of the Principles of Practice of Medicine in Bellevue Hospital Medical College. 40 cents.

## No. IV.—REST IN THE TREATMENT OF NERVOUS DISEASE.

By S. WEIR MITCHELL, M.D. 30 cents.

## No. V.—ON THE TREATMENT OF SCIATICA.

By W. H. THOMSON, M.D., Professor of Materia Medica and Therapeutics in University of N. Y. (MAY.)

## No. VI.—OTITIS.

By C. R. AGNEW, M.D., Professor of Diseases of the Eye and Ear in the College of Physicians and Surgeons, N. Y. (JUNE.)

Communications for the Editor should be addressed to Dr. E. C. SEGUIN, 17 East 21st Street, New York. Business communications to

G. P. PUTNAM'S SONS,  
Fourth Avenue and 23d St., New York.

## A CASE OF MOLLUSCUM SIMPLEX WITH ILLUSTRATIONS.

BY JOHN A. OCTERLONY, M. D.

*Professor of Materia Medica, Therapeutics and Clinical Medicine in the Louisville Medical College, and in the Kentucky School of Medicine, &c., &c.*

WRITERS on Dermatology, and observers of widest experience in this specialty, very generally agree that well-marked cases of molluscum simplex are far from common. However, it is not only on account of the rarity of the disease I am induced to publish this case, but because it presented the most exaggerated developments of molluscum simplex I have ever seen. Tilbury Fox quotes a case recorded by Prof. Ebert, of a man who had 107 tumors. In the last edition of his work on diseases of the skin, he mentioned another case which he saw at Prof. Von Hebra's clinic in Vienna. In this the whole body was covered by the tumors which were of all sizes. The wood-cut illustrating this article certainly displays a very well-marked case, but I believe in the instance here reported by me the tumors were more numerous than in either of the cases mentioned above, and were not only of all sizes, but furnished specimens of all varieties of shapes that have ever been described.

The patient, *Martha Clay*, was a negro woman, a widow, and by occupation a cook. She believed herself to be about 60 years of age, had been twice married, and had borne eleven children. Her health had been remarkably good through life, and she could not recollect having ever been seriously sick. She had known both her parents and grandparents, but all of them were entirely free from this affection. Her children have also enjoyed the same immunity except the youngest, who, at the time she first came under my observation, was 22 years of age. A year or two had passed since she had last seen him, but at that time the tumors were not so numerous on his as on her own body.

The disease first showed itself when she was about 11 years old, and the first tumor appeared on the posterior aspect of the left

shoulder, and finally became one of the largest growth on her body, there being only two exceeding it in size. From this starting point they began to spread in every direction, until, as shown in the accompanying wood-cuts, they invaded almost every region of the skin.

The tumors were never painful, and the disfigurement and inconvenience of their presence were the only causes of her complaining of them. Those growing on the hairy scalp occasionally rendered it difficult for her to comb her hair, and she would then have one or two of the largest and most inconvenient excrescences snipped off with scissors. This gave sufficient opportunity for examining their structure, which was repeatedly done.

On the back they were most numerous, next the chest and abdomen, next the scalp and face in proportion to the surface. On the lower extremities the tumors were more numerous than on the upper; the anterior surface was not so thickly covered as the posterior. The buttocks and hips were comparatively free, and so, though in a less degree, were the extremities, especially the forearms and legs. The external genitals were covered with small tumors, and one of larger size was of such form and dimensions as to look somewhat like a penis. In the wood-cut it has been placed by the artist a little too far to the left side.

