R U L E S

TO BE OBSERVED IN THE

USE OF THE BOOKS,

BELONGING TO

The Pennsylvania Hospital.

I. **T**HE Librarian shall attend on every Fourth and Seventh-day morning, from nine till eleven o'clock, to receive and lend out books.

II. Books shall be lent to no person, but the Managers and Physicians of the Hospital, the Pupils of those Physicians, and such Students of medicine who pay for the privilege, and have a certificate from the fitting Managers with their permission to attend.

III. The Librarian shall keep a catalogue, in the library, of all books which now belong to the same, or may be added hereafter; he shall also label and number them, and replace them on the shelves as they are brought in, first examining if they are free from damage.

IV.

IV. If damaged the borrower shall have them immediately replaced, or pay for the injury done, which if he neglects to do he shall have no more use of the books.

V. A Folio may be lent out for four weeks, a Quarto for three weeks, Octavos and Duodecimos for two weeks and no longer, unless the note is renewed.

VI. A deposit shall be left for every book lent, of at least one-third more than the value, which the Librarian is to estimate, and the borrower shall give a promissory note, in which he shall specify the deposit, and engage to return the book, undefaced, within a limited time; at the expiration of which he may renew his note, and take it again if no other person applies for the book; but if another person should apply for the same book, the new applicant shall have the preference.

VII. When a deposit is returned, a receipt shall be given for it on the back of the note.

VIII. No person shall have more than two books out at one time.

IX. Any person taking a book from the library, without giving a note, shall return it, and not be allowed to take any more.

X. One shilling per week shall be paid as a fine on every book which is kept beyond the time specified in the note, and if the borrower doth not return it in three months from the date of his note, it shall be deemed to be lost, in which case the deposit shall be forfeited; moreover the value of the book shall be paid without delay, or another shall be replaced in its room to the satisfaction of the sitting Managers and Physicians, in default of which the borrower shall forever forfeit his right in the use of the books.

XI. If the borrower of a single book not belonging to a set, should lose it, he shall forfeit his deposit; and if the borrower of one or more books belonging to a set

set or sets, should lose either of them, he shall take all the remaining volumes of the set so broken and pay the full value thereof, besides forfeiting his deposit for the use of the library.

XII. Notes given are not to be returned, but cancelled by cutting off the signers' names.

XIII. All fines are to be appropriated to the use of the library.

XIV. The Librarian shall keep an account of the fines and forfeitures he receives, and pay the same to the order of the sitting Managers.

XV. In all cases where doubts arise respecting a violation of the foregoing rules, the case shall be submitted to the sitting Managers and Physicians, whose determination shall be conclusive; but no such Manager or Physician shall be allowed to judge in his own case.

XVI. The following books are not to be lent out of the house, but any person having a right to the use of the library, may have access to them, under the Librarian's inspection, at the hours appointed for him to attend:

Albinus's tables;
Smellie's plates;
Hunter's gravid uterus;
Monro's nervous system;
Monro on fishes;
Motherby's medical dictionary.

F O L I O.

- 1 **T**ABLES of the skeleton and muscles of the human body. By Bernard Siegfried Albinus. Translated from the Latin. London, 1749.
- 2 Monro on the structure and functions of the nervous system; illustrated with tables. Edinburgh, 1783.
- 3 Monro on the structure and physiology of fishes, explained and compared with those of man and other animals; illustrated with figures. Edinburgh, 1785.
- 4 Bernardi Siegfried Albini explicatio tabularum anatomicarum Bartholomæi Eustachii. Leidæ Batavorum, 1744. *The gift of Doctor John Redman.*

- 5 Aretæi Cappadocis de Causis et Signis Acutorum et Diurnorum Morborum Libri Quatuor. Lugduni Batavorum, 1735
The gift of Deborah Morris.
- 6 Frederici Hoffmanni opera omnia, in sex tomos distributa. Genevæ, 1748. *The gift of Deborah Morris.* Cum supplemento in duas partes distributo. 1749.
- 7 Historia plantarum. Auctore Johanne Raio. 2 vols. Londini, 1686.
- 8 Observationum medicarum, rararum, novarum, admirabilium & monstrosarum Volumen, Tomis Septem de toto Homine institutum. Francofurti, 1609. *The gift of Deborah Morris.*
- 9 Petri Foresti opera omnia. Francofurti, 1634. *The gift of Deborah Morris.*
- 10 A new medical dictionary; or general repository of physic. By G. Motherby, M. D. Second edition. London, 1785.
- 11 The anatomy of the human gravid uterus; exhibited in figures. By William Hunter. Birmingham, 1774.
- 12 A set of anatomical tables; with explanations, and an abridgment of the practice of midwifery. By William Smellie, M. D. Second edition. London, 1761.
- 13 A description of all the bursæ mucosæ of the human body; with tables. By Alexander Monro, M. D. Edinburgh, 1788.

Q U A R T O.

- 1 THE seats and causes of diseases investigated by anatomy. Translated from the Latin of John Baptist Morgagni, by Benjamin Alexander, M. D. 3 vols. London, 1769.
- 2 } A methodical synopsis of mineral waters. By John Rutty,
& } M. D. London, 1757.
3 }
- 4 A new and general system of physic, in theory and practice. By William Smith, M. D. London, 1749.
- 5 An experimental history of the materia medica, or of the natural and artificial substances made use of in medicine. By William Lewis, M. B. F. R. S. London, 1761.
- 6 A dictionary of chemistry. Translated from the French; with plates, notes and additions by the translator. 2 vols. London, 1771.
- 7 Philosophical commerce of arts. By W. Lewis, M. B. and F. R. S. London, 1765.
- 8 The medical works of Richard Mead, M. D. London, 1762.
- 9 Elements of chemistry; being the annual lectures of Herman Boerhaave, M. D. Translated by Timothy Dallowe, M. D. 2 vols. in one. London, 1735.
- 10 The chemical works of Caspar Neuman, M. D. with large additions by William Lewis, M. B. London, 1759.
- 11 B. S. Albin Academicarum Annotationum libri septem. 2 vols. Leidæ. Apud J. & H. Verbeek. Bibliopolas, 1654.
- 12 The works of Robert Whytt, M. D. Published by his son, Edinburgh, 1768.
- 13 Alberti v Haller opera minora emendata, aucta, et renovata. 3 vols. Laufannæ, 1763.
- 14 Elementa physiologiæ corporis humani. Auctore Alberto v Haller. 8 vols. Laufannæ, 1757.
- 15 Jo. Baptistæ Morgagni P. P. P. P. de sedibus, et causis morborum per anatomen indagatis, libri quinque. 4 vols. Neapoli, 1762.
- 16 Gerardi van Swieten, M. D. commentaria in Hermanni Boerhaavii aphorismos de cognoscendis et curandis morbis. 5 vols. Lugduni Batavorum, 1742.

- 17 The works of Alexander Monro, M. D. Published by his son, with the life of the author. Edinburgh, 1781.
- 18 A methodical introduction to the theory and practice of physic. By David Macbride, M. D. London, 1772.
- 19 The history and present state of electricity; with original experiments. By Joseph Priestley, L. L. D. F. R. S. Fourth edition. London, 1775.
- 20 Transactions of the Royal Society of Edinburgh. Edinburgh, 1788.
- 21 Observations on the diseases of the army. By John Pringle. Fifth edition, corrected. London, 1765.
- 22 Lectures on the materia medica, as delivered by William Cullen, M. D. America, 1775.
- 23 A treatise of the materia medica. By William Cullen, M. D. 2 vols. Edinburgh, 1789.
- 24 The anatomy of the absorbing vessels of the human body. By William Cruikshank. London, 1786.
- 25 Medical commentaries. By William Hunter, M. D. Part first. Second edition. London, 1777.
- 26 Two introductory lectures, delivered by William Hunter; to which are added, some papers relating to Doctor Hunter's intended plan for establishing a museum in London, for the improvement of anatomy, surgery & physic. London, 1784.
- 27 A treatise on the venereal disease. By John Hunter. London, 1786.
- 28 The natural history of the human teeth; explaining their structure, use, formation, growth, and diseases; with copper-plates. By John Hunter, F. R. S. London, 1771.
- 29 History of the origin of medicine; an oration delivered at the anniversary meeting of the Medical Society of London, January 19, 1778; to which are since added, various historical illustrations. By John Coakley Lettsom, M. D. London, 1778.
- 30 The history and present state of discoveries relating to vision, light and colours. By Joseph Priestley, L. L. D. F. R. S. London, 1772.
- 31 A general system of surgery. Translated from the Latin of Dr. Laurence Heister. London, 1743.
- 32 Gerardi B Van Swieten commentaria in Hermannii Boerhaavii aphorismos. Vols. 1 and 3. Lugduni Batavorum, 1753.
The gift of Deborah Morris.

