

MANUAL OF DISEASES OF THE SKIN,

BY MM. CAZENAVE AND SCHEDEL.

Translated from the French, with Notes and Additions, by T. H. Burgess, M.D. Revised and corrected, with additional Notes, by H. D. Bulkley, M.D., Physician of the New-York Hospital, &c., &c. Second American edition.

"There is no *text book* on diseases of the skin, now in the hands of the profession, which is so universally accepted as reliable authority, as that of Cazenave and Schedel."—*Ohio Med. & Surg. Journal*.

"It is a book of great value. It is the hand book used at the Hospital of St. Louis, Paris, where large numbers of patients affected with every form of skin diseases are collected."—*Stetoscope*.

"It is a book that requires but to be known to secure a prominent place in the library of every practising physician."—*Nelson's Northern Lancet*.

"This is eminently a practical work, and we know of no treatise on skin diseases better suited to the wants of the general practitioner."—*Buffalo Medical Journal*.

LECTURES

ON

Materia Medica and Therapeutics,

Delivered in the College of Physicians and Surgeons of the University of
the State of New-York, by

JOHN B. BECK, M. D.,

Late Professor of Materia Medica and Medical Jurisprudence.

Prepared for the Press by his friend, C. R. Gilman, M.D., Professor of Obstetrics, &c., in the College of Physicians and Surgeons, N. Y. One vol. 8vo.

"Coming as it does from one of the most profound and accomplished scholars that ever graced our profession, the work must and will be looked upon as a national one, and will be perused with the highest interest."—*Ohio Med. & Surg. Journal*.

"Dr. Beck labored for all coming generations, and his recorded words, and facts, and suggestions, are destined to influence beneficially other minds, even when the particular circumstances of his professional position are blotted from all memories."—*Boston Med. & Surg. Journal*.

"An admirable [book] for students. Everything is clear and concise."—*New-York Med. Times*.

"As a text-book for the use of students, we know of no better treatise, and very few, indeed, that are as well adapted as the one before us."—*Am. Journal Med. Sciences*.

DISEASES OF MENSTRUATION AND OVARIAN INFLAMMATION,

In connection with Sterility, Pelvic Tumors, and Affections of the W. &c.

BY EDWARD JOHN TILT, M. D.,

Physician to the Harrington General Dispensary, and to the Paddington Free Dispensary for the Diseases of Women and Children.

"The best publication on the subject."—*Boston Med. and Surg. Journal.*

"Should be read by every Practitioner."—*Brit. Am. Med. and Phys. Journal.*

"A lucid and satisfactory treatise upon a most interesting class of diseases. After a dictionary and dispensary, there is no book, perhaps, belonging to the physician's library that is so well worth the amount necessary to procure it."—*Nashville Journal of Medicine and Surgery.*

Lectures on the Eruptive Fevers,

AS NOW IN THE COURSE OF DELIVERY AT ST. THOMAS'S HOSPITAL, IN LONDON

BY GEORGE GREGORY, M. D.

First American edition, with numerous additions and amendments by the Author, comprising his latest views; with Notes and an Appendix, embodying the most recent opinions on Exanthematic Pathology, and also Statistical Tables, and four colored Plates; by H. D. Bulkley, M. D., Physician of the N. Y. Hospital; Fellow of the New-York College of Physicians and Surgeons, &c., &c.

"The very best which has yet been published."—*Northern Lancet.*

"The whole abounds with valuable information in regard to a class of diseases of very frequent occurrence, and of fearful mortality."—*Stethoscope.*

"The production of a man who has thoroughly investigated the subjects of which it treats."—*Western Journal of Medicine and Surgery.*

The smallest medical library is most lamentably defective without this book; and whoever recures it will feel that it is absolutely indispensable to the general practitioner."—*Nashville Journal of Medicine and Surgery.*

COLLEGE
OF
PHYSICIANS AND SURGEONS
OF THE
UNIVERSITY OF THE STATE OF NEW-YORK.

The Forty-seventh Session of the College will be commenced on Monday, 17th of October, 1853, and continued until March 10th, 1854, (commencement day)

ALEXANDER H. STEVENS, M.D., LL.D., President of the College, and Emeritus Professor of Clinical Surgery.

JOSEPH M. SMITH, M.D., Professor of the Theory and Practice of Medicine and Clinical Medicine.

JOHN TORREY, M.D., LL.D., Professor of Botany and Chemistry.

ROBERT WATTS, M.D., Professor of Anatomy.

VILLARD PARKER, M.D., Professor of the Principles and Practice of Surgery.

CHANDLER R. GILMAN, M.D., Professor of Obstetrics and Diseases of Women and Children.

