THIRD EDITION.

PARTICULAR NOTICE.—Pills cannot be delivered to agents, companies, or patients, without payment for the same upon delivery. Those purchasing to sell again will be allowed a small discount, and furnished with a certificate of their genuineness, without which the public may be assured the pills are not genuine, and these certificates must be renewed every three months.

The ingredients composing these pills, are merely simples compounded from the vegetable world. And as they do their work in a quiet, straight-forward manner, it is no more than justice that on parting with them, an equivalent to their value should be received with the least possible risk, or trouble.

☞ See reasons for giving the Pills in large doses, on page 7.

DIRECTIONS
FOR
COMBINING AND USING
A. STEWART'S
COMPOUND VEGETABLE AND OTHER
PILLS;

Accompanied with correct Tables, suitable for nearly all of the most common complaints, whether simple or compound. Taken from every day's observations and practice, of the numerous patients which I have had the honor to prescribe for, with unbounded success, both in Surgical and Medical cases.

REMOVED from No. 716 Washington Street, Boston, to Mount Bellevue House on Fort Hill, Roxbury, a few rods beyond the Norfolk House, where the Hourly Coaches stop—which will take or bring patients to and from the avenue leading to my house every half hour in the day.
May 12th, 1837.

☞ Letters Post-Paid, will be attended to.

PORTRAIT OF DR. STEWART.

☞ It must be observed that the following Tables are calculated for those that are hard to operate upon; therefore the patient must begin at a number which he finds will best suit. Indeed some will not be able to take more than half the number; for instance, in Table No. 1, many will have to begin at 16, 14, or even 12, etc. etc. and reduce to 3 of No. 1, one night, and 3 of No. 2, the next. Should the patient be very hard to operate they ought to begin at 20 or 25.

No. 1.

For Costive and Bilious Habits, the following are my directions :
Take

18	of	No. 1	the 1st night,
5	of	No. 2	2d do.
16	of	No. 1	3d do.
6	of	No. 2	4th do.
14	of	No. 1	5th do.
7	of	No. 2	6th do.
12	of	No. 1	7th do.
8	of	No. 2	8th do.
11	of	No. 1	9th do.
9	of	No. 2	10th do.
10	of	No. 1	11th do.
10	of	No. 2	12th do.

Then take eight of No. 1, one night, and eight of No. 2, the next; so continue increasing or decreasing, as the patient may think it necessary, for the space of three weeks more or less; when he may gradually decrease to one. Price \$1 a Box.

No. 2.

For Dyspepsia, Jaundice, and Liver Complaint, my practice is, begin with

18	of	No. 2	the 1st night,
5	of	No. 1	2d do.
16	of	No. 2	3d do.
6	of	No. 1	4th do.
14	of	No. 2	5th do.
7	of	No. 1	6th do.
12	of	No. 2	7th do.
8	of	No. 1	8th do.
11	of	No. 2	9th do.
9	of	No. 1	10th do.
10	of	No. 2	11th do.
9	of	No. 1	12th do.

Then take eight of No. 2 one night, and eight of No. 1 the next, for the next three weeks; when the patient may decrease at pleasure. As the Liver Complaint, with a difficulty in laying on the left side, is generally hard to subdue, I therefore advise the patient to continue the No. 2, in small doses, after the three weeks, until all symptoms are removed. Price \$1 per Box.

No. 3.

With severe cases of Rheumatism or Gout, my practice has been (and with success,) the following:—Take

20	of	No. 1	the 1st night,
5	of	No. 5	2d do.
18	of	No. 1	3d do.
6	of	No. 5	4th do.
16	of	No. 1	5th do.
7	of	No. 5	6th do.
14	of	No. 1	7th do.
8	of	No. 5	8th do.
12	of	No. 1	9th do.
9	of	No. 5	10th do.
10	of	No. 1	11th do.
10	of	No. 5	12th do.

Then take eight of No. 1 one night, and six of No. 5 the second; so continue for the next three weeks. Should the above fail to give relief, (which sometimes has taken place,) recourse must be had to my Rheumatic or Gout Drops, which, in no instance, when duly persisted in, have failed. The dose is, begin with twelve in the forenoon and twelve in the afternoon, (dropped on a little loaf sugar or sweetened water,) increasing one or two drops each dose until they produce a little nausea at the stomach, or slight purgative; then lessen one or two drops, and persist in that until the effects are produced. Price \$1 per Bottle.

No. 4.

For Consumption in its first, second, and third stages. First stage, my practice has been to begin with*

16	of	No. 2	the 1st night,
2	of	No. 4	2d do.
15	of	No. 2	3d do.
3	of	No. 4	4th do.
14	of	No. 2	5th do.
4	of	No. 4	6th do.
13	of	No. 2	7th do.
5	of	No. 4	8th do.
12	of	No. 2	9th do.
6	of	No. 4	10th do.
11	of	No. 2	11th do.
6	of	No. 4	12th do.

Then take eight of No. 2 the first night, and five of No. 4 the second, for the next twelve days, when the patient may reduce, if necessary, to six of No. 2, one night, and three of No. 4 the next, or less. Price \$1 per Box. Sometimes this direful complaint is removed very quickly; at others, it is very tedious and difficult;

* Second stage at No. 12, and reduce to 4; third stage, No. 8, and reduce to 2—so as to produce two stools per day.

therefore the patient must persevere with the medicine, until it produces the effect. If the cough and tightness of the breast are troublesome, I recommend to the patient my Pulmonary Cough Mixture, taken as per directions, mixt with flax seed tea, a pappoonful to half a cup, and about two table-spoonsful with the tea through the day. Then food ought to be light, consisting of shell fish, such as oysters or clams. Price \$1 per Bottle.

N. B. When it is found that the above medicine does not produce the desired effect, it may be reasonably supposed the lungs are affected. When that is the case, my practice has been, for some time past, to cause the patient to inhale a peculiar vapor, combined with a certain gas, which may be used in his bed room, two or three times per day. With this I have produced wonderful effects, where the patient had been given over by all, and was not expected to live but a few hours; all of which can be attested by those who have been restored to health; also, by those who are now under its operation. ☞ This Gas, with the directions, is prepared and sold by myself only.

No. 5.

For Asthma, &c. &c. To persons of a robust constitution, I recommend beginning with

18	of	No. 1	the 1st night,
6	of	No. 3	2d do.
16	of	No. 1	3d do.
7	of	No. 3	4th do.
15	of	No. 1	5th do.
8	of	No. 3	6th do.
14	of	No. 1	7th do.
9	of	No. 3	8th do.
12	of	No. 1	9th do.
10	of	No. 3	10th do.
10	of	No. 1	11th do.
9	of	No. 3	12th do.

12 of No. 6, the first night, and 12 of No. 1, the next, and my Asthmatic Mixture as per directions on Bottle. Then I recommend the patient to take the Asthmatic Pill, No. 6, as per directions, and persist in them until he is relieved. Should the body become costive, while taking these Pills, I recommend a dose or two of No. 1 and No. 3, as directed. Price 1\$ per Box.

Patients who have been subject to this complaint, will do well to take, occasionally, my Asthmatic Mixture, as a preventive.

Price per Bottle, with directions, \$1.

No. 6.

For Scrofula, Erysipelas, Salt Rheum, Leprosy, Ulcers, Abscesses, and all cutaneous humors, whether internal or external, my practice is, to begin with strong purgative and aperient. I gener-

ally begin with No. 1 and No. 2, alternately. If the patient be hard to purge, take

6	of	No. 2	the 1st night,
16	of	No. 1	2d do.
7	of	No. 2	3d do.
17	of	No. 1	4th do.
8	of	No. 2	5th do.
18	of	No. 1	6th do.
9	of	No. 2	7th do.
19	of	No. 1	8th do.
11	of	No. 2	9th do.
10	of	No. 1	10th do.
11	of	No. 2	11th do.
9	of	No. 1	12th do.

Then take six of No. 2 one night, and six of No. 1 the next, alternately, for three weeks, if the occasion requires. Price \$1 per Box. This is to prepare the system for No. 8, formerly given under the name of 100. This Pill, when duly persisted in, according to directions, has never failed to produce the effect, in the most desperate case, even when the patient had become a complete nuisance to himself. The only restrictions are, the patient, while taking the Pills, should be moderate in both eating and drinking; likewise, be as careful as possible of catching cold; which is a rule every one ought to observe, even while in perfect health. They may be given with safety to both old and young, and at all times. My practice is to begin with three at night, and two at eleven o'clock, A. M., the first week; then take four at night, and three at eleven o'clock, A. M., the second week; and continue at that, until he feels a little griping in the bowels, when he may decrease one Pill at night, and persevere in that, till the effects are produced; which may take a longer or shorter time, according to the nature of the disease. Price \$1.50.

The only thing necessary for patients having Ulcers or Abscesses is, to dress them daily with a mild ointment, to keep the air from them, and to absorb the matter which may be discharged from them.

N. B. It will likewise be necessary to state, that my No. 7, and No. 7 A, are seldom given, except in cases of Venereal, as per directions.

No. 7.

For Hysterics, and Female Complaints.

6	of	No. 1	the 1st night,
6	of	No. 3	2d do.
7	of	No. 1	3d do.
7	of	No. 3	4th do.
8	of	No. 1	5th do.
8	of	No. 3	6th do.
9	of	No. 1	7th do.
9	of	No. 3	8th do.
10	of	No. 1	9th do.

10	of	No. 3	10th do.
11	of	No. 1	11th do.
11	of	No. 3	12th do.
12	of	No. 1	13th do.

Then take 8 of No. 3 one night, and 8 of No. 1 the next, and so continue, increasing or decreasing as the patient may find it necessary, for at least seven weeks.

Many persons have wondered why I give the pills in such large doses. The reason is very obvious, for in most cases it is necessary to remove the morbid, or opposing matter, thoroughly from the stomach and bowels, and to keep it off by increasing the one kind of pill and decreasing the other, till such time as nature begins to act for herself. And 2nd, as my pills contain from four to five different ingredients, by leaving out any one and substituting a stronger purgative in its place, their virtue would be completely lost; or were I to make them double the size they now are, they would not suit every patient, as they would be too long in dissolving in the stomach.

1. *Strong Cathartic or Purgative Pills.*

They are necessary in almost every complaint, and are perfectly safe in all conditions of ill-health, when it is necessary to clear the primæ viæ, or stomach and bowels of their superfluous matter, and to prepare the patient for the use of the other Pills, as recommended for his complaint. They are a certain and immediate remedy for the Teneia or Worms, and all sudden attacks of Bilious and Colic complaints. The dose for children under eight years, is from four to eight pills every evening; for adults, double the quantity. In obstinate cases, increase the dose. These Pills do not interfere with the ordinary occupations of the patient. For Worms, for children under six years, pulverize six, and take them in the morning, fasting, in sugar, mucilage, jelly or molasses. If they are the small Pin Worms, the patient must take a dose of Castor Oil, half an hour previous to taking the pills every other day, until they are completely expelled. Price \$1 per Box.