- 33 Laurentii Bellini Florentini in Academia Pisana anatomes professoris celeberrimi opera omnia. Venetiis, 1732. *The gift of Deborah Morris.*
- 34 Praxeos medicæ tomi tres, novis observationibus a Felice Platero, M. D. Editio quarta. Basilæ, 1736. *The gift of Deborah Morris.*
- 35 Opera omnia Georgii Baglivi. Lugduni, 1745. *The gift of Deborah Morris.*
- 36 The compleat herbal; or the botanical institutions of M. Tournefort. 2 vols. London, 1719 and 1730. *The gift of Lloyd Zachary's Legatees.*
- 37 Gregorii Horstii senioris opera medica. Goudæ, 1661.
- 38 Archibaldi Pitcarnii Scoti opuscula medica. Roterodami, 1714. *The gift of Deborah Morris.*
- 39 D. Hieronymi Fabricii ab Aquapendente, medicina practica. Parisiis, 1634. *The gift of Lloyd Zachary's Legatees.*
- 40 The lord Bacon's relation of the sweating sickness examined; in a reply to George Thompson. By Henry Stubbe. London, 1671. *The gift of Lloyd Zachary's Legatees.*
- 41 Cælius Aurelianus de morbis acutis et chronicis. Amstelodami, 1722. *The gift of Deborah Morris.*
- 42 Nicolai Pisonis medici Lotharingi de cognoscendis et curandis præcipue internis humani corporis morbis. Libri tres. 2 vols. Lugduni Batavorum, 1736. *The gift of Deborah Morris.*
- 43 Practicæ medicinæ liber quartus. Auctore Daniele Sennerto, M. D. Anno 1632. *The gift of Lloyd Zachary's Legatees.*
- 44 A compleat discourse of wounds. By John Brown. London, 1678.
- 45 Prosper Alpinus de præfagienda vita et morte Ægrotantium. Lugduni Batavorum, 1733. *The gift of Deborah Morris.*
- 46 Thesaurus medicinæ practicæ, studio & opera Thomæ Burnet. London, 1673. *The gift of Lloyd Zachary's Legatees.*
- 47 Johannes De Gorter de perspiratione insensibili. Lugduni Batavorum, 1736.
- 48 A new system of midwifery, in four parts; with copper-plates. By Robert Johnson, M. D. London, 1769.

- 51 Thomæ Bartholini Casp. Fil. anatomia ex Caspari Bartholini parentis institutionibus, omniumque recentiorum & propriis observationibus tertiùm ad sanguinis circulationem reformata, cum iconibus novis accuratissimis. Additur & huic postremæ editioni Thomæ Bartholini appendix de Lacteis Thoracis & Vasis Lymphaticis. Hagæ-Comitis, 1666.
- 52 Emmenologia; in qua fluxus muliebris menstrui, phænomena periodi, vitia, cum medendi methodo, ad rationes mechanicas exiguntur. Authore Joh. Friend, M. D. Editio tertia. Londini, 1720. *The gift of Lloyd Zachary's Legatees.*

- 53 Pyrotechnical discourses. London, 1705.
- 54 De Morbis acutis infantum, cui accessit liber observationes de morbis aliquot gravioribus medicas complectens. Editio tertia. Autore Gualtero Harris, M. D. Londini, 1720.
- 55 Materia medica; or a description of simple medicines generally used in physic; written by monsieur Tournefort, and translated into English. Second edition. London, 1716.
- 56 Pharmacopœia Bateana; or Bate's dispensatory. By William Salmon, M. D. Third edition. London, 1706. *The gift of Lloyd Zachary's Legatees.*
- 57 A new practice of physic. By Peter Shaw, M. D. 2 vols. London, 1726. *The gift of Lloyd Zachary's Legatees.*
- 58 A treatise of the venereal disease, originally in Latin, by John Astruc; translated into English by William Barrowby, M. B. 2 vols. London, 1737.
- 59 A new English dispensatory, in four parts. By James Alleyne, M. D. London, 1733. *The gift of Lloyd Zachary's Legatees.*
- 60 Institutions in physic; collected from the writings of the most eminent physicians. By J. Browne, M. D. London, 1714. *The gift of Deborah Morris.*
- 61 The aphorisms of Hippocrates, and the sentences of Celsus; with aphorisms upon the small pox, measles, and other distempers, not so well known to former ages. By C. J. Sprengell, M. D. London, 1708.
- 62 Eight chirurgical treatises. By Richard Wiseman. Fifth edition. 2 vols. London, 1719.
- 63 The philosophical and mathematical elements of physic. By Archibald Pitcairn, M. D. London, 1718. *The gift of Lloyd Zachary's Legatees.*
- 64 Memoirs of the Royal Academy of Surgery at Paris. Translated from the French. 2 vols. London, 1750.
- 65 A treatise on the small pox. By Theophilus Lobb, M. D. Second edition. London, 1757.
- 66 The art of surgery. By Daniel Turner, M. D. 2 vols. London, 1725. *The gift of Lloyd Zachary's Legatees.*
- 67 Phthisiologia seu exercitationes de phthisi tribus libris comprehensæ. Authore Richardo Morton, M. D. Londini, 1689. *The gift of Lloyd Zachary's Legatees.*
- 68 Emmenologia; in qua fluxus muliebris menstrui, phænomena periodi, vitia, cum medendi methodo, ad rationes mechanicas exiguntur. Authore Joh. Friend, M. D. Editio secunda. Londini, 1717. *The gift of Deborah Morris.*

- 69 Etmullerus abridged; or a compleat system of the theory and practice of physic. Translated into English. London, 1712.
- 70 Euodia; or a discourse on causes and cures. By Edward Strother, M. D. London, 1718.
- 71 A physical essay on the senses. Translated from the French of M. Le Cat. London, 1750.
- 72 A treatise of the diseases of the bones; with observations on the venereal and other distempers; and figures representing the dressings, machines and instruments. London, 1726.
- 73 Hippocrates upon air, water and situation; upon epidemical diseases; and upon prognostics, in acute cases especially; also, Thucydides's account of the plague of Athens. Second edition. London, 1752.
- 74 Pharmacopœia officinalis et extemporanea; or a compleat English dispensatory; in two parts, theoretic and practical. By John Quincy, M. D. Fourteenth edition. London, 1769.
- 75 A dissertation on the use of sea-water in the diseases of the glands; particularly the scurvy, jaundice, king's-evil, leprosy, and the glandular consumption. Translated from the Latin of Richard Russel, M. D. with a translation of Dr. Speed's commentary on sea-water; also an account of the nature, properties, and uses of all the remarkable mineral waters in Great Britain; and of the foreign mineral waters of Pyrmont, Spa, and Seltzer. Fifth edition. London, 1769.
- 76 Lexicon physico-medicum; or a new medicinal dictionary. By John Quincy, M. D. Eighth edition. London, 1767.
- 77 Observations on the air and epidemic diseases, from the year 1728 to 1737 inclusive; with a short dissertation on the Devonshire cholic. Translated from the Latin of Doctor Huxham. 2 vols. London, 1759.
- 78 Cases in surgery; with introductions, operations, and remarks; to which is added, an account of the preparation and effects of the agaric of the oak in stopping of bleedings, after some of the most capital operations. By Joseph Warner, F. R. S. Third edition. London, 1760.
- 79 Chirurgical observations and cases; with plates. By William Bromfeild. 2 vols. London, 1773.
- 80 Experimental essays on medical and philosophical subjects; with plates. By David Macbride, M. D. Second edition. London, 1767.