ALONZO CLARK, M.D., Professor of Physiology and Pathology (including Microscopy.)

ELISHA BARTLETT, M.D. Professor of Materia Medica and Medical Jurisprudence.

JOHN A. LIDELL, M.D., Demonstrator of Anatomy.

FEES.—Matriculation Fee, \$5 ; Fees for the full Course of Lectures, \$105 ; Demonstrator's Ticket, \$5 ; Graduation Fee, \$25 ; Board, average \$3 per week.

Clinical Instruction is given at the New-York Hospital daily, by the Medical Officers, (Professor Smith being one of them,) fee, \$8 per annum ; at the Bellevue Hospital, twice a week, without fee, (Professors Parker and Clark belonging to the Medical Staff ;) at the Eye Infirmary, without fee ; and upwards of 1000 patients are annually exhibited to the class in the College Cliniques. Obstetrical cases and subjects for dissection are abundantly furnished through the respective departments.

The Annual Commencement is held at the close of the Session ; there is also a Semi-annual Examination on the second Tuesday of September. The prerequisites for Graduation are—21 years of age, three years of study, including two full Courses of Lectures, the last of which must have been attended in this College, and the presentation of a Thesis on some subject connected with Medical Science.

In addition to the regular Course, and not interfering with it, a Course of Lectures will be commenced on Monday, 27th September, and continued until the 11th October.

This Course will be free.

R. WATTS, M.D., Secretary to the Faculty.

College of Physicians and Surgeons, 67, Crosby-street, New-York.

UNIVERSITY OF NEW-YORK.

Medical Department; Session 1853-54.

FACULTY OF MEDICINE.

REV. ISAAC FERRIS, D.D., Chancellor of the University.

VALENTINE MOTT, M.D., LL.D., Emeritus Professor of Surgery and Surgical Anatomy, and ex-President of the Faculty.

MARTYN PAINE, M.D., Professor of Materia Medica and Therapeutics.

GUNNING S. BEDFORD, M.D., Professor of Obstetrics, the Diseases of Women and Children, and Clinical Midwifery.

JOHN W. DRAPER, M.D., Professor of Chemistry and Physiology.

ALFRED C. POST, M.D., Professor of the Principles and Operations of Surgery, with Surgical and Pathological Anatomy.

WILLIAM H. VAN BUREN, M.D., Professor of General and Descriptive Anatomy.

JOHN A. SWETT, M.D., Professor of the Institutes and Practice of Medicine.

C. E. ISAACS, M.D., Demonstrator of Anatomy.

GEORGE A. PETERS, M.D., Professor of the Professor of Surgery.

ALEX. B. MOTT, M.D., Professor to the Emeritus Professor of Surgery.

JOHN W. DRAPER, M.D., President of the Faculty.

COURSE OF INSTRUCTION.—The Courses of Lectures given will be on Anatomy, General, Descriptive, Surgical, and Pathological; Surgery; Materia Medica and Therapeutics; Institutes and Practice of Medicine; Obstetrics and Diseases of Women and Children; Chemistry and Physiology. These courses are arranged in such a way that six lectures a day are given, except when Cliniques intervene. The Cliniques are:

1. *An Obstetric Clinique* every Monday, from 2½ to 4½ o'clock, P.M. This Clinique was first established by Professor Bedford in October, 1850, and from that time it has met with constantly increasing success. More than 5000 cases of the most interesting diseases of women and children have been presented at it. So great are the facilities of the City of New-York in this respect, that it may be truly said that nowhere else do such opportunities exist for the study of this department.
2. *A Surgical Clinique* every Tuesday, from 2½ to 4½ o'clock, P.M., under the charge of Professor Mott. All surgical operations which may be necessary, are performed in presence of the students. The senior students have the privilege of attending the patients at their houses, under the direction of the Professor.
3. *A Medical Clinique* every Wednesday, from 2½ to 4½, P.M., under the charge of Professor Swett. In this Clinique every variety of disease will be brought before the class, and special attention will be given to maladies of the chest, auscultation, percussion, &c. The patients will be given in charge of the senior students, to be attended under the direction of the Professor.
4. *A Surgical Clinique* every Saturday, from 10 to 12 o'clock, under the charge of Professor Post. This is conducted in the same manner and upon the same principles as the Tuesday Clinique.
5. *A Clinique for the Treatment of Diseases of the Genito-Urinary Organs* every Saturday, from 2½ to 4½, P.M., under the charge of Professor Van Buren. The object of this Clinique is to afford to the student a full opportunity of becoming familiar with the various important diseases belonging to this class, such as Syphilis, Stricture, Gonorrhoea, Hydrocele, Calculus, &c., &c., and the results following their scientific treatment.