Almost without exception, these Pills are pleasant in operation. The time or number required should not discourage the patient. Nor should he be alarmed if new symptoms or some unpleasant effects are observed. Experience teaches that the case should be in some way made worse before it can be better.

2. *Mild Cathartic and Aperient Pills.*

These Pills are recommended, in most cases, after a few doses of the No. 1. They are a certain remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, and all Bilious Affections, Loss of Appetite, Headache and Piles. The dose of these Pills is from five to ten every evening, as occasion may require; for it is not necessary to procure more than three stools per day, unless the patient is liable to be costive; in such cases, I recommend a dose or two per week of No. 1, as above. They require no slops or drink to be

taken with them, and no more care while under them, than is necessary in health. Price \$1 per Box.

Free use of nourishing and fresh food is desirable while taking any of my Vegetable Pills. Avoid salt meats and fish; but salt may be taken as usual in health. Avoid spiritous liquors and wine. Coffee is preferable to tea or shells. An infusion of Stewart's Powders is very useful and agreeable, and very cooling when fever is present, or thirst great. In general, patients complain that the Pills take away their appetite for a few days; but it soon returns, and increases daily.

No family ought to be without No. 1 and No. 2, as they may be given with perfect safety at all times of the day or night.

3. *Mild Aperient, Deobstruent or Female Pills.*

These are recommended in almost all complaints to which females are subject; such as obstructions of customary evacuations, and all Nervous Affections, Sick Headache, Pains and Palpitation of the Heart and Breast, Weakness, Debility, Dyspepsia, Flatulency, Costiveness, Inflammations, Stranguary, and, indeed, all complaints incident to the female frame. They are perfectly harmless, and may be taken in all cases and in all stages. They will neither hinder business or amusement; and will, if persisted in, prevent and carry off numerous complaints, which are daily sending many of the fairest and worthiest of creation to an untimely grave. The dose is from four to ten every night.

They generally produce all the effect for which they were intended; but as there are some patients which they do not altogether agree with, I recommend to such, occasionally, a dose of No. 2, as they are a mild and cooling laxative; and to all patients, whether male or female, who are subject to the Hemorrhoids or Piles, Fistulas, or other diseases of the anus, such patients, by persisting in No. 2, in doses sufficient to produce two or three stools per day, and by using Stewart's Pile Ointment,* will very soon find relief from this distressing complaint—which many hundreds, who have tried it, can at this moment attest. Price \$1 per Box.

In seasons and places where that fatal disease, the Malignant Cholera, spreads terror, dismay and death, no one, who, with a well grounded trust in God, will resolutely observe a few simple rules, need be alarmed, viz: Avoid ardent spirits and fermented liquors, unripe fruit, all vegetation that has not come to, or is past a state of perfection, damp night air; and keep the body moderately open by means of No. 1 or 2 Pills, as the habits of the body require. For, as the Malignant Cholera "has been thought to reside in the absence of biliary secretions and excretions," by attending to the above rules, it may be prevented. It is obvious that, when the body is allowed to be costive, the blood, juices of the body, and the whole viscera is affected and predisposed to every prevailing disease. Every one, as he values health, should observe these rules. The foregoing remarks may be applied to the Fever and Ague, and other Epidemics.

* Price of Pile Ointment 50 cents per Box.

4. *Ulcers, Consumptive, Alterative Pills.*

These Pills are designed for Consumptive complaints in all their different stages, and may be taken with perfect safety; they act altogether as an alterative. The same kind of Pills have twice saved my life in consumption, when every thing was prepared for my funeral except the coffin; to these, and Pill No. 2, I owe my present wonderful recovery from a complication of diseases, accompanied with ulcers of the phagadænic nature, which, for nearly nine years, bid defiance to the first physicians of Massachusetts and New York, and was pronounced by them incurable. The Pills are pure vegetable, and act very powerfully on the system, without producing any dangerous or disagreeable effects. In consumption alone, the dose is, begin with three at night, and increase one every night, begin with No. 2 and take alternate doses. If accompanied with other diseases, as Herpes, Exedens, and Phagadænic Ulcers or Erysipelas, Scrofula and Callous Eating Ulcers, see Table No. 6. Price \$1 per Box.

In a great many cases of Rheumatism, Gout, Swellings, Pains and Ulcerations, violent Headache from flow of blood, and diseases of the Eyes, recourse must be had to surgery, such as dry and wet cupping, scarifying by artificial leeches, and there is often occasion to draw off matter from Ulcers, Abscesses, and long seated Chronic diseases, which, along with the Pills as directed, assist in performing the cure. All of which operations are performed by A. STEWART.

5. *Rheumatic Pills.*

These operate by stool, urine, perspiration, and as a general alterative. Rheumatism is often accompanied with pains in various parts of the body, and other diseases, such as Scrofula, Scurvy, White Swelling, Gout, Syphilis. It is impossible to lay down positive rules for the patient. Where nothing is supposed to be present but Gout and Rheumatism, they are an infallible remedy, by taking them in doses of from five to twelve every evening. Should the patient be costive, I advise a dose, two or three times a week, of Pill No. 1. Should the Pills in the course of two or three weeks fail to produce any beneficial effect, there will be reason to suspect some other disease lurking in the system. See Directions. Price \$1 a box.

6. *Asthmatic Pills.*

An infallible remedy for Coughs, Colds, Catarrh, Shortness of Breath, with a wheezing noise in the throat, &c., Whooping Cough, Asthma, and Dropsical complaints; they are expectorant and slightly purgative. To produce a beneficial effect they must be taken in doses, beginning with three, night and morning; also, eleven o'clock in the forenoon and four o'clock in the afternoon. ¶ Let an additional Pill be taken every night only till they produce a slight nausea, or degree of sickness, and cause a plentiful expectoration, which to a certainty they will do in a very short time, when the patient may decrease, as occasion may require. It is sometimes necessary, in costive habits, to accompany these with No. 1. See Directions. Price \$1 per Box.

Dropsical Complaints, with Swelling of the Limbs. When the patient is young and vigorous, there is very little trouble in performing a cure; but in old age, and when it has been long seated, it is very difficult to remove, and sometimes impossible; but generally I have been very successful. My practice with patients of middle age, and of costive habits, (which is most always the case,) is, to begin with twenty of No. 1, the first night, and reduce one pill every night, for ten or twelve days; then change to No. 2—thus proceed as the patient may think it proper. To females, who are not hard to operate upon, I recommend No. 3, instead of No. 1. The patient must avoid all slops, and drink of any kind, as much as possible Price \$1 per Box.

Should the swelling of the limbs not give way to this medicine, while taking it, then recourse must be had to my Cupping and Scarificator, to draw away the superfluous matter there stagnated.

N. B. By this practice, I have been able to reduce very large swellings, where the patients were confined to the chair, and could not be moved without assistance; and, in the course of a few weeks, they have been able to attend to their business. For proof of this, many can be referred to, who have been relieved.

7. *Syphilis or Anti-Venereal, Chemical Pills.*

All my Pills, with the exception of these, are compounded from the vegetable kingdom alone; but as there are a great many complicated diseases, frequently accompanying Rheumatism, Scrofula, Gout, Pains in the Head and Joints, which are generally worse when the patient is in bed, such of these as do not give way to some of the foregoing Vegetable Pills, (as there may be some remains of Viris, in its confirmed state, lurking in the system, or, in other words, mingled with the juices of the body, whether from a hereditary taint, or by some imprudences in youth, and, as it is well known, or ought to be known, that there is but one certain cure for this complaint, whatever pretenders and quacks may tell you—thousands are annually carried off by this direful disease;) to such patients, I recommend beginning with two pills, night and morning, till their effects are perceived, which will be in the course of a few weeks. These Pills combine the Alterative, and what is commonly known as the Lisbon Diet Drink. See Directions. Price \$1,50 per Box.

No. 7, A. Pills. The dose is—begin with four at night and three in the morning, until the gums are slightly affected. This must be kept up by regulating the number of pills, until the disease is subdued; or, as my grandfather, Dr. Buchan, of Edinburgh, used to tell his patients, to run a *quarantine* of forty days, to insure them against a relapse. Price \$1 per Box.*

N. B. If a mild case, No. 7, A, will be sufficient; if a more severe case, No. 7 must be used. These Pills must be duly persisted in, to produce the effect, viz. soreness of the gums. While

* Should the weather be warm, 4 at night would be sufficient.

under the operation of these Pills, the patients will find it to their advantage to use the Sarsaparilla for drink, combined with Guaiacum, and Mezereon root.

Pill No. 8.

This Pill, formerly given by me as No. 100, is seldom given until the patient has gone through a course of the purgative, perhaps for twelve or fourteen days, according to the nature of his complaint. In all cases of Scrofulous Humors, Abscesses, Tumors, Ulcers, Salt Rheum, Erysipelas, St. Anthony's Fire, diseases of the Periosteum and Bone, Hip Complaint, Rheumatic White Swellings of the Joints, and, in fact, all diseases accompanied by humors. Price \$1,50 per Box.

N. B. These Pills, when duly persisted in, have never failed, in my practice, of producing the desired effect. The directions for the above pill will be found under table No. 6.

No. 9 Pills

Are given for Nervous and Female Complaints, when it is not proper to purge the patient.

JUST PUBLISHED,

And for sale only by ADAM STEWART, at his residence, in Roxbury,

OBSERVATIONS ON VARIOUS DISEASES INCIDENT TO THE HUMAN FRAME.

This work contains, (besides the various Observations on Diseases,) a short narrative of the Author, with a portrait; the entire Tables and Directions for using his Compound Vegetable Pills. Also, many certificates of persons who have taken the pills, and found from them that relief which they had sought for in vain, from other sources. It also treats, at considerable length, on a certain disease, to which members of the human family are, unhappily, exposed. The following is an extract from the preface.

“A fellow-feeling for the afflicted has been one of the strongest motives for bringing this little volume before the public. Our own afflictions teach us compassion for the unfortunate. Had not ill health followed me nearly all through life, most certainly my attention would never have been turned to the subjects treated of in the following pages. Necessity, with me, at least, has truly been the mother of invention. It was the desire of doing something for myself, that at length resulted in my being able to do something for others.”

By publishing the Certificates of those who have been cured by Dr. Stewart's medicine, a positive good is effected. They make known to the afflicted where they may obtain relief, and a person may gather from them directions how to take the medicine in their own cases, thus saving all traveling expenses. Letters, post paid, and enclosing the money for the medicine wanted, attended to as faithfully, as if the patient were present.