- 81 Elements of the theory and practice of chemistry. Translated from the French of M. Macquer. Second edition. 2 vols. London, 1764.
- 82 Experiments upon the human bile; and reflections on the biliary secretion. By James Maclurg, M. D. London, 1772.
- 83 Emmenologia. Written in Latin, by Dr. John Friend; translated into English, by Thomas Dale, M. D. Second edition. London, 1752.
- 84 General medical principles and cautions. By Theophilus Lobb, M. D. London, 1753.
- 85 The operations in surgery of Monsieur Le Dran. Translated by Mr. Gataker, surgeon; with remarks, plates of the operations, and a set of instruments, by Mr. Cheselden. Fourth edition. London, 1768.
- 86 The practice of physic, reduced to the ancient way of observations. Translated from the Latin of Geo. Baglivi, M. D. London, 1704.
- 87 Observations on the diseases of the army. By Sir John Pringle, baronet. Sixth edition. London, 1768.
- 88 Alberti v Haller, primæ linæ physiologiæ. Edinburgi, 1767.
- 89 Observations on the nature, causes, and cure of those disorders which have been commonly called nervous, hypochondriac, or hysterical. By Robert Whyte, M. D. F. R. S. Second edition. Edinburgh, 1765.
- 90 Synopsis medicinæ; or, a summary view of the whole practice of physic. With a treatise on all sorts of poisons. Fourth edition. 2 vols. London, 1761.
- 91 The chirurgical works of Percivall Pott, F. R. S. 4 vols. London, 1771. (Third vol. missing.)
- 92 Institutes of experimental chemistry; being an essay towards reducing that branch of natural philosophy, to a regular system. 2 vols. London, 1759.
- 93 The general practice of physic, extracted chiefly from the writings of the most celebrated physicians. By R. Brookes, M. D. Sixth edition. 2 vols. London, 1771.
- 94 Synopsis Nosologiæ Methodicæ in usum Studiosorum. A Gulielmo Cullen, M. D. Editio altera. Edinburgi, 1772.
- 95 First lines of the practice of physic, for the use of students, in the university of Edinburgh. By William Cullen, M. D. and P. Second edition. 2 vols. Philadelphia, 1781.

- 96 Medical transactions, published by the college of physicians in London. London, 1772.

- 281 The instruments of medicine; or the philosophical digest and practice of physic. By George Hoggart Toulmin, M. D. London, 1789.
- 282 A dissertation on suspended respiration from drowning, hanging and suffocation. By Edward Coleman, surgeon. London, 1791.
- 283 First lines of the theory and practice of philosophical chemistry. By John Berkenhout, M. D. London, 1788.
- 284 An essay on the scurvy; with some observations on fevers, &c. By Frederick Thomson, surgeon in the royal navy. London, 1790.
- 285 Essays on medical subjects; with an introduction relating to the use of hemlock and corrosive sublimate, and the application of caustic medicines in cancerous disorders. By Thomas Gataker, surgeon. London, 1764.
- 286 Principles of surgery for the use of chirurgical students. Part the first. By John Pearson, surgeon to the Lock hospital and to the public dispensary. London, 1788.
- 287 An essay on phlogiston and the constitution of acids. A new edition. By R. Kirwan, Esquire. To which are added, notes and additional remarks, by the author. London, 1789.
- 288 Medical advice to the inhabitants of warm climates. By Robert Thomas, surgeon, late of the island of Nevis. London, 1790.

- 289 Human osteogeny explained in two lectures. By Robert Nesbitt, M. D. F. R. S. London, 1736.
- 290 An essay on the Bath waters. By William Falconer of Bath, M. D. London, 1772.
- 291 A practical treatise upon dentition or the breeding of teeth in children. By Joseph Hurlock, surgeon. London, 1742.
- 292 The history of health and the art of preserving it. By James Mackenzie, M. D. Third edition. To which is added, a short account of inoculation for the small-pox. Edinburgh, 1760.
- 293 Solitude considered with respect to its influence upon the mind and the heart. Written originally in German by M. Zimmermann, aulic counsellor, &c. Translated from the French of J. B. Mercier. London, 1791.
- 294 Vol I.—1 A treatise of diluents, and an enquiry into the diseases of the fluids of the human body; with dilution practically applied to particular diseases. By Thomas Jameson, surgeon. London, 1788.
- 2 An essay on the rupture called hydrocele, explaining the anatomy of the parts affected, with objections to the incision, seton, &c. By Benjamin Humpage, surgeon, &c. London, 1788.
- 3 Observations on animal life and apparent death from accidental suspension of the function of the lungs, with remarks on the Brunonia system of medicine. By John Franks. London, 1790.
- 4 Cases of insanity, the epilepsy, hypochondriacal affection, hysteric passion and nervous disorders. By William Perfect, surgeon. Second edition. London.
- 294 Vol. II.—1 An essay on crookedness or distortions of the spine; shewing the insufficiency of the modes made use of for relief in these cases, with new methods of cure, and some hints for the prevention of these affections, &c. With plates. By Philip Jones. London, 1788.
- 2 A vindication of the opinions and facts contained in a treatise on the glandular disease of Barbadoes. By James Hendy. D. M. Member, &c. London, 1789.
- 3 Essays on the hepatitis and spasmodic affections in India, founded on observations, &c. By Thomas Gerdlestone. M. D. London, 1787.
- 4 Chemical experiments and opinions, extracted from a work published in the last century. Oxford, 1790.

- 294 Vol. III.—1 Medical reform. A plan for a medical court of judicature to correct abuses of the profession, and a medical college to instruct youth for the navy or army without national expence. In a letter to the right honorable William Pitt, chancellor, &c. London, 1788.
- 2 Observations on an extraordinary case of ruptured uterus. By Andrew Douglass, M. D. Member, &c. London, 1785.
- 3 Chemical observations on sugar. By Edward Rigby. London, 1788.
- 4 Advice to gouty persons. By Richard Kentish, M. D. of the royal college of Physicians. London, &c. London, 1791.
- 5 Experiments and observations on the crescent water at Harrowgate. By Thomas Garnett. M. D. Leeds, 1791.
- 6 Cautions concerning the poison of lead and of copper; with a method of detecting these metals in wines, cyder and various other aliments. By A. Fothergill, M. D. F. R. S. Bath, 1790.
- 294 Vol. IV.—1 Essays on fashionable diseases; the dangerous effects of hot and crowded rooms, the clothing of invalids, lady and gentlemen doctors, &c. By James M. Adair, formerly M. D. To which is added, a dramatic dialogue, by Benjamin Goosequill and Peter Paragraph. London.
- 2 An essay on pulmonary consumptions, including several remarkable instances of recovery from the most alarming stages of the disorder, by an improved method of treatment. By William May. M. D. Member of the royal college of physicians, London, &c. Plymouth. *Presented by Dr. Lettsom.*
- 3 An enquiry into the nature, causes and cure of the consumption of the lungs; with observations on a late publication on the same subject. By Michael Ryan, M. D. &c. Dublin, 1787.
- 294 Vol. V.—1 A short description of Pymont; with observations on the uses of its waters. Abridged from the German description of Pymont of Dr. Marcard. London, 1788.
- 2 The generation of animal heat investigated; an attempt to point out the elementary principles and fundamental laws of nature and apply them to explain certain operations, &c. in chemistry. By E. Peart, M. D. Gainborough, 1788.