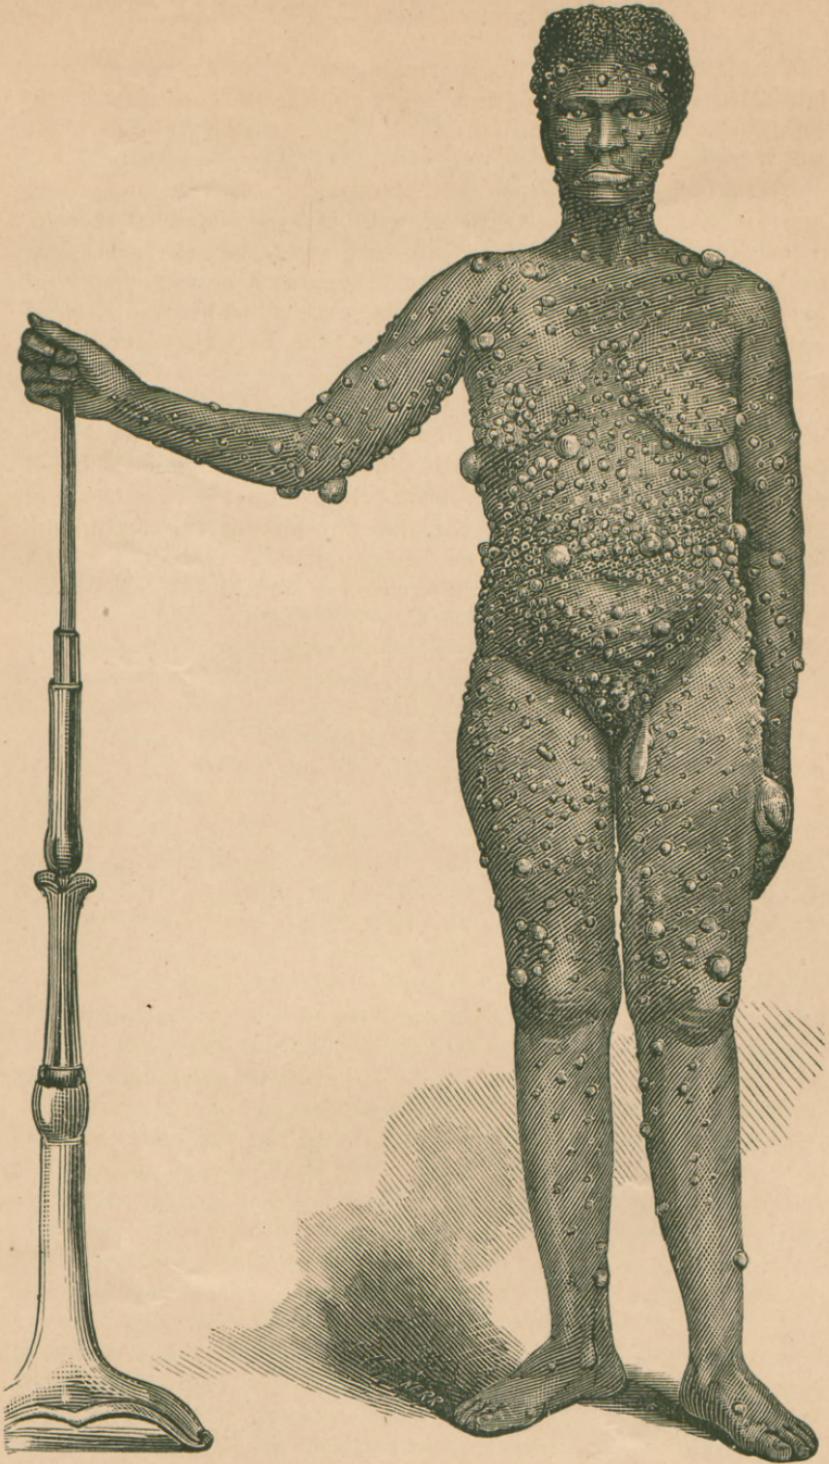

The soles of the feet were perfectly free, and so were the palms of the hands, except on the right, where a globular tumor was situated very near the wrist.

The tumors varied from the size of a mustard seed to that of a hen's egg. The greatest diversity was noted as to texture and form, hard and soft, smooth, rough and corrugated, pisiform and pyriform, pendulous and sessile, globular, ovoid and lobulated, these and other shapes were all represented.

In order to ascertain the number of tumors, the surface of the body was marked off into regions with chalk, and these again into smaller sections. The tumors situated in each were then counted, with the following results :

There were, on the face and ears, 55 tumors; on the anterior aspect of the neck, 30; on the chest, 300; on the abdomen, 348; on the anterior aspect of the right upper extremity, 51; on the anterior aspect of the left upper extremity, 35; on the anterior aspect of the right lower extremity, 118; on the anterior aspect of the left lower extremity, 104; on the scalp 47; on the posterior aspect of the neck, 30; on the posterior aspect of the right upper extremity, 22; on the posterior aspect of the left upper extremity, 20; on the posterior aspect of the right lower extremity, 62; on the posterior aspect of the left lower extremity, 52; on the back, 1059. The total number of tumors counted was 2,333, but this falls short of the reality, as many of the smallest were covered by the larger ones