Among the cases which have been entirely cured, or greatly relieved, will be found—

GENERAL DEBILITY, arising from a complication of diseases in the breast and bowels, loss of sleep, no comfort, getting worse and worse, though under the care of three physicians. In a short time after taking one box No. 1, and one box No. 5, was completely cured. Inquire of Captain Lincoln, near Fisher's Hotel, Roxbury.

GENERAL DECAY. The patient could not turn herself in bed, so ill, as at times to require volatiles to keep life in her, had several most able physicians, had been sick several years, and was given over as incurable by all. The first and second weeks, she took Pill No. 4, third week, No. 3, fourth week, No. 2, and occasionally, No. 1. Began with four pills a dose, and increased to twelve. Drank an infusion of Stewart's Powders, and, wonderful to relate, in a few weeks, she visited Mr. S. with her family, and is now in nearly as good health as ever. Inquire of Mr. Dana, Currier, Roxbury.

ULCER ON THE LEG, of about fourteen years' standing, the patient in very great pain day and night, from ulceration, swelling and inflammation; at times the itching in the night was insupportable, it deprived him of rest; he could get no relief, though he had advice and attendance from many of the best physicians, as well as quacks of every kind. He took twelve No. 1, and twelve No. 2 Pills, alternately, each night, which soon gave relief. The scarificator and cups were applied by Stewart, from time to time, which took from him great quantities of coagulated matter. In six weeks, his leg was restored to its natural size, the cure nearly perfect; he, pleased with the Pills, recommends them to his friends. Inquire of T. Parsons, 56 Quincy Market.

SCROFULA, Erysipelas, Glandular Swelling, Deafness, arising from humors in the head—given over by the faculty, never expected to be cured. Took Pills No. 1 and No. 4—completely cured in about five or six weeks. Inquire of Mr. French, Randolph, Mass., or Mr. Kingsbury, Dedham, Mass.

STRANGUARY, very bad, attended with Dropsical symptoms, general decay, could get no benefit, was not expected to live till night, patient aged sixty-three years, when he took Pill No. 3, one box, and Pill No. 2, one box, occasionally a few of No. 1. He declares himself fully reinstated, and appears vigorous and active. Inquire of Luther Morse, Roxbury, or any of his sons.

HIP COMPLAINT and Lumber Abscess, Ulcer on the Leg—a case of extreme suffering, the patient crying and moaning from morning till night, health getting worse and worse. One of the first Boston physicians could do no more. Stewart could give no encouragement. Began with No. 3—being a young miss, was afraid to give stronger, performed several operations with the scarificator and cupping glasses. After taking two boxes of Pill No. 3, her health is now good, and she walks the streets nearly upright. Inquire of Mrs. Baker, Union Street, Roxbury.

MORBID ULCER ON THE LEG of about seventeen years' standing, discharged from the Massachusetts General Hospital, was about to return to have the leg taken off. Stewart performed about twenty-seven operations with cupping glasses, took away abundance of offensive matter, gave Pill No. 1, and No. 5, sometimes No. 3, Female Pill. In about twelve weeks, health was restored, and she walks about her business. Inquire for Alathia Keene, of Pembroke, Mass. May be seen at Mr. Stewart's house.

GOUT AND RHEUMATISM. A desperate case, patient could not lift his hand to his head, was lifted out of the wagon, crawled into the house on his hands and knees, could not bear to have any one touch him; his friends thought it not worth while to try Stewart's Pills. One single operation with the scarificator and cupping glass, and two boxes Pills Nos. 1 and 5, restored him to walk about as usual. Inquire of Mrs. Griggs, near Capt. Smith's, Spring Street, Roxbury.

ULCERATED SORE LEG.

Boston, Jan'y 29th, 1834.

MR. STEWART:

Sir—Having been afflicted nearly seventeen years with an ulcerated sore leg, and after trying many outward applications, and taking almost as many different kinds of medicine, with little or no benefit, I was advised by a friend to apply to you, at a time, when I had almost given up all hopes of relief, when, after taking three boxes of your pill, No. 8, to my astonishment, my leg is healed up and free from pain, and I have reason to think will continue to be so, from all appearance; and feeling it a duty I owe you, sir, as well as to them who are suffering the same affliction, to make this acknowledgment, for you to make public if you see fit.

I am, Sir, respectfully your's, &c.

WM. BISHOP, Exchange-street.

PULMONARY CONSUMPTION, LIVER COMPLAINT, AND OTHER DISEASES.

I have been severely afflicted, for eighteen years past, with a complication of diseases, and have made application to various physicians, and taken their several kinds of medicine; and instead of decreasing my complaints, they were increasing with great rapidity, during this series of years. I was failing fast, and soon expected death would follow. For some time I had been confined to my room, and for four or five weeks was not able to walk but a few steps, and part of the time I could not bear my weight upon my feet without fainting. After which, I was completely confined to my bed, unable to move; and, as I am told, I looked more like a corpse than a living person.

February 14th, 1833, I received a box of Pills, from a stranger, (which I afterwards learned were made by Dr. Stewart, of Roxbury,) saying, you may act your pleasure respecting them. I had just taken farewell of my Minister, (Rev. Mr. Leverett,) and all my friends, expecting I should not live through the night. But feeling anxious to get well if possible, I did not hesitate to take them; and the next day, to my great satisfaction, found myself greatly relieved; and in the course of two weeks, I was able to walk my chamber, without assistance. For some time previous to my taking the pills, I could not take any nourishment excepting liquids. I have taken four boxes of No. 4, and four boxes of No. 3; and now am enjoying good health.

As long as I live, I shall have great reason to be grateful to Dr. Stewart, for his kind generosity, who volunteered his services, having never heard of each other previous to the taking place of this circumstance. Any further information will thankfully be given by the subscriber.

MARY POOL.

Roxbury, Dec. 12th, 1833.

CONSUMPTION AND GENERAL DEBILITY, NEARLY IN THEIR LAST STAGE.

I do hereby certify that my wife has been lingering for many months with a complication of diseases, such as severe cough, pain in her side, shortness of breath, and general weakness, so that she was scarcely able to get about her room. Our family physician, (who is ranked among the first in the city,) candidly told me he could do no more for her; only, she must wean her child she was then nursing, (about six or seven months old,) and go into the country to take the air, for the benefit of her health; saying, possibly she might recover. This she seemed unwilling to do; but on hearing some of her friends speak of Dr. Stewart, of Roxbury, she was taken to see him, about the middle of June, 1833. He at first stated

her case to be a very doubtful one, but advised her to continue to nurse the child, and stay in the city a few weeks longer; saying he would do his best. He gave her Pill No. 2, and No. 4, directing her to take 15 of No. 2 one night, and four of No. 4 the next, alternately, until she had decreased to four of each; at the same time taking his Drops—a teaspoonful three times per day. On the third day after she began to take this medicine, she was greatly relieved—increasing in strength every day; and now is enjoying good health, and able to attend to the concerns of her family as well as usual. The child also is well.

The above I affirm by oath if necessary. And all my friends that I have since heard were laboring under similar diseases, I have recommended to Dr. Stewart, of Roxbury, who has given general satisfaction.

Boston, Dec. 17th, 1833.

MOSES CHILDS, Pleasant-street.

A DISEASE OF THE SPINE, AND HIP COMPLAINT.

For the benefit of those who are suffering under a similar complaint, I state, that my daughter, aged about 15, was suddenly attacked, nearly six years ago, with a severe pain in the lower part of her back, and hip, so that she could neither stand nor walk; and was suffering under the most excruciating pain, day and night. We sent for one of the first surgeons and physicians in the city, who came, and attended her for a number of months. During this time an abscess formed near the spine, another on the hip, a third a little down the thigh. They were opened at different times, discharging great quantities of bad matter. Our physician treated her in the best manner he could, and I believe did every thing in his power. At last he candidly told me he could do no more for her; but said we must keep her as easy as possible, and see what nature would do. We had the consultation of several physicians, but to no better effect. Her health was fast declining, when Mr. Jonathan French, a friend of mine, (who was in the practice of calling to see her,) asked me why I did not take her out to Roxbury to Dr. Stewart, who, he thought, could do something for her. After several solicitations of this kind, (and she growing worse every day,) myself and wife agreed to take her to this Doctor,—which was in February, 1833. As we entered his room we found Dr. Stewart and one of her former physicians conversing together, when the latter rose up and shook me cordially by the hand, and addressed me as follows, viz. Mr. Childs, this is what I have been wanting. Let my friend Stewart undertake this case of your daughter, for he has had more real experience from his own sufferings of this kind, than all we doctors in Boston. Therefore I beg you will entrust her to his care. This gave us considerable confidence in him. After examining the parts affected, he observed he was afraid it was beyond his skill to do any thing for her; but nevertheless, if we thought proper, he would try. He said first, it would be necessary to reinstate her health, before performing any operations. At this time she was suffering the most severe pain, and could not rest day or night. He gave her a box of his No. 2 pills, to act both as purgative and stomachic; likewise cupped and dressed those ulcers every other day for two weeks, when her health was so far restored that she was able to rest nearly all the night free from pain; when the Doctor requested she should be brought two or three times a week to his room, where he would perform the operation of drawing off the matter from the affected parts, by the means of a suction pump, and dress them with a kind of ointment, I know not what. She daily increased in strength, and her pains had left her, except a little smarting from the operation which he had occasionally to perform. He then gave her a box of pills, which

he then called No. 100. We still continued to take her out to see him, once or twice a week. Thus she continued till the middle of July, when he discovered a small, hard knot, coming upon the hip joint; which he thought was likely to soon form a desperate abscess. He proposed to open it, and extract it, before it came to a head. He did so, and in about three weeks succeeded by his suction pump, (which was occasionally used,) to extract something like a piece of burnt glass, about the size of the end of your finger; after which it healed up very soon, without giving any pain. Also the one on the back healed very kindly. All went on well. The one on the outside of the thigh he kept running with a seaton, as he said to draw off any matter that might be lodged in the hip. This he allowed to heal of itself, without using any means, but rather to keep it open. About the beginning of October, and for the last time she visited him as a patient, he discharged her as being well, with the exception of a slight contraction of the muscles; and he is about to prepare a machine to extend the muscles of the knee. Her bodily health is perfectly good.

I shall be ever grateful to Doctor Stewart for his indefatigable trouble, and kind attention to my daughter, under this affliction.

STEPHEN CHILDS, Wharfinger,

Boston, Jan. 23d, 1834.

Front-street, Boston.

A SEVERE CASE OF JAUNDICE, LIVER COMPLAINT AND DYSPEPSIA.