- 3 A letter to Sir John Sinclair, Bart. concerning the virtues of the muriatic acid in the cure of putrid diseases. By Sir W. Fordyce, M. D. F. R. S. London, 1790.
- 4 Observations on, gangrenes and mortifications, accompanied with or occasioned by convulsive spasms. By Charles White, Esquire, F. R. S. Warrington, 1790.
- 5 Thoughts upon preserving the health of the poor; Addressed to the inhabitants of the town of Manchester. By the Reverend Sir William Clerke, Bart. rector of Bury, &c. London, 1790.
- 6 Bath waters, a conjectural idea of their nature and qualities, in three letters to ———. To which is added, putridity and infection, imputed to fevers. By A. W. M. D. Reg. Colleg. Med. Edin. Soc. Bath, 1788.
- 7 Utility of electricity illustrated in a series of cases, tending to prove the superiority of vibrations to every other mode of applying the electric fluid. By Francis Lowndes, medical electrician, &c. London, 1791.
- 8 An essay on the preservation of the health of persons employed in agriculture. By William Falconer, M. D. &c. Bath, 1789.
- 294 Vol. VI.—1 An essay on the bite of a mad dog; with observations on John Hunter's treatment of Malter R———; also, two cases successfully treated. By Jesse Foot, surgeon. London, 1788.
- 2 A treatise on the disease commonly called angina pectoris. By William Butter, M. D. London, 1791.
- 3 Observations on the plague. By William Henderson, M. D. London, 1789.
- 4 Essay on the fracture of the patella or knee-pan, containing a new and efficacious method of treating that accident; with observations on the fracture of the olecranon. By John Sheldon, F. R. S. London, 1789.
- 5 Treatise on cancers. By Henry Fearon. London, 1785.
- 6 Of the hydrocele. A case of Hernia vesic. urinar. &c. By T. Keate, surgeon. London, 1788.
- 294 Vol. VII.—1 A treatise on diluents and the operation of fluids upon the human body, wherein mineral and common waters are considered. By Thomas Jameson, surgeon. London, 1788.

- 2 Primary particles of bodies enquired into, and found to be earth, water, air, fire and frost. By John Gibson, M. D. London, 1772.
- 3 Observations upon the new opinions of John Hunter, in his late treatise on the venereal disease, ending with the subject of gonorrhœa, &c. to be continued. By Jesse Foot, surgeon. London, 1786.
- 4 Essay on the vitality of the blood. By James Corrie, M. D. London, 1791.
- 5 A treatise on the diagnosis and prognosis of diseases; part the first. With an account of internal phlegmonous inflammation. By Philip Parry Price. London, 1791.
- 294 Vol. VIII.—1 The causes of the great number of deaths among children and adults, in putrid scarlet fevers, &c. explained. By William Rowley, M. D. London.
- 2 A singular case of the re-production of the sphincter ani and three other cases annexed; with remedies, &c. By Richard Griffith. London, 1792.
- 3 A method of constructing vapor-baths at a small expense; with a design of a hot vapor-bath. By James Playfair, architect. London, 1793.
- 4 Practical dissertations on nervous complaints and other diseases, &c. By Mr. Neale. London, 1788.
- 5 Observations on the different methods of radically curing the hydrocele, and of cutting for the stone. By William Dease, surgeon. Dublin, 1782.
- 294 Vol. IX.—1 On the properties of matter, the principles of chemistry, and the nature and construction of æriform fluids or gases. By E. Peart, M. D. Gainsborough, 1792.
- 2 Observations on animal life and apparent death, from suspension of the function of the lungs; with remarks on the Brunonian system of medicine. By John Franks. London, 1790.
- 3 An appendix to a treatise on the hydrocele, containing additional proofs of the efficacy of injection for the cure of that disease. By James Earle, Esquire, and surgeon. London, 1793.
- 4 Practical observations on the operation for the stone. By James Earle, Esquire, and surgeon. London, 1793.
- 5 Darwin's

- 5 Darwin's experiments, establishing a criterion between mucaginous and purulent matter, and an account of the retrograde motions of the absorbent vessels. Litchfield, 1780.
- 294 Vol. X.—1 Account of the gaol fever, as it appeared at Carlisle in 1781. By John Heysham, M. D. London, 1782.
- 2 A critical enquiry into the treatment of the diseases of the urethra; with an improved method of cure. By Jesse Foot. London.
- 3 Medical reports of the effects of tobacco, in the cure of dropsies and dysuries. By Thomas Fowler, M. D. Second edition. London, 1788.
- 4 Experimental inquiry into the properties of opium, and its effects on living subjects, which gained the Harveian prize. By John Leigh, M. D. Edinburgh, 1786.
- 5 Chirurgical essays on the cure of ruptures, and the bad consequences of referring patients to truss-makers. By T. Brand, surgeon. Second edition. London, 1785.
- 294 Vol. XI.—1 An essay on the evil consequences attending injudicious bleeding in pregnancy, with a reply to the monthly reviewers. By George Wallis, M. D. Second edition. London, 1781.
- 2 A treatise on the regular, irregular, atonic and flying gout, with the excellent effects of the muriatic acid in that disorder. By William Rowley, M. D. London, 1792.
- 3 An enquiry into the remote cause of urinary gravel. By Alexander Philip Wilson, M. D. Edinburgh, 1792.
- 4 Observations on the nature and method of cure of the phthisis pulmonalis, from the materials of the late William White, M. D. F. A. S. Now published by A. Hunter, M. D. York, 1792.
- 294 Vol. XII.—1 Practical observations on cancerous complaints on similar diseases, and on certain operations in cancerous cases. By John Pearson. London, 1793.
- 2 Practical essays on the management of pregnancy and labor, and on the diseases of lying-in women. By John Clarke, M. D. London, 1793.
- 294 Vol. XIII.—1 Treatise upon the herb tobacco, pointing out its deleterious, pernicious quality. By a gentleman of the University of Cambridge. London.

- 2 A letter to Erasmus Darwin, M. D. on a new method of treating pulmonary consumption, and some other diseases hitherto found incurable. By Thomas Beddoes, M. D. Bristol.
- 3 An essay for a nosological and comparative view of the cynanche maligna, scarlatina anginosa. Second edition; with a supplement, containing an account of the febris aphthosa. By William L. Perkins, M. D. London, 1790.
- 4 Observations on cold bathing. By William Simpson. Leeds.
- 5 A treatise on the real cause and cure of insanity, in which the nature and distinctions of this disease are fully explained. By Andrew Harper. London, 1789.
- 294 Vol. XIV.—1 A plan for preventing the fatal effects from the bite of a mad dog; with cases. By Jesse Foot, surgeon. London, 1793.
- 2 A letter addressed to Dr. Priestley, Messrs. Cavendish, Kirwan, Lavoisier, &c. endeavoring to prove, that their newly adopted opinions are fallacious. By Robert Harrington, M. D. London, 1788.
- 3 The œconomy of health, or a medical essay containing new and familiar instructions for the attainment of health, happiness, and longevity. By Andrew Harper, late Surgeon, &c.
- 4 Practical observations on cancerous complaints, similar diseases and operations in cancerous cases. By John Pearson, surgeon of the Lock hospital, &c. London, 1793.
- 5 An essay on the erysipelatous sore throat; to which is subjoined an account of a case of hemiplegia. By Thomas Reeve, surgeon. Bury St. Edmunds, 1789.
- 294 Vol. XV.—1 An inaugural dissertation, containing an inquiry into the existence of the living principle and causes of animal life. By Matthias E. Sawyer. Philadelphia, 1793. *Presented by the author.*
- 2 An essay on the true nature and due method of treating the gout. Written for the use of Richard Tennison. By George Cheyne, M. D. London, 1753.
- 3 Thoughts on the effects of the application and abstraction of stimuli on the human body; with a view to explain the nature and cure of Typhus. By James Wood, M. D. London, 1793.