PRACTICAL ANATOMY.—The session during which the dissecting-room will be open for students, will occupy five months, commencing the first day of October, and terminating on the first day of March following. During the month of October, the room will be open from 8 o'clock, A.M., till 5 o'clock, P.M., and it will be the duty of the Demonstrator to attend there regularly during that month, from 10 o'clock, A.M., till 1 o'clock, P.M., and to devote himself assiduously to the instruction of the pupils in the art of dissecting, and in the acquisition of anatomical knowledge. During the months of November, December, January, and February, the dissecting-room will be open from 8 o'clock, A.M., till 10 o'clock, P.M., and it will be the duty of the Demonstrator to be in attendance from half-past 2 o'clock until 4 o'clock, and from half-past 7 o'clock until 10 o'clock, P.M., and to devote himself to the instruction of the dissecting students. The students, on the payment of the fee for the dissecting ticket, (five dollars) will be entitled to all privileges of the dissecting-room, and will likewise be furnished with soap and towels for washing. No extra charges will be made them on any account whatever, except for their subjects, and the injection of subjects, and it shall always be optional with the students, to have them injected or not.

FEES FOR THE WINTER COURSE.—Full Course of Lectures, \$105; Matriculation Fee, \$5; Practical Anatomy, \$5. The Graduation Fee is \$30.

BENEFICIARY FOUNDATION.—For the purpose of assisting meritorious individuals, the Faculty will receive, annually, ten Beneficiaries, who will be required to pay \$20 each towards the expenses of the Institution, and the Matriculation Fee. The sons of Physicians and Clergymen, other things being equal, will be considered as having a preferred claim. Those who are desirous of availing themselves of this foundation will present to the President of the Faculty, during the Summer, satisfactory documents showing them to be persons of good moral character, and of appropriate elementary education, and in circumstances which require this assistance.

Students on arriving in town will call at the College in Fourteenth street, between Irving Place and Third Avenue, and inquire for the Janitor, Mr. Polman, who will provide them with boarding-houses. Letters may be addressed to Professor DRAPER, President of the Medical Faculty, University, New-York.

NEW-YORK MEDICAL COLLEGE.

The next Annual Course of Lectures in the New-York Medical College will commence on Wednesday, 6th of October, 1853, and continue five months.

HORACE GREEN, M.D., President of the Faculty, and Professor of the Theory and Practice of Medicine.

JOHN H. WHITAKER, M.D., Professor of General, Descriptive, and Surgical Anatomy.

EDWIN HAMILTON DAVIS, M.D., Professor of Materia Medica and Therapeutics.

B. FORDYCE BARKER, M.D., Professor of Midwifery and Diseases of Women and Children.

R. OGDEN DOREMUS, M.D., Professor of Chemistry and Medical Jurisprudence.

J. M. CARNOCHAN, M.D., Professor of the Principles and Operations of Surgery with Surgical Pathology.

EDMUND R. FRASLER, M.D., Professor of Physiology, Pathology, and Microscopy.

JOEL PARKER, LL.D., Professor of Medical Jurisprudence.

C. C. ALLEN, M.D., D.D.S., Lecturer on Dental Pathology and Dental Surgery.

D. S. CONANT, M.D., Demonstrator of Anatomy.

CHARLES H. HAMMOND, M.D., HENRY HENSLEY, M.D., Prosecutors to the Professor of Surgery.

A preliminary Course of Lectures will commence on Wednesday, the 22d of September, which will be independent of the regular Course, and will be free to all Medical Students.

The Dissecting Rooms will be open for classes on the 1st of October.

This College has just received from Europe a most valuable and extensive Museum, fully representing external and internal Pathology, together with the whole series of the Microscopic Models.

The advantages which New-York offers for Clinical Study far surpass those of any other city. The Students of this College will have access to the New-York Hospital, Bellevue Hospital, and Emigrants' Hospital, as well as to the Eye and Ear Infirmary, and the various Dispensaries of the city. A Surgical, and a Medical, and an Obstetrical Clinique will be held weekly by the Professors of these departments. Obstetrical cases and subjects for dissection are abundantly furnished to the Students.

Fees.—Matriculation, \$5; Demonstrator's Ticket, \$5; the full Course, \$105; for the Final Examination, \$30.

By the charter of the Institution a Graduate of the School can practise his profession in any part of the State without being subject to the annoyance of examinations from Medical Societies.

R. OGDEN DOREMUS, Dean of the Faculty.

New-York Medical College, East Thirteenth-st., near Broadway.

AYLETT'S MEDICAL INSTITUTE.