I do hereby certify that for nearly seven years I have been afflicted with the above complaints so severely, I have scarcely been able to walk about. I tried almost every thing, but received no benefit. At this time, (which was the beginning of the summer of 1833,) my wife being very unwell, she wished me to take her to see Dr. Stewart of Roxbury. Upon entering his room I observed to him I had brought my wife to see him. The Doctor jokingly replied, he should think my wife had brought me, from the outward appearance of things. I denied any thing being the matter with me. The Doctor insisted upon it there was, and without hesitating, stated to me my complaint, as correctly as though it had been previously described to him. He gave me some medicine to take, and I left him. That night I commenced as directed, and so continued for about three weeks, when I felt nearly well; and ever since, I have been gaining strength, and now I am enjoying better health than I ever did in my life, and am able to work from day to day; a thing I never in my life again expected. Also my wife, who at the same time was taking similar medicine, now enjoys good health.

Since that time I have recommended many patients of similar complaints, to Dr. Stewart, who has been very successful in performing a cure. And all others, who are suffering under bodily infirmity, I advise to apply to the same gentleman, who resides in Zeigler-street, Roxbury. For further information inquire of the subscriber.

ELIJAH TOLLMAN,

Dorchester, Jan. 28th, 1834.

Sash and Blind maker.

CONSUMPTION.

For about nine months, I have been afflicted with shortness of breath, pain in my side, cough, and oppression of the breast, which were increasing upon me, until I was brought to a very low state, and was fast approaching the last stage of consumption. I was at a loss to know what to do. My family physician advised me to go to the South, or take a voyage to a warmer climate. This I was about to do, but on hearing that Dr.

Stewart, of Roxbury, had performed some wonderful cures both upon himself and others, I therefore applied to him; he gave me poor encouragement, but after conversing with me some time respecting the medicine I had taken, he approved of what had been done, but said he was fearful it would not move my complaints, but he would try if I was willing. He gave me pill No. 2 and No. 4, one box of each, together with his Cough Drops, taking two or three table spoonfuls a day, at the same time taking fifteen of No. 2 pills, one night, and four of No. 4 the next, alternately, until I had decreased to eight of each. In the course of six or seven weeks I found myself restored to health. On the second or third week after commencing with his medicine, I was somewhat alarmed at a breaking out upon my body similar to a child with the small-pox. I returned to Dr. Stewart and made it known to him. He said it was all in my favor, and now I was sure of getting well. I have great reason to be thankful, as his words became true. I now enjoy as good a state of health as ever I did in my life.

Boston, Dec. 17th, 1833.

STEPHEN DANFORTH,

Washington-street.

DYSPEPSIA, LIVER COMPLAINT, AND CONSUMPTION.

Having for many years been much afflicted with a complication of diseases, and being reduced so low that I was unable to get about, or walk twenty yards without much difficulty, on hearing of Dr. A. Stewart, of Roxbury, I made application to him, but he gave me very little encouragement; saying, he was fearful I had neglected myself too long. But, however, he advised me to try his mode of treatment; to which I consented. I commenced with taking his pills; twelve of No. 1, and five of No. 4, every night alternately. And at the end of four or five weeks, to my great astonishment, I was able to perform my daily business, and now I am in perfect health.

I still continue to take a few of his pills occasionally, and shall endeavor always to keep a supply on hand through life.

Dorchester, Dec. 9th, 1833.

JAMES BAKER.

STONE IN THE BLADDER.

I do hereby certify that for some years I have been suffering under one of the greatest afflictions to which the human body is subject, viz. Gravel and Stone, with at times a complete stoppage of urine. From time to time my attendant physicians did all they could for me, but in vain. And in one of my excruciating paroxysms, I requested to be carried to Dr. Stewart, of Roxbury; who immediately pronounced it to be a severe case of stranguary or stone in the bladder. He immediately gave me a wine glass full of his brown mixture; which in less than one hour after taking, I was able to sit upright; previous to which, I was writhing in agony. He gave me of his pills, No. 2's and No. 6's, with particular directions for the same; also I was directed to sit about fifteen minutes at a time in a tub of warm water, which I did; and to my great astonishment, on the third day I passed a stone from the bladder larger than a large sized coffee-bean, of an oblong shape, and very rough in its texture; and from that moment I have not had the slightest irritation or pain; and now enjoy good health. I still keep this medicine by me, for fear of a return of this deplorable complaint, which every one must know, who has ever suffered from it. Any further information will be cheerfully given by the subscriber.

JONATHAN H. LORING, Cabinet Maker.

Dorchester, Dec. 18th, 1833.

A CANCEROUS ULCER OF THE FACE.

This may certify that I have been severely afflicted with a cancer tumor or caries upon each cheek, and it had baffled the skill of the medical faculty for over three years. I then applied to Dr. Stewart, of Roxbury; and after making several attempts, he succeeded in about seven weeks, to cure me of my serious complaint. He gave me pill No. 1 and No. 4, alternately; directing me to take twenty of No. 1, and six of No. 4, increasing and decreasing as occasion required. My face is now perfectly well, and I enjoy good health.

CALEB HAMMETT.

Charlestown, Dec. 2d, 1833.

A SEVERE CASE OF DROPSY, AND GENERAL DEBILITY.

For a number of years I have been suffering under a complication of diseases, such as swelling of the limbs, bloating of the body, severe affection of the stomach and bowels. My attendant physicians were trying from year to year their various medicines and prescriptions, but without effect; to all of which, I was faithful in attending. Also, I had recourse to all kinds of nostrums, such as are in use at the present day, but in vain. At last a female friend of mine called, who had labored under the same affliction, and asked me why I did not try some of Dr. Stewart's pills, telling me at the same time, how much she had been benefited by them. I then made up my mind to try some of them, and requested her to call and state my case to him. Dr. Stewart sent me two boxes, No. 1 and No. 3, which I took; twenty of No. 1 the first night, and six of No. 3 the next, increasing one and decreasing the other, alternately, for two weeks. He then requested to see me. I was carried to his house. He proposed to cup and scarify my limbs, which were very much swollen at the time. He drew off some quarts of water and blood, and other matter, which seemed to give me immediate relief. I was then carried home much more comfortable than when I came. I still continue to take his pills, 8 of one kind and 6 of the other, alternately. Previous to taking these pills I had not been able to walk, but was moved across my room in a chair; and on the third Sabbath after taking this medicine, I dressed myself and walked to meeting and returned; although a short distance, yet, to the great astonishment of all those that were present, all of whom were well acquainted with my complaint. I still continue to take his pills in small doses, for fear of a return of my complaint. I am now able to attend to the concerns of my family as well as usual. All of which can be attested by hundreds of my acquaintance. Also, I consider it a duty to state that a son of mine, who resides in Boston, whose complaint had prevented him from attending to business for a long time, Dr. Stewart declared it to be dyspepsia and bilious; and by taking one box of No. 2 and one of No. 5, alternately, of his pills, was restored to good health, and was able to attend to business in the course of three or four weeks.

Dorchester, Dec. 12th, 1833.

Mrs. D. DAVENPORT.

ERYSIPELAS AND SCROFULOUS HUMOR.

In the year 1832, my son, (about fifteen years of age,) was attacked with a kind of scrofula, which may have proceeded from a hereditary taint. It was exceedingly troublesome, and appeared to be daily increasing upon him, and his health fast declining. I tried various methods, which were recommended by experienced physicians, but it appeared to be growing worse. He was literally covered with something like the small pox; he could not raise his hands to his head. I heard of Dr. Stewart, of Roxbury, and with little hopes of receiving any benefit, I ap-

plied to him, in March, 1833. The Doctor told me he could cure him in less than three months; but it was impossible for me to believe him; he observed, time would prove it. He commenced by giving him pills No. 1 and No. 4, to take alternately in small doses, which he continued to take about six weeks; when to the great astonishment of all, the humor had left him. He is now perfectly free from it, and is able to attend to his daily employment as well as usual. Any further information will be cheerfully given by the subscriber.

SAMUEL STONE.

Newton, Dec. 20th, 1833.

A COMPLICATION OF DISEASES,

Accompanied by Scrofula, Ulcers, Swelling of the Joints, Biliary, with Vertigo and Headache; and in short, this individual was attacked with almost all the diseases to which the human body is subject.

This is to affirm that my wife has for a long time been afflicted with a complication of diseases unknown, which had baffled all medical skill, and as many others had done in like situation, she resorted to all kinds of nostrums, viz. hot drops and other quackeries; but finding no benefit from those, at last she was advised to try the Hygeian, or cure-all pills, (or rather, I would say, and with propriety too—kill-all pills.) She continued taking them for over ten months, being assured by the pretended agent of those quackeries, that if she would persist in them she would certainly be cured. This she believed, until it was nearly too late, when she was persuaded by some of her friends to call on Dr. Stewart of Roxbury. By this time we had frequently observed that her mind, (as well as body,) was affected; and it was thought by all that she was a dying woman. I therefore took her out to Dr. Stewart, and he, after making close inquiries respecting her deplorable situation, before he asked any questions about what she had taken, or not taken, without hesitation decided that her whole system was poisoned, either by accident or combined with some medicine she had taken. She therefore stated to him that for more than ten months past, she had taken the Hygeian Pills, in large doses. He then replied, that she had only to take them for one or two weeks more, when she would want no medicine from him or any other person. I then inquired if he could do any thing for her. He replied he could do one thing, which was,—set a thief to catch a thief; or in other words, give one poison to destroy another. He commenced giving her some medicine, (I know not what,) which she continued to take for a few days. She then took pill No. 8, formerly known as No. 100, in small doses, not exceeding eight. Previous to this her whole body was covered with a scrofula. She then took No. 1 and No. 5, alternately, for about five weeks; the No. 8 she took for about four weeks. And now she declares herself well. I shall always respect Dr. Stewart for his candor; also for his kind attention to her. Any further information will be cheerfully given either by myself or wife.

TIMOTHY NICHOLS, Painter.

Boston, Dec. 31st, 1833.

No. 4, Carver-street.

A CASE OF A CREATURE EJECTED FROM THE STOMACH OF A PERSON, WHILE UNDER THE OPERATION OF MY STRONG NO. 1 PILLS.

For a number of years I, William Hill, have been afflicted with a severe cough, oppression of the breast, and a mucus or phlegm arising in my throat very frequently; and at times, I felt something crawling within me, which appeared like a snake. I was somewhat alarmed at this, and made it known to the medical faculty, who endeavored to relieve me of my dis-

REPRESENTATION OF A CREATURE EJECTED FROM THE STOMACH OF
MR. WILLIAM HILL, No. 170 ANN STREET, BOSTON, MASS. JULY 17th, 1833.

tress and anxiety; also took various kinds of quack medicines, but all without effect. I was at this time reduced almost to a skeleton, and my physicians told me it was the tape-worm; and upon hearing that Dr. Stewart, of Roxbury, had been very successful in removing this worm, I called upon him, and made known my condition. He refused to have any thing to do with me. I told him to give me something if possible, for I could not live in this condition. He said he would not give me the medicine for the tape-worm, as I was too much reduced; but he would give me some of his strong No. 1 pills, which might do something for me. That night I took a smart dose of them, and very early the following morning I was in great distress, and repeated the dose. I thought I could not live but a short time; but soon after taking the second dose, which was on the 17th of July, 1833, to the great astonishment of many people who were present, with much difficulty, I threw a living creature from my stomach. From that hour I have been getting better, and now I am able to attend to my daily business. The above creature, which resembles an eel, may be seen at the house of Dr. A. Stewart, in Roxbury. The above I do sincerely affirm to be a true statement of facts, and if necessary, many hundreds can attest to the same.