- 4 Surgical and physiological essays. By John Abernethy, professor of anatomy, &c. London, 1793.
- 5 Weldon's different modes of puncturing the bladder.
- 6 An inquiry into the nature and causes of sickness in ships of war; showing the error of its being chiefly ascribed to maritime diet, &c. With a review of Sir John Pringle's discourse on preserving the health of mariners. By William Renwick, surgeon. London, 1792.
- 294 Vol. XVI.—1 Observations concerning the history and cure of the plague. By William Henderson, M. D. London, 1789.
- 2 Considerations on bilious diseases and some particular affections of the liver and gall bladder. Second edition. By John Andree, M. D. London, 1790.
- 3 The œconomy of health, how to attain to long life, &c. By A. Harper, late surgeon.
- 4 An historical investigation into the first appearance of the venereal disease in Europe, with remarks on its particular nature. By M. Sanchez, doctor of the faculty of medicine of Paris. Translated from the French by Joseph Skinner, surgeon. London, 1790.
- 5 Observations on the different methods of treating the venereal disease. By William Dease, surgeon, &c. Dublin, 1779.
- 6 A commentary on the dysentery; translated from Dr. Akenfide. By John Ryan M. D. London, 1767.
- 294 Vol. XVII.—1 An inaugural dissertation on the chemical properties of atmospheric air. By William R. Cozens, of New Jersey. Philadelphia, 1791. *Presented by the author.*
- 2 Tentamen medicum inaugurale, quædam de asphyxia ab aeris dephlogificati, privatione oriunda, tradens. Gulielmus Stokes, A. B. Virginienfis. Philadelphix, 1793. *Presented by the author.*
- 3 An inaugural dissertation; being an attempt to disprove the doctrine of the putrifaction of the blood of living animals. By Adam Seybert of Philadelphia. Philadelphia, 1793. *Presented by the author.*
- 4 An inaugural physiological dissertation on the catamenia; to which are subjoined observations on amenorrhœa. By James Westwood Wallace of Virginia. Philadelphia, 1793. *Presented by the author.*

- 5 An inaugural dissertation on the scarlet fever attended with an ulcerated fore throat. By Matthias Williamson of New Jersey. Philadelphia, 1793. *Presented by the author.*
- 294 Vol. XVIII.—1 The importance and method of cultivating and curing rhubarb in Britain for medical uses; with an appendix. By Sir William Fordyce, M. D. F. R. S. London 1792.
- 2 A treatise on the medical properties of mercury. By John Howard, surgeon. London, 1782.
- 3 The annual report of the royal humane society for the anniversary festival, 1793. By W. Hawes, M. D. register.
- 4 A dissertation on the properties and efficacy of the Lisbon diet drink in the cure of the venereal disease, the scurvy, &c. By John Leake, M. D. The fourth edition. London.
- 294 Vol. XIX.—1 Doctor Zimmermann's conversations with the late king of Prussia, when he attended him in his last illness. Translated from the last edition. London, 1791.
- 2 Philosophical observations on the senses of vision and hearing and on harmonic sounds; also, an essay on combustion and animal heat. By J. Elliot. London, 1780.
- 3 Experiments and observations on a new species of bark, shewing its great efficacy in very small doses, &c. By Richard Kentish, D. M. &c. London, 1784.
- 295 A treatise on the venereal disease. By John Hunter. Philadelphia, 1791.
- 296 A compendious system of anatomy, extracted from the American edition of the Encyclopædia. Philadelphia, 1792.
- 297 An historical account of the climates and diseases of the United States of America, and of the remedies and methods of treatment, &c. By William Currie, fellow of the college of physicians of Philadelphia. Philadelphia, 1792.
- 298 *Disto.* *The gift of the author.*
- 299 Medical inquiries and observations. By Benjamin Rush, M. D. Professor of chemistry in the university of Pennsylvania. 2 vols. Philadelphia, 1789 and 1793.
- 300 The art of preventing diseases and restoring health. By George Wallis, M. D. &c. London, 1793.

- 301 Observations on the nature and cure of calculus, sea scurvy, consumption, catarrh and fever. By Thomas Beddoes, M. D. London, 1793.
- 302 A view of the diseases of the army, in Great Britain, America and the West Indies, from the beginning of the late war to the present time. By Thomas D. Reide, surgeon to the first battalion of the first regiment of foot. London, 1793.
- 303 Observations on the diseases which prevail in long voyages to hot countries, particularly to the Indies; and as they appear in Great Britain. By John Clark, M. D. &c. 2 vols. Second edition. London, 1792.
- 304 Transactions of a society for the improvement of medical and chirurgical knowledge. With plates. London, 1793.
- 305 A treatise on gonorrhœa virulenta and lues venerea. By Benjamin Bell. 2 vols. Edinburgh, 1793.
- 306 A treatise on the fevers of Jamaica, with some observations on the intermitting fever of America, and an appendix, containing some hints on the means of preserving the health of soldiers in hot climates. By Robert Jackson, M. D. London, 1791.
- 307 Institutiones physiologicæ, A. D. Jo. Frid. Blumenbachio. Prof. med. ordin. societ. &c. memb. Gottingæ, 1786.
- 308 A treatise on the fevers of Jamaica, with some observations on the intermitting fever of America, and an appendix, containing some hints on the means of preserving the health of soldiers in hot climates. By Robert Jackson, M. D. London, 1791.
- 309 Memoirs of the first forty-five years of James Lackington's life. Written by himself. London, 1792.
- 310 Commentarii de rebus in scientia naturali et medicina gestis. Lipsiæ, 1752. In 14 volumes.
- 311 A translation of Dr. Boerhaave's academical lectures on the theory of physic; with explanatory comments, &c. 6 vols. Third edition, corrected. London, 1766.
- 312 First lines of the practice of physic. By William Cullen, M. D. late professor, &c. 4 vols. With notes. By John Rotheram. Edinburgh, 1791.
- 313 A system of anatomy and physiology, with the comparative anatomy of animals, compiled from the latest and best authors. 3 vols. With copperplates, &c. Edinburgh, 1791.

- 314 The chyrurgical works of Benjamin Gooch, furgeon. 3 vols. London, 1792.
- 315 An exposition of the principles of anatomy and phyfiology, with the prælectiones anatomicæ of Ferdinand Leber. Translated by Walter Vaughan, M. D. Phyfician, &c. 2 vols. London, 1791.
- 316 A treatife on gonorrhœa virulenta and lues venerea. By Benjamin Bell. 2 vols. Edinburgh, 1793.
- 317 *Confectus Medicinæ theoreticæ ad ufum academicum* autore Jacobo Gregory, M. D. Prof. &c. 2 vols. A new edition. Edinburgh, 1790.
- 318 Duties of a regimental furgeon. By R. Hamilton, M. D. 2 vols. London.
- 319 Observations on jail, hofpital, or fhip fever, from the fourth of April, 1776, to the thirtieth of April, 1789, made in various parts of Europe and America. By Robert Robertson, M. D. Phyfician, &c. London, 1789.
- 320 Elements of natural hiftory and chemiftry. By M. Fourcroy. Translated from the laft Paris edition. 3 vols. London, 1790.
- 321 *Differtationes inaugurales.* 2 vols. Edinburgh.
- 322 Observations on the afthma and on the whooping cough. By John Millar, M. D. London, 1769; alfo, cafes in furgery, with remarks, by Charles White, F. R. S. To which is added, an effay on the ligature of arteries, by J. Aikin. London, 1770.
- 323 The art of preventing difeafes and reftoring health. By George Wallis, M. D. London, 1793.
- 324 An effay on difeafes incidental to Europeans in hot climates. By James Lind, M. D. F. R. S. &c. Fifth edition. London, 1792.
- 325 A treatife on female difeafes. By Henry Manning, M. D. Second edition. To which is added, a letter on the puerperal fever. London, 1775.
- 326 An introduction to phyfiology, being a courfe of lectures. By Malcolm Flemyng, M. D. London, 1759.
- 327 Nature and effects of emetics, purgatives, mercurials and low diet in diforders of Bengal and fimilar latitudes. By John Peter Wade, M. D. London, 1792.
- 328 A medical commentary on fixed air. By Matthew Dobfon, M. D. F. R. S. Third edition. With Dr. Falconer on fixed alkaline falts, &c. in cafes of gravel. London, 1787.