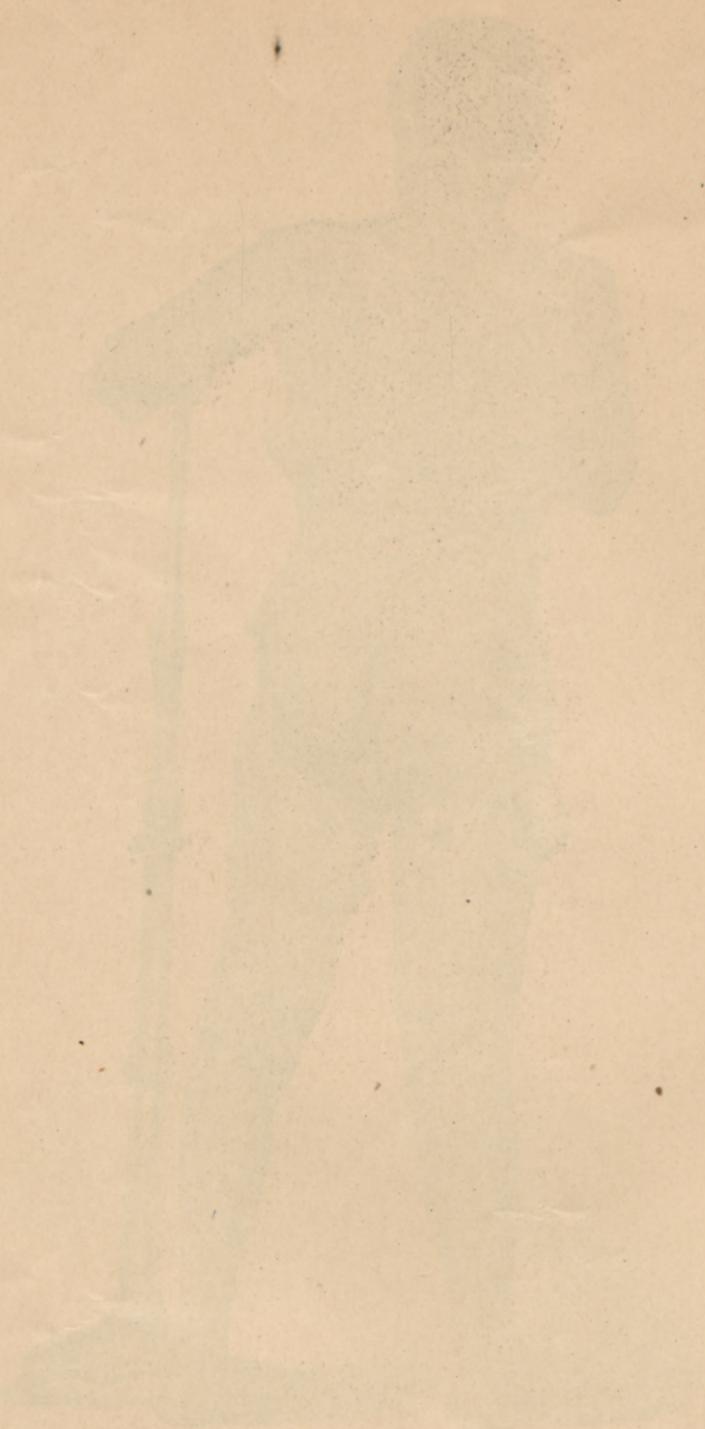

and not included. The accompanying wood-cut, though a quite faithful copy of the photograph, taken during life, does not, at first sight, convey an adequate impression of the excessively large number of these tumors.

*Microscopic examination* showed that the tumors were composed, in great part, of connective tissue, with masses of nucleated cells collected between the meshes. In some specimens the sebaceous glands were enlarged and their sacculi separated, so as to present a racemose appearance. In others, these glands had become so compressed by the growth of connective tissue, that they were atrophied and destroyed.

The patient remained under observation for several years, during which time she was exhibited to numerous classes of medical students. Shortly before Christmas, and while intoxicated, she fell down the stairs and broke her back. Being unable to move, and alone in the house, she lay in the hall throughout the night, and, when found in the morning, she had perished from cold. At the time of her death she was about 64 years of age.