Boston, Jan. 27, 1834.

WILLIAM HILL,
No. 170, Ann-street.

☞ The figure on the preceding page is a correct representation of the above creature.

RHEUMATISM.

I consider it a duty I owe to my fellow mortals, suffering the same affliction that I have, for over twenty years, not being sure of a single day passing without a return of it, to state, that after taking all kinds of doctors' prescriptions, likewise quackeries and nostrums of all kinds, and finding all of them only to give me temporary relief, I made up my mind to call and state my case to Dr. Stewart of Roxbury, with little hopes of his doing much for me. However, he gave me two boxes of his compound pills, No. 1 and No. 5, with directions for the same; and before I had taken one half of those pills my pains left me, to my great joy. All the time I was taking his pills I followed my employment the same as usual; exposed myself to all kinds of weather, which I had not done before for many years. And I candidly declare I have scarcely had an attack of rheumatism since; and now it is more than eight months.

I continue to take a few pills, perhaps once a week, for fear of a return of my complaint.

Any further information I shall cheerfully give to all who may be suffering in the like situation.

Boston, Dec. 14th, 1833.

OTIS CLAFLEN,
No. 40, Pleasant-street.

A SEVERE CASE OF INFLAMMATORY RHEUMATISM.

This may certify that for a number of years past, I have been afflicted with what is called the inflammatory rheumatism. In the spring of 1833, I was again attacked very severely. I immediately made application to my neighbor, Dr. Stewart. He gave me of his pills, No. 1 and No. 5, to take alternately, which I did, and in a very short time I was much relieved. But being anxious to return to my business, I was too hasty, and therefore exposed myself while unwell, and accordingly took a severe cold, and was more seriously afflicted than ever. I again called in Dr. Stewart, who began once more to remove my complaint, which at this time had become very distressing. He gave me a phial of liquid mixture, which I continued to take for some time, together with the former pills,

viz. No. 1 and No. 5. At this time I was suffering under the most excruciating pain, and was in such distress I could not bear the weight of the bed clothes upon my swollen limbs, which now were in a distressing condition. My friends used their utmost exertions to relieve me from my painful situation, but all seemed to afford but little relief; they thought I had but a short period to exist in this world. Dr. Stewart continued to pay his kind attention to me, and directed such a mode of treatment as soon relieved me. I continued to get better and increase in strength, and in the course of three or four weeks I was able to return to my business, and have since enjoyed good health. For any further information, please inquire of the subscriber.

AMOS MORSE.

Roxbury, Jan. 6th, 1834.

A SEVERE ULCER UPON THE LEG.

For over nineteen years I have been sorely afflicted with an ulcer upon my leg; and suffering the most excruciating agony, by day and night. I was attended by some of our first physicians from time to time, and strictly followed their different modes of treatment; none of which gave me any relief. And like many others suffering under a severe affliction, I at last resolved to try some of our present day quack medicines which have been so highly extolled in the public prints; but finding no relief from any of them, I was again induced to consult two of my former physicians who told me candidly, the best thing I could do was to have my leg amputated, which I declined; and continued in the same way, until the year 1833, when I heard of a man by the name of Stewart, in Roxbury, who had performed some wonderful cures of long standing. I thought I would call upon him, which I did. A little conversation had passed, when the Dr. observed, from appearance I should think you were lame. I replied I was, and always expected to be; I did not come to you thinking to have you do any thing for me—I have been told nothing can be done except amputation. The Doctor observed, perhaps there might, and there would be no harm in trying. About the 1st of July of that year, I commenced taking his pills, No. 1 and No. 5, and in the course of three weeks I felt better, and perceived my ulcers were healing. When I began with the pills, my leg was in a terrible condition. I occasionally called on Dr. Stewart, who spoke encouragingly and thought I should soon be well. I followed his directions, and took the pills for about six weeks, when to my astonishment, but satisfaction, my leg appeared well. This, the 16th day of January, 1834, I thought it my duty to call upon Dr. Stewart, who expressed great satisfaction when he found the ulcer upon my leg completely and permanently healed up, which was far beyond the expectations of either myself or any of my friends. My bodily health is perfectly good, and my leg is as well as the other. And for the encouragement of all those who may be suffering in a similar manner, and have resorted to various resources for relief, and have given up in despair, I advise them to apply to Dr. Stewart, of Roxbury.

The above I do cheerfully affirm to be a true statement of my complaint. For further information inquire of the subscriber.

Watertown, Jan. 16th, 1834.

ARTEMAS ADAMS.

GENERAL DEBILITY, AFFECTION OF THE LUNGS AND BREAST.

The following may certify that for a number of years my wife has been lingering with a severe illness—a general debility, affection of the lungs and breast, pain in her side and shortness of breath; and to all appearance

was fast approaching her end. She had been under the care of many physicians, who had tried various ways to restore her, but whether they misunderstood her complaint or not, I cannot say, but they afforded her only a little temporary relief. Having for several years been acquainted with Dr. Stewart, of Roxbury, who to my knowledge had been very successful with some complaints which were very difficult, I concluded to call upon him with my wife, and hear what he would say to her. This was about the 1st of September, 1833. At this time she was so oppressed at the breast, and her lungs so affected, she was not able to speak sufficiently loud to be heard; and for some time previous, conversed in a whispering tone of voice, and was so debilitated and weak she was not able to walk across the room without assistance. I asked his opinion; he told me she was very low, and if she ever got well it would require something more than medicine. He however said to her, he would try, if she was willing, and see what could be done. He gave her pill No. 1 and No. 4, to take alternately for two weeks, when he should again want to see her. At the end of this time, the pain in her side was somewhat relieved, though the hoarseness, oppression of the breast, and lungs, continued about the same. After making necessary inquiries of the effect of the medicine, he proposed as the only thing which he thought would be the means of saving her life, to cup and scarify her, (as he called it,) on the breast and side, pretty plentifully, in order to reduce the inflammation and oppression of the breast. He then gave her a phial of his Consumptive and Cough Drops, and told her to continue taking the pills as before. And I candidly declare from that very day, and even from the hour that the operation was performed, she began to get better, and so continued doing every day. The oppression of the breast left her, her lungs became free, and at this time she can speak as loud and free as ever, and attend to the duties of her family as she formerly did. The time she continued taking these pills I think was about eight weeks, and has since taken them at intervals, perhaps once a week. For further particulars inquire of the subscriber.

JASON MORSE.

Newton, Jan. 17th, 1834.

A MOST WONDERFUL CURE.

About five years ago, my son, now aged sixteen, had a fall from an apple tree, which totally deprived him of the use of his back and limbs, so that he could neither sit nor lay, but squatted down upon the floor, so it appeared that nothing was alive, except from the lower part of the breast upwards. He could not retain any thing in his bowels, but it came from him like an infant a month old. He was such an object, it was pitiful to look at him. All the physicians here tried their utmost to restore him, but without effect. Having heard much said of Dr. Stewart of Roxbury, I determined to take him there; which I did, about the 1st of July, 1833. When he was carried into the Doctor's room, he looked upon both the boy and myself with astonishment, saying, he wondered that I should think such a case could be cured. However, I prevailed upon him to try; he did; but not without telling me there was but very little hopes of doing any thing for him. He gave him pills No. 1 and No. 5, which he took for a fortnight, when he felt a little stronger, and could restrain his bowels better than formerly. I then took him to Dr. Stewart, who proposed what he called cupping and scarifying; which he did on each side of the back bone, round his hips, and down to the soles of his feet. At the same time directing him to have a frame to stretch his limbs. In three weeks more the second operation was performed. His back now became a little

stronger, and he was able to sit upon the floor nearly upright. About two weeks more, the third operation was performed. And while under this operation, something took place I did not understand, but remember that he kicked with his limbs with considerable force, and threw off many glasses which were used upon him. The Doctor then declared he believed he would again obtain the use of his limbs. He gave him a phial of drops to take, which acted very powerfully. He has continued taking them daily ever since; and more than wonderful to relate, at this time he is able to set in a chair as upright as any person; and his bodily health is perfectly good. He is able with his crutches to walk about tolerably well. A few days since I took him to visit Dr. Stewart, who was astonished upon seeing him enter his room without assistance. And he declared he had never in all his life known such a case to be cured; not forgetting to tell me he should have given up the case at the second operation, if it had not been for the anxiety I expressed to try a little further. His situation in former years was known by many hundreds, who now to see him walking with crutches are astonished. But so it is; my son enjoys perfect health at this time, and Dr. Stewart is entitled to all the credit of the same. Any further inquiries respecting this case, can be received by any one who will call on the subscriber in Quincy.

Quincy, Jan. 21st, 1834.

Mrs. J. VEAZIE.

N. B.—When this pitiful object was first brought to me, I conceived that the spinal marrow was gone; the same was the opinion of the other physicians who had formerly attended him. But upon the third operation, (as above mentioned,) I struck a certain spot with the scarificator, near the lower part of the spine, which caused him to throw out one of his limbs with great violence, so that I could scarcely keep it down. I then struck upon the opposite side, which produced a similar effect upon the other limb. I was then convinced it was not a disease of the spine, but rather a spasmodic contraction of the muscles, or a paralysis of the back and limbs.

A. STEWART.

Roxbury, Jan. 22d, 1834.

SANDWICH, Feb. 4th, 1834.

DR. A. STEWART,

Dear Sir—In the year 1823, I was seized with a complaint called the Dyspepsia, which reduced me to such a state of debility as to prevent my attending any kind of business for six months; after that, by regulation of diet and occasional relief by medicine, I kept along until the Spring of 1829, when I was seized again with the same complaint with double violence, and have been unceasingly followed since that time, until September last, during which time I have been under the care of an eminent physician, also consulted some of the first in Massachusetts; all of which testified that medicine was of no use, but I must follow a regulation of diet, and get along as well as I could; which course I did for two years in the most strict sense of the word, but grew no better; and for a long time previous to taking your pills, I was followed with unceasing pains in the head, back and sides, so that I could neither sit, lie, nor stand, with any kind of satisfaction, and was unable to attend to any kind of business whatever; when unexpectedly, for the first time, I heard of your pills, and I lost no time in procuring two boxes of the same, of Nos. 1 and 4, which I commenced taking Sept. 7, and before I had taken half, I was completely relieved. Since that, I have been able to eat and drink with the rest of my family, and have been able to perform my daily occupation with ease, and enjoy my rest nights as well as ever, though I continue

taking the pills, and shall, until I am satisfied they have overcome the disease, which I am satisfied they will.