- 329 *Essays on the practice of midwifery in natural and difficult labors.* By William Osborn, M. D. London, 1792.
- 330 *Formulae medicamentorum selectæ.* By Edward Fox. London, 1777.
- 331 *A treatise on tropical diseases, military operations, and on the climate of the West Indies.* By Benjamin Moseley, M. D. physician to Chelsea hospital, &c. Third Edition. London, 1792.
- 332 *The London practice of physic.* Fifth edition. London, 1792.
- 333 *A view of the diseases of the army in Great Britain, America, the West Indies and on board of king's ships and transports, from the beginning of the late war to the present time.* By Thomas Dickson Reide, surgeon, &c. London, 1793.
- 334 *Transactions of a society for the improvement of medical and chirurgical knowledge.* With copper plates. London, 1793.
- 335 *A commentary on apoplectic and paralytic affections and on diseases connected with the subject.* By Thomas Kirkland, M. D. London, 1792.
- 336 *Essays on fractures and luxations.* By John Aitkin, M. D. London, 1790.
- 337 *The prognostics and prorrhetics of Hippocrates, with some account of his life.* By John Moffat, M. D. London, 1788.
- 338 *An improved method of opening the temporal artery, also a new proposal for extracting the cataract; with plates.* By the author when a student at Edinburgh. London, 1783.
- 339 *Observations on the nature and cure of calculus, sea scurvy, consumption, catarrh and fever; with conjectures on other subjects.* By T. Beddoes, M. D. London, 1793.
- 340 *A treatise on the digestion of food.* By G. Fordyce, M. D. F. R. S. Second Edition. London, 1791.
- 341 *An essay on the materia medica, in which the theories of the late doctor Cullen and others are considered.* By James Moore. London, 1792.
- 342 *Experiments on animal electricity, with their application to physiology.* By Eusebius Valli, M. D. London, 1793.
- 343 *Thoughts physiological, pathological and practical, with some cases and anatomico practical observations.* By Allen Swainston. M. D. York, 1790.

- 344 Pharmacopœia collegii regii medicorum Edinburgensis: Edinburgi, 1792.
- 345 Speculations on the mode and appearances of impregnation in the human female, with an examination of the present theories of generation. By a physician. Edinburgh, 1789.
- 346 The principles and practice of midwifery, under four heads, generation, gestation, delivery and recovery. By Edward Foster, M. D. Completed and corrected by James Sims, M. D. London, 1781.
- 347 Medical cases, selected from the records of the public dispensary at Edinburgh, with remarks and observations. By Andrew Duncan, M. D. F. R. S. &c. Edinburgh, 1790.
- 348 A treatise on putrid intestinal remitting fevers; in which the laws of the febrile state and sol-lunar influence are investigated. By Francis Balfour, M. D. Edinburgh, 1790.
- 349 Observations on diseases incidental to seamen. By Louis Rouppe, M. D. London, 1772.
- 350 An essay on the cure of abscesses by caustic and on the treatment of wounds and ulcers, and a new method of curing the lues venerea. By Peter Clare, surgeon. London, 1779.
- 351 A treatise on the asthma; to which are added, cases and observations. By Thomas Withers, M. D. London, 1786.
- 352 Remarks on the ophthalmy, psorophthalmy and purulent eye. By James Ware, surgeon. Second edition. London, 1787.
- 353 Ioannis Brunonis, M. D. Elementa medicinæ edet. plur. emendata. Edinburgi, 1784.
- 354 Experiments and observations on quilled and red Peruvian bark, to which is added, an appendix on the cinchona caribbæa. By Thomas Skeete, M. D. London, 1786.
- 355 A compendious system of the theory and practice of modern surgery, in the form of a dialogue. By Hugh Munro, surgeon. London, 1792.
- 356 Philosophical inquiry into the nature, origin and extent of animal motion. By Samuel Farr, M. D. London, 1771.
- 357 Biographical memoirs of medicine in Great Britain, from the revival of literature to the time of Harvey. By John Aikin, surgeon. London, 1780.
- 358 An inquiry into the nature, cause and cure of the gout and of some of the diseases with which it is connected. By John Gardner, M. D. Edinburgh, 1792.

- 359 Observations in midwifery and on the disorders of women and children. By William Deafe, surgeon. Dublin, 1783.
- 360 Medical histories and reflections. By John Ferriar, M. D. Warrington, 1792.
- 361 A treatise on the extraction of the cataract. By D. Augustus Gottlieb Richter. Translated from the German. London, 1791.
- 362 An essay on the scurvy; shewing effectual and practical means for its prevention at sea, &c. With some observations on fevers. By Frederick Thomson, surgeon. London, 1790.
- 363 Doctrines and practice of Hippocrates in surgery and physic; with occasional remarks. By Francis Riollay, M. B. London, 1783.
- 364 The diseases of children and their remedies. By Nicholas Rosen Von Rosentein. Translated into English, by Andrew Spaxman, M. D. London, 1776.
- 365 Outlines of the theory and practice of midwifery. By Alexander Hamilton, M. D. Third edition. London, 1791.
- 366 Laurentii Heisteri compendium medicinæ practicæ cui medicinæ mechanicæ præstantia dissertatio. Amstelædami, 1743.
- 367 The use of sea voyages in medicine and particularly in a consumption, with observations on that disease. By Ebenezer Gilchrist, M. D. London, 1771.
- 368 Prælectiones medicæ duodecim a Thoma Lawrence, M. D. Londini, 1757.
- 369 A treatise on opium, founded upon practical observation. By George Young, M. D. London, 1753.
- 370 A practical essay on diseases of the viscera, in which their nature and cure are considered. By John Leake, M. D. London, 1792.
- 371 The new medical journal, for the year 1792. Vol. I. London, 1792.
- 372 Theses variæ & medicæ Philadelphienfes; autorum donationes. 2 vols. Latine & Anglice.
- 273 A treatise on female diseases. By Henry Manning, M. D. Second edition. To which is added, a letter on the puerperal fever. London, 1775.
- 374 An inaugural dissertation on the apoplexy. By John Andrews of Pennsylvania. Philadelphia, 1793. *Presented by the author.*

- 375 Observations on the disease of the hip joint; with remarks on white swellings of the knee, the caries of the joint of the wrist and other similar complaints. With plates. By Edward Ford, F. S. A. surgeon to the Westminster dispensary. London, 1794.
- 376 An inaugural dissertation on insanity. By Edward Cutbush, M. D. Philadelphia, 1794. *Presented by the author.*
- 377 An account of the bilious remitting yellow fever, as it appeared in the city of Philadelphia in the year 1793. By Benjamin Rush, M. D. Philadelphia, 1794. *Presented by Samuel Coates.*

DUODECIMO.

- 70 Observations on the nature and treatment of the variolous abscess, with remarks on the modern practice of inoculation and a new and easy method of curing the lues venerea. By Peter Clare, surgeon. London, 1781.
- 71 The works of the late Dr. John Gregory, F. R. S. late professor in the university of Edinburgh, &c. To which is prefixed, an account of the life of the author. 4 vols. Edinburgh, 1783.
- 72—1 A dissertation on the influence of the passions upon disorders of the body. By William Falconer, M. D. F. R. S. To which the Fothergillian medal was adjudged. Second edition. London, 1791.
- 2 A treatise on the putrid and remitting fever which raged at Bengal in 1762. By James Lind, M. D. Edinburgh.
- 73 Description of a portable chest of chemistry, or complete collection of chemical tests. By I. F. A. Gottling, professor of chemistry at Jena in Saxony. Translated from the original German. London, 1791.
- 74 Observations on scrophulous affections, on scirrhus, cancer and rachitis; with remarks, by Robert Hamilton, M. D. London, 1791.
- 75 A treatise on the diseases of children; with general directions for the management of children from the birth. By Michael Underwood, M. D. 2 vols. London, 1789.
- 76 Experiments and observations to investigate, by chemical analysis, the medicinal properties of mineral waters of Spa and Aix la Chappelle in Germany, &c. By John Ash, M. D. fellow of the royal college of physicians, &c. London, 1788.