# MEDICAL WORKS

PUBLISHED AND IMPORTED BY

G. P. PUTNAM'S SONS.

**A** **AMERICAN CLINICAL LECTURES**—THE SERIES OF. Edited by E. C. SEGUIN, M.D. Published in Monthly numbers at 30 to 50 cents each. The Series delivered by mail paid, for 6 months at \$2; for 12 months at \$4. Contributions received or arranged for, from Professors Lewis A. Sayre, A. Jacobi, A. Flint, Sr., W. H. Thomson, S. W. Mitchell, C. R. Agnew, H. B. Sands, A. L. Loomis, T. G. Thomas, W. H. Draper, Calvin Ellis, C. E. Buckingham, &c., &c.

**A** **ARCHIVES OF DERMATOLOGY.** A Quarterly Journal of Skin and Venereal Diseases. L. DUNCAN BULKLEY, A.M., M.D., Editor. Price per year, in advance, \$3.00. Single Numbers, \$1.00.

**A** **ARCHIVES OF SCIENTIFIC AND PRACTICAL MEDICINE.** Edited by Dr. BROWN-SEQUARD. The series complete in six numbers, bound in one volume. 8vo, cloth extra, with plates, \$3.50. (*In press.*)

**B** **BROWN-SEQUARD.—LECTURES ON PARALYSIS OF THE LOWER EXTREMITIES.** By Dr. C. E. BROWN-SEQUARD. 8vo, cloth, \$2.50.

**B** **BROWN-SEQUARD.—LECTURES ON FUNCTIONAL NERVOUS AFFECTIONS.** By Dr. C. E. BROWN-SEQUARD. Part I. Sewed, 8vo, \$1.25.

**B** **BROWN-SEQUARD.—JOURNAL DE LA PHYSIOLOGIE DE L'HOMME ET DES ANIMAUX—** Publié sous la direction du Dr. BROWN-SEQUARD. January, 1858—December, 1864. Six large volumes 8vo, with fifty-six Plates and several hundred figures in the text. Bound in muslin. Price per set, \$36.

**B** **BUHL.—INFLAMMATION OF THE LUNGS, TUBERCULOSIS AND CONSUMPTION.** By Professor LUDWIG BUHL, of Munich. Translated by Drs. M. D. MANN and S. B. ST. JOHN. 8vo, cloth, \$1.75.

**B** **BULKLEY.—THE MANAGEMENT OF ECZEMA,** By L. DUNCAN BULKLEY, M.D. 8vo, boards, 50 cents.

**E** **ASSIE.—SANITARY ARRANGEMENTS FOR DWELLINGS.** Intended for the use of Officers of Health, Architects, Builders, and Householders. By WILLIAM EASSIE. 8vo, with numerous plates, cloth extra, \$2.25.

**F** **IEBER.—THE TREATMENT OF NERVOUS DISEASES WITH ELECTRICITY.** By D. FRIEDRICH FIEBER, Professor in the University of Vienna. Translated by Dr. Geo. M. SCHWEIG. 16mo, cloth, 75c.

**F** **OTHERGILL.—THE MAINTENANCE OF HEALTH.** A Medical Work for lay Readers. By J. MILLNER FOTHERGILL, M.D. 8vo, cloth, \$5.00. American Edition, 8vo, cloth, \$2.00.

**J** **JACOBI.—INFANT DIET.** By A. JACOBI, M.D., Clinical Professor of Diseases of Children, College of Physicians and Surgeons, New York. Revised, enlarged, and adapted for popular use, by MARY PUTNAM JACOBI, M.D. 12mo, cloth, 75c.

**J** **OHNSON.—LECTURES ON BRIGHT'S DISEASE.** With special reference to PATHOLOGY, DIAGNOSIS and TREATMENT. By GEORGE JOHNSON, M.D., F.R.S. 8vo, illustrated, cloth, \$2.25.

**K** **KNIGHT.—ORTHOPEDIA AND ITS TREATMENT.** By Dr. JAMES KNIGHT, Medical Superintendent, Hospital for the Ruptured and Crippled, New York. 8vo, cloth, fully illustrated, \$4.00.

**M** **EDICAL REGISTER (THE) OF NEW YORK, NEW JERSEY AND CONNECTICUT.** Published under the supervision of the New York Medico-Historical Society. Vol. 13, for 1875-6. Edited by A. E. M. PURDY, M.D. 12mo, cloth, \$2.50.