I am yours, Dear Sir, with respect,
AMOS BENNETT.

I, the undersigned, do hereby certify that I have, from my earliest infancy, been a prey to various disorders, such as pains in the sides and breast, a dry cough, a severe headache with a dizziness and weak eyes, and sometimes a momentary loss of sight, and a hardness of hearing, together with an insatiable appetite, and a gnawing sensation in the stomach. And that I have consulted various respectable physicians, in different parts of the United States, without meeting with any success, and without being benefitted in the least by their prescriptions, when in January, 1832, I discovered that I had something which they called the tapeworm; but none of those to whom I applied, could succeed in bringing it from me. At last I heard by accident of Dr. Adam Stewart, of Roxbury, to whom I applied, and who succeeded in the second day's trial in bringing away the last remains of a worm of an enormous length, (over 30 feet,) which he calls the _____ and which may be seen at his office in Roxbury.

I take pleasure in certifying to the above, both in gratitude to him, and that those who are similarly afflicted may avail themselves of the same means of relief.
JOEL KNIGHT.

Roxbury, April 17th, 1834.

I certify that I have long been afflicted with a worm of great length, and diseases consequent thereon, and that I have had the advice of eminent physicians, both in this country and Great Britain, without obtaining relief, and that I got rid of it in thirty-six hours, by means of medicine given me by Dr. A. Stewart, of Roxbury, who now has it in his possession; and I am fully persuaded that others, laboring under the same, or similar diseases, will find relief by making application to him.

Roxbury, April 30, 1834.

EDWARD BARDSLEY.

This may certify that I had been afflicted for 27 years with a serofulous sore leg, so that I had lost all hopes of its ever being cured, as I had tried every remedy that could be thought of, and had been under the care of many physicians, without meeting with any success, until I applied to Dr. Stewart of Roxbury. And I consider it a duty I owe to my fellow men, to state, that within eight weeks after putting myself under his care I was able to walk as well as ever, and now I consider myself perfectly cured, and my bodily health is now better than it has been for twenty years.

THOMAS G. HILDRETH.

Newton, Upper Falls, May 19th, 1834.

[The following certificates have been received since 1835, and up to the present time, 1837.]

This may certify that I have been severely afflicted at times for eleven years past, and having of late found (as I hope,) a more permanent relief than heretofore, I think it my duty to state to the suffering community, the source to which I resorted for my restoration.

In the year of 1823, I occasionally found an inconvenience when exercising, from a slight pain a little below the pan of the left knee. Supposing it to be nothing serious, I paid but little regard to it, until a small

TAPE WORM, TAKEN FROM MR. JOEL KNIGHT.
SEE HIS CERTIFICATE, PAGE 24.

bunch made its appearance, attended with much pain; being somewhat alarmed at this, I was conveyed to a physician in March, 1824. He treated it as a sprain, for some days, but without success. I then visited a distinguished surgeon, and followed his directions, and walked (when at all,) upon my crutches during six weeks, when I was much relieved.

I remained comfortable through the Summer. The next Spring I was again attacked and brought to my former painful situation; I resorted to the same source for relief, but in vain. I was visited by very many friends, none of whom failed to recommend something which it was thought would perform a cure. I soon found myself somewhat relieved again, and was able to walk a short distance. Thus I continued getting better and worse, for five years; a part of which time, I was able to labor daily; the remainder, I was lying upon my bed, suffering under such pain as my pen cannot describe.

In the Spring of 1829, I again visited my respected surgeon, in a lamentable situation; he administered something, which again afforded me temporary relief. (*Such*, I had found many times before, but as often, my hopes of recovery were blasted.) I continued comfortable until the following Winter, at which time my affliction returned. I resorted to various sources for relief, but was unsuccessful, as before; but being in the morn of life, I felt desirous of getting well, and not discouraged, I concluded to try another doctor, (who is a professed bone-setter in one of our cities. I made him a visit of four weeks,) in December, 1831, but without success. I returned home and spent the Winter, but it was indeed a painful one. While there is life there is hope; therefore I was advised to go to the *Massachusetts General Hospital*, which I did, in March, 1832. I returned from there in June, apparently some better. After being confined to the house, and my crutches, and not touching my left foot to the floor, for two or five weeks, and during this time suffering most severely, I was again the smiles of a kind Providence, permitted to enjoy open air, and view abroad the works of God. My limb increased in strength, and was apparently doing well till June 1833, when I was again brought into the furnace of affliction; I then returned on the 23d of July, to the Hospital and spent seven weeks; during which time, (as before,) I suffered the most excruciating pain, all over my system, for many days and nights, in succession; (in fact, I scarcely knew what it was to be free from pain,) while there, I was *kindly*, and faithfully, attended by the first surgeons in Boston; but all their attention did not remove my indescribable pain, or restore my health, which at this time, appeared declining. The first of September, in a reduced and suffering state, I returned home, where I laid upon my back four weeks longer. About this time I (for the first time,) accidentally heard of Dr. A. Stewart, of Roxbury. In a feeble state, I visited him, and followed his directions, fifteen days, when I again rode to his house, where he made an opening, (the first that ever was made,) on the out side of my leg, and drew away nearly two gills of coagulated blood, which most surely gave me great relief. I followed his directions about six weeks, when I felt much better; my pains had left me, the inflammation ceased, and there appeared to be a prospect of my recovery; I soon laid aside my crutch, without which, I had not walked three yards for six months. It is now more than a year, since I applied to Dr. Stewart during which time I have suffered no pain whatever; my leg, has a natural appearance, and seems perfectly sound. Until within four months past, I have not been able to walk half a mile at a time for three years. I shall ever respect Dr. Stewart, and with much gratitude feel myself indebted to him, for his skill and services, in restoring me to my present situation; and those of the suffering community, I advise to make

speedy application to him for aid. Any further information will be cheerfully given by the subscriber. EBENEZER WOODWARD, Newton.

For a number of years I was dreadfully afflicted with a scrofulous swelling in my neck and each breast, with deep running ulcers, and my health was very bad. I tried many physicians, but got no help. Chancing to see a young man who lives in Charlestown, who had a cancer on each cheek, and was completely cured by Doctor Stewart, I went to him. At first he gave me but little encouragement; but after taking his No. 2 and No. 1 pills for about 2 months, my neck began to feel some better, and my general health was greatly improved. The Doctor then gave his No. 3 pills and some ointment to use. The ulcers were then discharging much. He then told me I must continue taking them regularly every night, and if I would persevere, he was certain of a cure; which has proved true—for now my ulcers are all well, the swelling all gone, and my health is better than it ever was. I have reason to be grateful to Dr. Stewart for his kind attention to me while under his care—also for the moderate charge.

Inquire of

MISS SCOTT, East Cambridge,
Or of Mr. DONALLEN, Watchmaker, Main street.

About five years ago I was taken with Liver Complaint, Bilious Jaundice, Dyspepsia, and fast approaching Consumption, with a severe Cough, which reduced me so that I was not able to walk but a few yards at a time. Our doctor tried all he could, but still I was getting worse very fast. I was then advised to go and see Doctor Stewart, which I did. After he had examined my case, he told me he was afraid it was too late to try, but if I had a wish to try him, he would do his best to help me, and I commenced his medicines No. 1, No. 2 and No. 4. It was a number of months before I could perceive much benefit, but I still continued his prescription, and in 5 months, to my joy and to the astonishment of all my friends, I was able to go to work again, and have continued gaining every day since. Still I constantly use his pills, both for myself and family, for fear of a return of my complaint. It is now about four years ago. I then resided in Dedham, and carried on the blacksmith's business; and now I live in Royalston, and continue the same trade. Any farther information will be gladly given to those who wish it.

H. PATRIDGE,
Dedham, now Royalston.

Also some of my men were under the Doctor's care, and all did well.

A BAD CASE OF TAPE WORM.

A lady about two years ago came all the way from the island of Cuba to be cured of a Tape Worm. She had been afflicted for nearly 15 years; had been under the care of all the French doctors in that place, but in vain. She heard of me, and came off immediately to see me, and staid in my house till I got it away from her; it was one of the hardest cases I ever had. She was a large, strong woman, and it required three times the medicine usual in such cases; nearly a month elapsed before I succeeded in bringing it away. It was a very long one. She took it home with her, to show her doctor there what had been done in Roxbury.

Mrs. E. Smith, Island of Cuba.

A. STEWART.

BAD CASE OF FALLING FITS OF 15 YEARS STANDING.

I do hereby declare that I was so sadly afflicted with fits, that I was not certain of a moment, and dare not walk out without being in eminent danger. Being poor, I was under the necessity of doing something, and used

to go out on the farm, and frequently was found by my people in one of my fits, and often got severely hurt. I was advised to try Dr. Stewart, which I did. He gave me his medicine, and cupped me seven or eight times, and in four months I was free from my complaint. I then lived at Watertown. Since then I have removed to Keene, N H., and work in the paper mills. I have not had any fits since, and it is now over four years ago. Any information can be had of my relatives in Watertown, or of me, at Keene, New Hampshire.

J. MAY.

TAPE WORM.

I do hereby certify, that for a long time I was troubled with a complication of diseases, such as giddiness in the head, and pains in my breast and bowels, and general debility, although I was able with difficulty to be about. I had tried many different medicines, but still no relief. At last I began to be much alarmed. I went up and stated my case to Dr. A. Stewart, when he pronounced it tape worm. He then gave me medicine, with directions how to take it, and about the middle of the second week, sure enough a tape worm came from me alive, over 30 feet in length, and half an inch in width. When it came, I took it immediately to the Doctor's, where it is to be seen now. I am strong, and can do as good a day's work as any man. I am ready at any time to affirm the same to any one who will call on me.

H. WARREN, Stone-cutter, 33 Thacher st. Boston.

TAPE WORM OF MONSTROUS SIZE AND LENGTH.

For a number of years I labored under a complication of diseases, such as headache, giddiness, debility, and pain all over—no sleep, but in constant trouble day and night, and my body emaciated, and my mind and senses nearly gone, so that for years I could not attend to business of any kind. I tried all the doctors far and near that I was recommended to, but in vain. At last I was recommended to Dr. Stewart. After asking me a few questions, he told me immediately, and one of my friends that was with me, that I had the Tape Worm, and a tremendous large one too—at least the gentleman that was with me told me so, after I got so as to understand any thing, for my mind was completely lost. He gave me his tape worm medicine. I went home and took it, and in one week I passed a tape worm over 70 feet in length, and nearly three quarters of an inch wide in the middle. It was alive, and lived a day or two after it came away, and is to be seen at the Doctor's office. My health immediately became as good as it ever was, and I am now able to do a day's work with any man of my age. Inquire of

D. TILDEN, Bricklayer,

I shall be glad to give any information wanted.

Scituate, Ms.

SEVERE CASE OF LIVER COMPLAINT, BILIOUSNESS AND JAUNDICE.