- 77 An essay on the dropfy and its different species. By Donald
Monro, M. D. Second edition. London, 1756.
- 78 The poetical works of John Armstrong, M. D. containing
the art of preserving health, &c. Perth, 1792.
- 79 The medical pocket-book, containing a short but plain account
of the symptoms, causes and method of cure of the diseases
incident to the human body, &c. By John Elliot, M. D.
Third edition. London, 1791.
- 80 An inaugural dissertation on the chemical and medical pro-
perties of the perimmon tree and the analysis of astringent
vegetables. By James Woodhouse, A. M. Philadelphia,
1792. *Presented by the author.*
- 81 Vol. I.—1 General directions for the preservation of health,
intended for the benefit of the settlers at Sierra Leone.
By John Bell, M. D. London, 1791.
—2 Short directions for the management of infants. By T.
Mantell, surgeon. London, 1787.
- 81 Vol. II.—1 Thoughts on the cancer of the breast. By G. Bell,
surgeon. Birmingham, 1788.
—2 Elements of medical jurisprudence.
—3 Account of Drs. Parfons, Huck, Colignon and Sir Alex-
ander Dick. From the medical commentaries.
—4 Observations on herniæ; with cases. By W. Wilmer,
surgeon. London, 1788.
—5 An essay on generation. By I. F. Blumenbach, M. D.
Aulic counsellor. Translated from the German. London.
- 82 Chemisches journal fuer die freunde der naturlehre, arzney-
gelahrtheit, haushaltungskunst und manufacturen. Ent-
worfen von D. Lorenz Crell. 2 bonde. Lemgo, 1778.
- 83 Observations on scrophulous affections; with remarks on
schirrus, cancer and rachitis. By R. Hamilton, M. D.
London, 1791.
- 84 A disquisition of the stone and gravel; with strictures on the
gout when combined with those disorders. By S. Perry,
surgeon. Seventh edition. London, 1785.
- 85 Discourses on a sober and temperate life. By Lewis Cornaro.
London, 1779.
- 86 Observations sur la physique sur l'histoire naturelle & sur les
arts; avec des planches en taille douce. Par M. l'Abbé
Rozier de l'academie royale des sciences, &c. 6 vols.
From 1771 to 1772. A Paris.

R U L E S

AGREED TO BY THE

MANAGERS AND PHYSICIANS

OF

The Pennsylvania Hospital,

For the Preservation of the valuable Paintings and
Castings presented by the late Doctor JOHN
FOTHERGILL, of London;

A L S O,

For the anatomical Preparations bought of the heir of the late
Doctor ABRAHAM CHOVET; and for such others as may here-
after be added to the present Collection, by Purchase,
or the Gift of Friends, to the said Hospital.

I. **A**LL the anatomical preparations which now are
in the house, and those which hereafter may
be added, shall be annexed to the Medical Library; and
the expenses of encreasing and preserving as well this
collection as the Library, shall be paid out of the Me-
dical Fund.

II. The Medical Fund, to be applied to the above
uses, shall consist of all monies received in discharge of
the fines incurred by those who detain books for a longer
period than is allowed by the rules;—for the privilege
granted to medical pupils of attending the practice of
the house;—for exhibiting the anatomical preparations,
and permission to attend the lectures given thereon,—
and for certificates sold.

III.

III. From and after the first day of the Eighth month, 1794, (until otherwise directed) a ticket for a single season, or any part of a season, shall be three pounds, and a ticket for a perpetual privilege, shall be six pounds; which shall entitle the purchaser to the use of the books, subject to the rules of the Library, to attend the practice of the Hospital, agreeably to its rules, and all the lectures on the anatomical preparations, which are given for the instruction of medical pupils, but no others, without an express invitation from the Lecturing Physician; neither shall any medical pupil have access to the anatomical rooms, unless a Manager, the Treasurer, or some one of the Hospital Physicians, in company with the Resident Apothecary, is present with him.

IV. The same privileges, under the limitations contained in the preceding rule, shall be extended to the apprentices of the Hospital Physicians, for the time being, but no longer, unless they purchase a ticket.

V. Every person, but those who are excepted in these rules, shall pay seven shillings and six-pence for every time they view the anatomical museum, and fifteen shillings for attending each lecture which may generously be given by any one of the Hospital Physicians to enlarge the Medical Fund; but all the anatomical pupils who do not attend the Hospital, shall be admitted for seven shillings and six-pence, as often, during the course, as the Anatomical Professors think necessary.

VI. No other persons but the Hospital Physicians, shall, at any time, lecture therein, unless they make a special contract with the Attending Managers and Physicians, in which case, the Managers and Treasurer, the Hospital Physicians and their pupils, the Resident Apothecaries, and the pupils of the house, shall be admitted to attend.

VII. To benefit the Hospital, and more fully to qualify the apprentices to fulfil their duty therein, such of them

them as conduct themselves in a proper manner, shall be allowed to attend, gratis, as well the lectures in the Hospital, as every other medical lecture given by the Hospital Physicians to their respective pupils, during the time of their apprenticeship to the institution, but no longer.

VIII. A general demonstration of the anatomical museum, for the benefit and instruction of the pupils who have the privilege of attending the Hospital, shall be made, at least once in every winter, by the Anatomical Professors, or some of the other Physicians of the Institution.

IX. The Managers, Treasurer, or any of the Physicians, may, at all times, invite any of the following persons to view the anatomical rooms gratis, *viz.*

The Governor and Members of the General Assembly of Pennsylvania;

The Judges of the Supreme Court;

The State Attorney;

The Contributors to the Pennsylvania Hospital of ten pounds;

The regular physicians of this or any other country.

And any or either of the Hospital Physicians may, if they think proper, give a gratuitous lecture, at any time, to any of the gentlemen mentioned in this rule; and to such lecture the medical pupils are not to be admitted, unless invited by the physicians, or some one of them.

X. No anatomical preparations shall ever be lent or taken out of the house, unless it becomes necessary to preserve them from destruction by fire.

XI. All presents to the museum shall be reported to the Managers and recorded in their minutes.

XII. A catalogue shall be presented to the College of Physicians, one to the Library Company of Philadelphia, one to the Loganian Library, and the remainder are to be
fold

fold to the Managers and Physicians, the medical pupils, and such other persons as may apply for them, at twenty-five cents each.

XIII. It shall be the duty of the Attending Physicians, or some one of them, to report to the Sitting Managers, on the Seventh day next preceding the last Second day in every month, the condition in which they find the anatomical museum.

*Extracted from the minutes of the Board of Managers,
the 27th. of the First month, 1794.*

JOSIAH HEWES, President.

SAMUEL COATES, Secretary.

DESCRIPTION

DESCRIPTION

OF THE

ANATOMICAL MUSEUM

IN

The Pennsylvania Hospital.

Imitations of the internal Parts of the Human Body, in wax, by the late Dr. Choquet.

No. I. Represents the figure of a man, completely dissected, placed in a supine position, on a table, exhibiting all the blood-vessels injected, and all the viscera in the cavities of the thorax, and abdomen in their natural situation, so contrived that each viscus may be separately examined.—Copied from a dead subject six feet in length.

No. II. Represents the body of a pregnant woman with the abdomen and uterus opened, in order to shew the true situation of the fœtus in utero with the membranes inclosing it, the placenta and the funis umbilicalis.—Copied from a subject that died before delivery, within a month of her full time.

No. III. Represents a child dissected, so as to exhibit the brain, with the nerves throughout the body, with the arteries and veins.

