School of Pedagogy.

The School is designed for advanced students of teaching; particularly, though not altogether, for principals, superintendents and training teachers, and hence will be devoted exclusively to professional work.

The theories advanced in regard to education are applied, tested and further developed in a well organized and fully equipped graded school, which is entirely under the control of the Faculty of Pedagogy, and in which students will be allowed ample opportunity for practice.

The School is in no sense a money-making institution, being sustained by the munificence of public-spirited citizens of Buffalo, under the conviction that institutions of the highest order for the training of teachers are seriously needed.

The course of study covers a period of two years. The first term opens in the month of September. Any information in regard to the School may be obtained by addressing