About four years ago I was taken with this complaint, and completely reduced, so that I was hardly able to crawl about. I went to several doctors, but got no help. I was advised to call on Dr. Stewart, and he gave me some of his No. 1 and No. 2 pills, stating at the same time that I need not be much afraid, and in 4 or 5 weeks it proved so; for it is now 2 years ago, and I have and am enjoying as good health as I ever did, and am able to do my daily labor.

JOHN SERGENT,

Gloucester, Mass.

It is now about two years since I was advised to call on Dr. A. Stewart, on account of very bad health. Indeed I had been in a dying state for a

number of years, and could get no relief from any one, but was getting worse every day. When I called on the Doctor, he told me at once that my case was a very bad one, but he had no fear but he could get me well; telling me it was a liver affection, jaundice, and general debility, dyspepsia, &c. &c. He gave me some medicine and directions, and told me if I would persevere in taking it, that I certainly would be perfectly well in three or four months—and I must candidly say in two months I was enjoying as good health as I ever did, and have recommended many of my female friends, all of whom have been as fortunate as myself. Any information can be had of me, at Mr. DONALLEN'S Watchmaker's shop, East Cambridge.
MRS. DONALLEN.

BAD HEALTH AND DEAFNESS.

I hereby certify that I was deaf for some years, and in a bad state of health; every thing was tried in vain by all the doctors around, when I was advised to go to Dr. Stewart, and try him, which I did. I was then entirely deaf, and could not hear a report of cannon. The Doctor told me it was a bad case, but after examining my ears, he said he would try. He then operated on my ears, and gave me some medicine to take at home, and continued it for over three weeks. It had a good effect upon my bad state of health, but none on my hearing. I went to the Doctor again, and he operated a second time. I went home, and on the third morning I could not sleep for the noise that was making down stairs. I got up and went down stairs, and asked them what they were slamming the doors and making such a noise for. My father and mother were astonished when they found I could hear as well as themselves. I have continued so ever since, and have been two voyages to the East Indies with my brother, who sails as captain, and can hear any word that is spoken aloft as well as any man. I have great reason to be thankful to Dr. Stewart, in restoring my health and hearing. Any farther information will be gladly given by me or any of our family.
R. KELLY, Mariner,
Harwich, on the Cape, Mass.

I, Henry Robinson, do declare that for 17 years and upwards I was afflicted with the most loathsome disease, the Leprosy, all over my body, so that I could not lay down in bed, and all the sleep I got was sitting in a chair. I had a consultation of doctors in the city of Boston, to know if any thing farther could be done for me. I had then expended all I had in the world, and they candidly told me that nothing more could be done for me, and that in a few weeks I would lie in my grave. I then went to see Dr. Stewart. I was in a miserable state. He told me it was the worst case he ever saw; but nevertheless, if I had a mind, he would try. He gave me his No. 8 pills, which I took only four weeks when I began to feel some better. I continued on with the same pills for about 3 months, when I went to Dr. Stewart again much better. He then told me that it was to him almost a miracle, but positively stated to me, that if I would continue, he was confident I would be a well man—and, thank God, his words have proved true, for I am now a well man, and my body as clean as any body's. I suppose I have taken over 20 boxes of No. 8 pills, and still keep them by me in case of need.

I have removed from Boston to Barre, Ms., where any information can be had of
HENRY ROBINSON, Merchant, Barre.

I do hereby certify, that for a long time I was afflicted with a bad humor on my face, breast, hand and arms, that kept me in constant torment; be-

sides, my health was miserable, and I could take no comfort night or day. As a number of my acquaintance from our place had received relief from Doctor Stewart of Roxbury, I sent and got some of his No. 2 and No. 1 pills, and a box of ointment, with his directions, and in a very few weeks my health got better, and my humor completely left me. I should recommend all under such affliction to apply to him. Also a son of Capt. Kendell, of our place, who was perfectly covered over with a humor, and had been for some years, and had tried all the doctors round, applied to Dr. Stewart, and in two months from the time he commenced his medicine, he was perfectly well. It is, I believe, 3 years ago since he got well.

Any information can be had of me, or of Capt. Kendell.

MRS. BURR, Ashby.

This is to certify, that for 5 or 6 years I was afflicted with a complication of diseases, as liver complaint, bilious, dropsy, with pains in the head and joints. I had tried every thing, but received no benefit, and had given up all hopes of getting better, but hearing of Dr. Stewart, I sent to my daughter, who resides in Boston, requesting her to go to the Doctor and explain my case; and also sent a letter to him. He said mine was a very doubtful case, but he would try, which he did, and for the first three months with no apparent good, but on or about the fourth or fifth month I began to mend, and continued getting well, and now I enjoy very good health. This was about three years since, and I shall ever feel grateful to Dr. Stewart for his kind attention. JAMES CARROUTH, Postmaster, Philipston, Ms.

For about seven years I was so afflicted with a bad leg, that I was at last compelled to walk on crutches, and that with difficulty, and was fast going to my grave. I had tried all the doctors I could hear of, without the least benefit, and was still getting worse. On hearing of Dr. Stewart, I sent a statement of my case to him. He sent me his No. 1 and No. 3 pills, which I was to take for a month, then his No. 8 pills, with a wash and ointment, which I used only about three months, when, to the astonishment of all, my leg got better, and has continued so for these three years past; and I am now able to work as well as any man. Any information can be had by application to me, at Leominster, Ms. JACOB PUFFER.

A BAD CASE OF LIVER COMPLAINT, JAUNDICE AND DYSPEPSIA.

When the whole frame was suffering under the severest irritability, and the mind completely impaired, likewise suffering with a bad scrofulous humor, I tried every thing that I could hear of, but kept getting worse. I was sent to the Massachusetts Hospital, where I remained several months, when I was discharged, they saying they could do nothing for me. By accident I heard of Dr. Stewart—I went and stated my case to him, or rather he stated it to me much better than I could do, telling me at the same time that he thought there was no great doubt but he could help me. I had been a number of years in that way, and had given up all hopes of ever getting well. He gave pill No. 1 and No. 2 to take for 6 weeks, with an ointment. Then he put me on a course of No. 3 pills, 3 every night, which I continued for 6 weeks, and am now enjoying perfect health, and able to work as well as ever I did, and should advise all suffering under severe complaints to put themselves under his care, for I should have been in my grave long ago had it not been for him. I think it necessary also to state that his charges to me, and I believe to all others, are very moderate.

J. BLOOD, Superintendent, Quincy, Ms.

SEVERE CASE OF FALLING FITS.

A lad about 17 years of age, by the name of Oman, was severely afflicted with Fits, I think his mother told me for 7 years, and they never dared to let him go out of the house without some one with him. They had him in the Massachusetts Hospital for a long time, but without benefit—his mother brought him to me and begged I would try what I could do for him—for that she was very poor, and he could do nothing for himself. He had frequently two and three fits a day. I gave some of my medicine, and he continued it for about four weeks, when he had but two fits in a week. I then cupped him once a week for a month. He is now perfectly well, and working, I believe, at the carpenter trade, and is doing well. This was about two years ago. I have the information from his sister and mother.

A. STEWART.

A BAD ULCEROUS LEG.

About two and a half years ago, a young girl about 16 years of age, had a dreadful bad leg from the knee to the foot. The flesh was nearly eaten off, and a great discharge of purulent matter came from it, very offensive. She had been so for six or seven years, and had been in the Hospital a long time. She was a poor girl, and her mother a widow living out. The poor girl was boarding in a low, damp part of the city; I took pity on her, gave her medicine, and operated on the leg, dressing it frequently, and giving her the necessary things to wash and dress. It was a doubtful case for some months, but at last I got it perfectly well, and she is now as well as any girl of her age. The name I forbear to publish, at her request.

A. STEWART.

For four years I was troubled with the Dyspepsia, Liver Complaint, and Nervous irritability, so much so that death would have been veritable to life, and had tried all the doctors about, but got no relief. I called on Doctor Stewart about two years ago, and put myself under his care. It was a doubtful case for upwards of 12 months, but still I persevered with his medicines in large doses, till I have got completely well, and am able to do my daily work as well as my neighbors. Any information will be gladly given by me, at the Mill Dam Corporation in Needham. J. EDDS.

A BAD CASE OF ERYSIPELAS IN THE EYES.

About a year ago a young man was brought to me nearly blind, and had been so for years. When he and his father came into my room, the father observed he had brought a case now that would puzzle me. I examined his eyes, and observed that I did not think it very difficult. His father told me they had tried all the doctors around, but it was of no use, and farther he had brought him to me without the least hopes of cure for him. I gave him some medicine, and a wash for his eyes, with proper directions, and in the short space of two months he could see as well as any one. The inflammation was all gone, and his general health better than it ever was.

Inquire of Deacon PARKER, or his son, Southboro', Mass.

DYSPEPSIA, BILIOUS LIVER COMPLAINT AND WORMS.

Three years ago I was taken down with a complication of diseases, dyspepsia, and bilious liver complaint, and also I was severely troubled with worms. I went from one doctor to another, trying all their medicines, and getting their different advices, but all gave a different opinion of my case, till I was completely worn out with their tampering. I had heard of Dr. Stewart, but thought he would do no better by me than the others had

—but at last I went to him, and told him I had come to see if he could tell me what was the matter with me. He replied, if I had been well I had no need to come to him; he told me I had a number of complaints, any single one of which would make me feel miserable enough. He then told how I felt, in every way—and told me I was troubled with the stomach worms, which I soon found, in taking his medicine and advice, to be the case. In a few weeks I felt some better, and called on the Doctor again. He gave me some different medicine, and told me to persevere in it, and he was sure I would get well, but it would be some time. I went on for about four months, when I began to mend fast, and in six months I was able again to work at my business, and have gained health and strength ever since. I now enjoy perfect good health.

I shall be happy to give any farther information to those in bad health, and should advise all that are in bad health to see Dr. Stewart of Roxbury—not forgetting to state that his charges were, in my case, as well as in all others, very moderate—and certain that had it not been for him, I had been in my grave years ago. Inquire of HENRY FAIRBANKS, Cooper,
Acton, Ms.

LAST STAGE OF CONSUMPTION COMPLETELY CURED IN THREE MONTHS.

About fourteen months ago I was taken with Consumption, and was just on the verge of the grave. My cough was excessive, and I used to raise a quart in one night of bad matter that tasted like rotten eggs, and felt great oppression of the chest and pain in my side, swelling of the loins, cold sweats, and no sleep; and was almost gone to a skeleton. All the doctors around me tried, but still no help for me—and some of them said it was of no use to try anything further, for they said I could not live through the month of May. This was about the 28th of April last, but our folks thought I had better try Dr. Stewart of Roxbury; I therefore sent a statement of my case to him, and he sent his No. 1 and No. 4 pills and a bottle of his Consumption mixture, with very strict directions, observing I might try it, but that he was afraid it was a lost case. I commenced taking it, and wonderful to say, in six weeks I was much restored; my cough was much easier—very little raising—the tightness of my chest had nearly left me. I continued his medicine, and am happy to state that my health is now as good as it ever was, and I can work on the farm as well as any man of my age. So much for our wise doctors, and while I live I shall bless Dr. Stewart for what he has done for me. Any farther information can be had of me or any of my relations.
J. DOTON, Plymouth, Ms.