No. IV. Represents the female organs of generation, in their adult state.—Copied from nature.

No. V. An imitation of the bust of a man of full size, displaying the muscles of the head and face the parotid glands, salivary ducts and blood-vessels. The skull appears removed to shew the brain invested with its meninges, and, also, its intestinal convolutions when they are removed. The brain may be taken from the skull to view its inferior surface or basis.

No. VI. A full grown fœtus.

No. VII.

No VII. Represents a gravid uterus extracted from a subject, who died in labor near her full time, laid open to shew the fœtus in the position for delivery.

No. VIII. Is the accurate imitation of a new born child that expired soon after birth, with the placenta and umbilical chord injected; the abdomen laid open to demonstrate the manner in which the fœtus in utero is supported alive.

Preparations of different parts of the human subject, in spirit of wine, by the late Dr. Chovet.

No. $\left. \begin{array}{l} \text{I.} \\ \text{and} \\ \text{II.} \end{array} \right\}$ Diseased lungs.

No. III. Ditto, injected.

No. IV. Diseased liver.

No. V. Diseased lungs.

No. VI. Integuments of the cranium.

No. VII. Dura mater.

No. VIII. An injected ear with another uninjected, for comparison.

No. IX. A child's face.

No. X. Part of a child's face injected.

No. XI. A calf's nose opened to show the olfactory nerves.

No. XII. The tongue and lower jaw, &c. to exhibit the structures of the fauces.

No. XIII. A tongue injected.

No. XIV. Part of the lower jaw, to demonstrate the second set of teeth.

No. XV. An uterus with a diseased ovarium.

No. XVI. A full grown fœtus, injected by the umbilical vein.

No. $\left. \begin{array}{l} \text{XVII.} \\ \text{and} \\ \text{XVIII.} \end{array} \right\}$ Small fœtus.

No. XIX. An injected kidney.

No. XX. An uncommon kidney.

No. XXI. A diseased kidney injected and macerated.

No. XXII. Kidnies, heart, &c.

- No. XXIII. A heart opened to show the cavities.
- No. XXIV. Part of a large vein, showing the valves.
- No. XXV. Part of the artery of an ox dissected, so as to exhibit the different coats.
- No. XXVI. A portion of the cuticle.
- No. XXVII. The cutis and cuticle.
- No. XXVIII. Skin and cellular membrane separated.
- No. XXIX. A portion of skin of full thickness.
- No. XXX. Palm of a child's hand injected.
- No. XXXI. A portion of the sole of the foot.
- No. XXXII. A diseased prostate gland with the muscular coat of the bladder much thickened.
- No. XXXIII. A diseased bladder.
- No. XXXIV. Lower part of the rectum.
- No. $\left. \begin{array}{l} \text{XXXV.} \\ \text{and} \\ \text{XXXVI.} \end{array} \right\}$ Portions of the large intestines opened to show their internal surface.
- No. $\left. \begin{array}{l} \text{XXXVII.} \\ \text{and} \\ \text{XXXVIII.} \end{array} \right\}$ Parts of intestines injected.
- No. XXXIX. Ditto exhibiting the valvulae conniventes.
- No. XL. Part of an intestine injected.
- No. XLI. Part of the mesentery.
- No. XLII. Stomach of a child injected.
- No. XLIII. Bones of the fore arm of a child to exhibit the periosteum.
- No. XLIV. An arm partly dissected to show the muscles.

Dried preparations, by the late Dr. Choquet.

- No. I. An adult subject with the arteries and veins injected, and muscles preserved.
- No. II. A young subject injected.
- No. III. A child with the arteries injected and nerves dissected, for demonstration.
- No. IV. A preparation of a child exhibiting arteries injected and nerves, with some of the viscera injected.

- No. V. The skeleton of an adult.
- No. VI. Ditto of a fœtus.
- No. VII. The bones of the lower extremity, with an exostosis of the os femoris.
- No. VIII. An arm injected.
- No. IX. The bones that compose the articulation of the humerus, with the ligaments.
- No. X. Scapula to show the periosteum.
- No. XI. Spine of a child, with the nerves that proceed from it.
- No. XII. Pelvis of fœtus, with the arteries and veins injected.
- No. XIII. Trachea of a child.
- No. XIV. Female organs of generation in their natural situation in the pelvis.
- No. XV. Organs of generation of a child.
- No. XVI. Ditto girl.
- No. XVII. Uterus injected.
- No. XVIII. Organs of generation of a boy, with the kidneys and arteries injected.
- No. XIX. Penis and bladder of a man in their natural situation with respect to the pelvis.
- No. XX. A penis opened, laterally, to show the internal cavernous structure.
- No. XXI. Ditto, with sections in different places.
- No. XXII. A human bladder.
- No. XXIII. Stomach and all the intestines of a child.
- No. XXIV. Small intestines, with the mesentery injected,
- No. $\left. \begin{array}{l} \text{XXV.} \\ \text{and} \\ \text{XXVI.} \end{array} \right\} \left\{ \begin{array}{l} \text{Part of the small intestines of a child, with} \\ \text{the mesentery.} \end{array} \right.$
- No. XXVII. Part of the cæcum and colon, with a section to show the valve.
- No. XXVIII. Part of the duodenum, with its duct.
- No. XXIX. Portion of intestine exhibiting the valvulæ conniventes.
- No. XXX. Ditto of the small intestines.
- No. XXXI. Stomach and colon injected.
- No. XXXII. Stomach injected.

No. XXXIII. Diaphragm.

No. XXXIV. Diaphragm and liver.

No. XXXV. An injected Kidney.

No. XXXVI. A diseased spleen injected.

No. XXXVII. An injected kidney.

No. $\left. \begin{array}{l} \text{XXXVIII.} \\ \text{XXXIX.} \\ \text{and} \\ \text{XL.} \end{array} \right\}$ Diseased lungs injected.

No. XLI. Lungs with their blood-vessels injected.

No. XLII. The heart and lungs of a fœtus in their natural situation in the thorax.

No. XLIII. Heart of a child injected.

No. XLIV. Incomplete preparation of the heart.

No. $\left. \begin{array}{l} \text{XLV.} \\ \text{XLVI.} \\ \text{and} \\ \text{XLVII.} \end{array} \right\}$ Different preparations of the heart to show its internal cavities.

No. XLVIII. Heart moulded in wax to show the ventricles.

No. XLIX. A portion of injected artery, with accompanying vein.

No. L. An eye with all its muscles.

No. LI. An imitation of the eye.

No. LII. A preparation of the ear.

No. LIII. All the bones of the ear.

No. LIV. Transverse section of the cranium, with the muscles, arteries and nerves of the neck.

No. $\left. \begin{array}{l} \text{LV.} \\ \text{and} \\ \text{LVI.} \end{array} \right\}$ The skull divided by a longitudinal section to exhibit the dura mater and its processes.

No. LVII. Part of a skull, with the basis of the brain in wax.

No. LVIII. Skull of a man.

No. LIX. Ditto of a boy.

No. LX. Ditto of an infant.

No. LXI. Several separate bones of the cranium.

No. LXII. Articulation of the hip.

No. LXIII. A portion of injected skin.

To which have been added the following, prepared and presented by different persons:—

Part of a skeleton.

A young subject injected.

An injected heart.

Ditto, uncommonly large. *Presented by Dr. Parke.*

Castings of Gypsum, presented by the late Dr. Fothergill, of London.

No I. Represents the abdomen of a pregnant woman about nine months advanced.

No. II. Represents the same subject with the abdomen opened, to exhibit the situation of the gravid uterus, with some of the other viscera.

No. III. The same subject, with the anterior parts of the thorax, abdomen and uterus removed, to show the situation of the foetus in utero, with the umbilical chord and part of the investing membranes, and also the heart (the pericardium being removed) and part of the lungs, liver, stomach, &c.

The paintings in crayons are eighteen in number; they represent the structure of the human body internally and externally, and also the gravid uterus and foetus in utero.