Dr. P. A. Aylett respectfully announces to Medical Students and the Profession, that his regular Course of Instruction for the Winter of 1853-4, will commence on the 18th October.

His time and attention will be exclusively devoted to the interest and advancement of his students, and every facility will be afforded them for acquiring a sound, thorough, and practical education, and of becoming skillful and successful practitioners.

The Recitations will embrace the following branches, viz.: Surgery, Anatomy, Theory and Practice of Medicine, Institutes of Medicine and Materia Medica, Midwifery and the Diseases of Women and Children, Chemistry, Auscultation and Percussion, Physiology, Botany, Toxicology, and Medical Jurisprudence.

The Commencement will take place in March. Diplomas will be given to such of his pupils as the Faculty of the University of New-York may find competent to practice, and sustain the honour and dignity of the profession.

During the October Course of the University, a series of practical Lectures will be delivered on Anatomy, Chemistry, Physiology, Auscultation and Percussion.

Being connected with the Lying-in Asylum, he is prepared to furnish cases to the senior students. Opportunities for medical improvement will also be afforded by attendance at the Eye and Ear Infirmary, City and Bellevue Hospitals, the Dispensaries, &c. &c. Interesting cases will be selected from the University Clinique, for the students to attend.

Being a native of Alabama, Dr. A. has had ample opportunity for acquiring a thorough knowledge of that important and extensive class of Fevers so prevalent in miasmatic sections of the Southern and Western States, and will assiduously endeavor to familiarize his pupils with the diseases of malarious districts.

It affords Dr. A. no ordinary pride to be able to assert that his pupils have invariably acquitted themselves with honor in their examinations before the University. His class the last year consisted of 77 pupils.

For farther particulars, terms, &c., apply to the undersigned at the University.

PHILIP A. AYLETT, A.M., M.D.

MOTT'S VELPEAU.
NEW ELEMENTS OF OPERATIVE SURGERY:

By ALF. A. L. M. VELPEAU.

Professor of Surgical Clinique of the Faculty of Medicine, of Paris, Surgeon of the Hospital of La Charité, Member of the Royal Academy of Medicine, Institute, &c.

Carefully Revised, Entirely Remodelled, and Augmented with
A TREATISE ON MINOR SURGERY.

ILLUSTRATED BY OVER TWO HUNDRED ENGRAVINGS, INCORPORATED WITH THE TEXT ACCOMPANIED WITH AN ATLAS IN QUARTO OF TWENTY-TWO PLATES, REPRESENTING THE PRINCIPAL OPERATIVE PROCESSES, SURGICAL INSTRUMENTS, &c.

TRANSLATED BY

P. S. TOWNSEND, M. D.

LATE PHYSICIAN TO THE SEAMAN'S RETREAT, STATEN ISLAND, NEW YORK.

Augmented by the addition of several hundred pages of entirely new matter, comprising all the latest improvements and discoveries in Surgery, in America and Europe, up to the present time.

Under the supervision of, and with notes and observations by

VALENTINE MOTT, M. D.

Professor of the Operations of Surgery, with Surgical and Pathological Anatomy, in the University of New York; Foreign Associate of the Academie Royale de Medicine of Paris, of that of Berlin, Brussels, Athens, &c.

3 vols. 8vo.

"It is sufficient to say, in relation to this magnificent work, that it has superseded every other that has been published on this important scientific subject. The name and reputation of this distinguished author leave us little more than to welcome his masterly production into the literature of our science; and to congratulate the profession that such a man still lives to adorn and illustrate its history. As a complete record of all the discoveries and new operations, this work will be the best book for the beginner, and a sure guide for the old and experienced surgeon. The American appendix is a valuable addition to the work: it contains the experience of our great American surgeon, Dr. Mott, whose recorded labors, in addition to those of M. Velpeau, have brought Operative Surgery to its highest perfection up to the present time."—*New Orleans Medical Journal*.

"A magnificent undertaking it is, redounding to the honor of the indefatigable translator, whose perseverance is creditable to the country. He has given to the profession of the United States a grand system, emanating from a source at once commanding the confidence and the respect of all who practise surgery. When the fact is known that this massive series of three octavos are illustrated by over two hundred engravings, incorporated with the text, accompanied by an Atlas in quarto, of twenty-two plates, representing the principal operative processes, instruments, &c., it will be acknowledged that it embraces the entire domain of surgery, from alpha to omega, and must be considered as an unrivalled production."—*Boston Medical Journal*.

"This work is, beyond all comparison, the most thorough, systematic, and philosophical exposition of all that pertains to Operative Surgery, that has ever yet appeared. It has already served as the groundwork for numerous systems and manuals of more or less note; and it is destined to hold its present rank among the