A BAD CASE OF CONSUMPTION.

About 4 years ago a gentleman by the name of Colburn, from Gloucester, a stone contractor, a man well known in Boston, came to me in the last stage of consumption, with all the bad symptoms, severe cough and purulent matter, with night sweats, swelling of the legs, and gone to almost a skeleton. He had been an active man in former years; he told me he had tried every thing, but had no hopes of ever getting well. I told him there was indeed very little hope, but I would try, and if he would follow my advice strictly he might get over it. I gave him the medicine and told him to call and see me again in three weeks, which he did—and even in that time he had gained a little. I then gave him my cough mixture, and my No. 2 and No. 4 pills, and mixture to prevent his night sweats—with my desire to see him if possible in 4 or 5 weeks; but I was very doubtful whether I should ever see him again, for when he was with me his cough

was excessive, with great oppression of the chest. I told him, at his request, that I was afraid he and I would never meet in this world, but at the same time observed that there might a change take place;—and sure enough in 5 weeks he walked into my room with a firm step, and sat down opposite to me. I was astonished—and after asking him a few questions, he told me that for the last three weeks he had gained every day; his sweats had left him, and likewise his cough, and he considered himself a well man, and had come up to Boston to make some more contracts with his old customers. The most of his old acquaintance were surprised, and asked if it was possible he was still alive. He replied he was, and nearly as well as ever. He has had no return since, and is now a well man, and about his business. Any information can be had at Gloucester, or in the city of Boston. Enquire of Mr. J. COLBURN, Gloucester. A. STEWART.

LAST STAGE OF CONSUMPTION.

About three years ago I was brought so low with consumption and liver complaint that I was not able to walk a step, nor yet to stand on my feet half a minute at a time, and had all the most eminent doctors of the city to attend me, but no relief could be given me. A consultation of physicians was held;—they informed my husband that all had been done for me that could be. It now only remained for me to keep as easy as possible, for it seemed that I could not survive. About this time some person persuaded my husband to take me to see Dr. Stewart, which he did, with much difficulty, for I had to be taken in his arms from the carriage like a child, to the Doctor's office, when my husband stated my situation, and what the other doctors had said. He shook his head and said he was afraid it was in vain to try anything more, but my husband begged he would. He did, and gave me his medicine, with particular directions—but observing if I got well it would be a miracle, although he said he had seen worse cases than mine which he had helped, and perhaps he could me. I had not taken his medicine three weeks, when I found great relief, and began to be able to walk. I was then taken to him again, when he gave me farther directions, and in six weeks from that time I was nearly a well woman, and gained strength every day. Now I have enjoyed as good health for the last 13 months as ever I did, or indeed better. Any farther information will be gladly given by me, or my husband, corner of Myrtle and Garden streets.

MRS. S. RICHARDS.

GENERAL DEBILITY, DYSPEPSIA, AND LIVER COMPLAINT.

About three years ago I was brought so low that I was fast approaching the grave, and had been under the care of a number of doctors in the city, none of which gave me the smallest relief.—I was sinking fast. About one year ago, my husband, hearing much said of Dr. Stewart, and he being a countryman of his, resolved to take me to him, which he did. The Doctor examined me particularly, and observed he did not think there was much difficulty about getting me well. He thereupon prescribed for me, and I took, his medicine No. 1 and No. 3, and to the astonishment of all I began to mend fast; so that in about 6 weeks I was able to do a little about the house. Also I was severely troubled with Female Weakness; then I was again taken to Dr. Stewart, and he advised me to continue the same as I had been taking, and gave me a phial of mixture to take—and from that day I kept gaining, and in 4 months was a well woman, and have continued so ever since, and think I enjoy better health than I ever did. Also to two of my children that were severely troubled with Worms, he gave his medicine, which in 4 weeks completely cured them. Any farther information

shall be gladly given, by me, or my husband, John Campbell, teamster,
58 Prince street, North End, Boston.
MRS. CAMPBELL.

COMPLICATION OF DISEASES AND GENERAL DEBILITY,
ACCOMPANIED WITH SCROFULA.

For a number of years I was severely afflicted with scrofula and general debility, so that I was reduced to nearly a skeleton, and not able to walk across the room, and was fast approaching my grave. All was tried in vain, and I had completely given up all hopes of ever getting any thing like relief from any one; but my husband, hearing much said of Dr. Stewart of Roxbury, took me there, and the Doctor inquired all about the time I had been ill, and likewise what doctors had attended me. He then told my husband that he was afraid he could do nothing for me, for I was so feeble that I could not stand any medicine—but my husband begged he would. He did, and for some months there was very little hope; but I was frequently taken to his room, and in the course of about 6 months I began to mend a little. He then put me under a course of No. 2 and No. 8 pills, to take alternately, and in a little time I got so well as to be able to go and visit my friends. I have gained ever since, and now am able to attend to the concerns of my family, and consider myself a well woman—a thing that no one could ever have expected. I have great reason to be thankful to Dr. Stewart for his great attention to me, and also for the moderate charge for his services. Any farther information can be had of me, or my husband, W. Knights, tailor, No. 50 Prince street, shop 13 Marshall street.
MRS. KNIGHTS.

Three years ago she came to me first.

A SEVERE CASE OF TIC DOLOREUX, OR CONTRACTION
OF THE NERVES AND MUSCLES OF THE FACE AND NECK.

I was taken with this dreadful complaint while standing at the table washing up the breakfast things,—my neck was pulled down and my head to one side, in dreadful pain. All our doctors were sent for, but they could do nothing for me. After five or six days we sent for two of the most eminent doctors from Boston; they ordered my neck to be rubbed with oil and hartshorn, and wrapped up, head, neck and shoulders, in warm flannel and blankets—it was then about the middle of summer before last, in very hot weather—this was continued for three or four weeks, I still getting worse, when I was advised to go to Dr. Stewart of Roxbury. I was immediately taken there,—after speaking to me a few minutes, and asking me who ordered such things to be done, I told him; he ordered them all to be taken off my neck and thrown out of the window, and said something, I don't remember what, but called to his assistant to bring his instruments to operate on my neck and face, which he did in less than half an hour; he then ordered me some medicine, and sent us into the next room to wait till he got through with numerous patients, when in about two hours I was sent for into his room; by this time I could turn my head nearly straight, and felt very little pain. He then told me I might go, and come back in 12 or 14 days, which I did. He then operated again, and gave me farther orders—and in a month I was as well as I ever was; indeed my health was better than it had been for years. The doctors' names I forbear to mention, but I remember one of them said at the time the other was a great friend of his, but I believe he meant the other way. Any person suffering in the way I did, I should strongly urge to go to Dr. Stewart. I shall always bless Dr. Stewart for what he did for me, and the moderate charge he made.
MISS C. HEWETT, Canton, Ms.

TIC DOLOREUX IN THE FACE.

I affirm that I was seriously tormented with this complaint, and was doctored by many physicians, every one telling me I could soon be well—but I had then labored under it for over 7 years, in such pain that death would have been a great relief to me. At last I went one Sunday to Dr. Stewart, and as there were a great many patients in his room, I could not get in to speak to him; I was in great agony, and not able to contain myself—he observed me, and told me to be patient, that he could help me; I told him that was what every doctor said; he turned about and observed, jokingly, that he couldn't bear to see a young woman weep, for he was once young himself—and he called for his instruments and desired me to sit on a low chair before him, and he operated on my cheek and neck, took away a considerable quantity of blood, then desired me to walk about half an hour and tell him how I felt, and in less time I was completely free from pain, and have had little or none since. He gave me some of his nervous pills, with directions. This was in presence of over 20 of his patients, nearly four years ago.

MISS CRAFTS, Watertown, Ms.

SEVERE CASE OF BILIOUS COMPLAINT AND WORMS.

About three years ago I was reduced to a miserable state of health. I tried many Doctors and many things, but got no relief. At length hearing of Dr. Stewart, I went to see him. He told me my complaint was caused by stomach worms. I was surprised, for no one else had even hinted that such was the case. He said he would prove it. I took his medicine, and in fourteen days I was convinced that the Doctor was right, for they came from me in hundreds. In six weeks I was able to resume my work, and am now as well as ever. He gave me, I think, No. 1, 2, and 3, which I took in large doses for ten days, then I was to reduce, as I found necessary. Any further information will be readily given by me at the Lafayette House, Salem.

LUCY DELANO.

SEVERE CASE OF FEMALE WEAKNESS AND LIVER COMPLAINT.

I hereby certify that for a number of years I was greatly afflicted with violent pain in the side. Many things were tried, but all did no good. On seeing Doctor Stewart, he immediately told me what my complaint was. I was astonished, for I had never seen him before. He gave me Pills No. 1, 3, and 9, with some powders. In 3 or 4 weeks I was in perfect health—my complaints being all removed. Inquire of Mr. or Mrs. WILLEY, Lowell, or of

ELIZABETH HANCOCK, Franklin, N. H.

CASE OF FEVER, DYSPEPSIA, AND BAD AFFECTION OF THE LUNGS.

A duty I owe to those in affliction, prompts me to make the following cases known. A complication of diseases had brought me almost to the grave; after trying every thing that I could hear of, I went to Dr. Stewart. After trying his medicine three or four weeks, I was rather worse than better. I went to him again, and after examining me particularly, he thought it a doubtful case, but said the only thing I could do was to continue the same medicine in small doses, which I did, (about two operations a day,) and in a few weeks more I was a well man. Three other members of my family, who were in very bad health, have been entirely restored by taking Dr. Stewart's medicine. Inquire of

PETER HOWE, Blacksmith, Concord, Mass.

GENERAL DEBILITY, LIVER COMPLAINT, DYSPEPSIA, AND FEMALE COMPLAINT.

About two years and a half ago, I was sorely troubled with the above complaints, and was brought so low that very little hopes were entertained of my ever getting better. I had tried every thing, but got no better. At last some of my neighbors persuaded me to try Dr. Stewart. My husband took me to him, and the Doctor immediately told me what ailed me. I was much surprised. He then gave me his medicines, with directions, and I took them faithfully, as he directed, and in three weeks I began to mend, and my strength increased every day, although I continued taking the medicine, and it operating powerfully. I am now as well and hearty as ever. I took No. 1 and 2, and a phial of his preparation, and some kind of powder. Any further information can be had of my husband, at the Paper Mill, Dedham, Mass.