**M** **EDICAL SOCIETY OF THE STATE OF NEW YORK; TRANSACTIONS for 1875.** 8vo, cloth, \$1.70; or by mail paid, \$2.10.

**M** **URCHISON.—THE FUNCTIONAL DERANGEMENTS OF THE LIVER.** By GEORGE MURCHISON, M.D., LL.D., F.R.S. 8vo, illustrated, \$1.75.

**M** **URRAY.—OBSERVATIONS ON THE PATHOLOGY AND TREATMENT OF CHOLERA.** The result of Forty Years' experience. By JOHN MURRAY, M.D., Inspector-General of Hospitals, late of Bengal. 12mo, cloth, \$1.00.

**N** **AYLOR.—A PRACTICAL AND THEORETICAL TREATISE ON DISEASES OF THE SKIN.** 2d Edition. Revised and enlarged. 8vo, cloth, \$5.00.

**S** **EGUIN.—A MANUAL OF THERMOMETRY.** By E. SEGUIN, M.D. 12mo, cloth, 75c.

**S** **SMITH.—COMMENTARY ON THE BRITISH PHARMACOPŒIA.** By WALTER G. SMITH, M.D., of the Queen's College of Physicians, Dublin. 8vo, cloth, \$5.00.

**S** **STONE.—AN EPITOME OF THERAPEUTICS.** Being a comprehensive Résumé of the Treatment of Disease, as recommended by the leading British, American and Continental Physicians. By W. DOMETT STONE, Ph. D., F.R.C.S., Etc. 8vo, cloth, \$4.00.

## THE NEW ENGLISH PERIODICALS.

**T** **HE LONDON MEDICAL RECORD.** Review of the Progress of Medicine, Surgery, Obstetrics, and the Allied Sciences. Published weekly. Printed in 4to. Price per number, 20c.; per year, \$7.00. Back numbers supplied, and subscriptions received.

**T** **HE LONDON SANITARY RECORD.** A Journal of Public Health. Published weekly, in 4to. Price per number, 20c.; per year, \$7.00.

G. P. PUTNAM'S SONS,

Fourth Avenue and 23d Street, N. Y.

# Archives of Dermatology.

L. DUNCAN BULKLEY, A. M., M. D., EDITOR.

This Journal is designed for the general practitioner as well as the specialist, and will contain such practical material as will make it a useful guide for the diagnosis and treatment of cutaneous and venereal disease.

While the "*Archives*" is American in origin, and is intended to represent American Dermatology fairly, every effort will be put forth to make its scope cosmopolitan, both by securing original contributions from foreign dermatologists and syphilographers, and by devoting nearly or about one-half of each issue to the Digest of current literature, which is designed to embrace everything of value bearing on the subject.

Its pages will contain :

- |  |   |
|--|---|
| I. Original Articles.<br>Transactions of the New York Dermatological Society, including papers, cases and discussions. | IV. Extracts and Translations.          |
| III. Clinical Reports.   | V. Digest of Dermatological Literature. |
|  | VI. Reviews and Book Notices.           |
|  | VII. Correspondence and Miscellanies.   |

The following gentlemen have kindly consented to be COLLABORATORS, and have undertaken the Digest and Review Department: Drs. T. E. Satterthwaite, E. B. Bronson, F. P. Foster, F. D. Weisse, G. H. Fox, H. G. Piffard and G. M. Beard, of New York; Drs. L. A. Duhring and A. Van Harlingen, of Philadelphia; and Drs. E. Wigglesworth, Jr., and James C. White, of Boston, among whom Dermatology has been divided, and Drs. F. J. Bumstead, R. W. Taylor, F. R. Sturgis, E. L. Keyes, C. S. Bull, G. M. Lefferts and R. F. Weir, who have charge of the branches embraced under Syphilis and Venereal Diseases.

The Journal will be issued quarterly, and will consist of ninety-six octavo pages, well printed on heavy paper, with suitable illustrations as required, special attention being given to Photographic work and Microscopy. It is believed that the Transactions of the New York Dermatological Society will prove an especially valuable feature.

Contributions of papers, rare cases, methods of treatment, items, etc., are solicited from those interested in the subjects represented. Manuscripts, books for review and exchanges should be addressed to Dr. BULKLEY, care of publishers.

Subscription, \$3.00 a Year in advance. Single Numbers, \$1.00.
