UNIVERSITY OF THE STATE OF NEW-YORK.
COLLEGE OF PHYSICIANS AND SURGEONS.

(CIRCULAR.)

The several courses of Instruction will commence, as usual, in this Institution, on the first Monday in November. The Session will be opened by an Address from the President.

Since the last Winter important additions have been made to the Chemical Apparatus, a Laboratory has been built, and the Chemical Lecture-Room has been so altered, as perfectly to accommodate the Students attending Dr. Mac Neven, the Professor of that Science.

Such provision has been made by law for the Anatomical Department, that Dr. Smith, the Professor of Anatomy, will give a complete course of Demonstrations, and will also illustrate his Surgical Lectures, by performing all the operations, practicable upon the healthy subject, in the presence of his class.

Dr. Hosack will Lecture on the Theory and Practice of Medicine, and a full and complete course will also be given on Obstetrics, and the Diseases of Women and Children.

The above series of Lectures constitute the Winter Session; the Spring Term, which commences on the third Monday in April, consists of Lectures on Natural History, and on Botany; the former by Dr. Mitchill, the latter by Dr. Hosack.

The Lectures on Natural History are illustrated by a large collection of Mineralogical and Geological Specimens; and an elegant Museum, to which the Students can have access, affords every facility for the acquisition of zoological knowledge.

The Botanic Garden having been purchased by the State, and placed under the direction of the College, the Students of Botany will have an opportunity of visiting that establishment whenever they think proper, and of examining the many rare and valuable plants which it contains.

The various courses of Instruction delivered in the College, are so arranged, as to form a complete System of Medical Education; and the Trustees and Professors confidently promise, that no exertion on their part shall be wanting to fulfil the just expectations and liberal views of their Patrons, the Legislature and the Regents.

The Professors are bound to examine all Applicants for Degrees, and to report to the Regents such as they approve, on or before the first day of March in every year. The Diplomas are then granted, and the Degrees are conferred in this City, on the first Tuesday in May, the Candidate having previously delivered to the Professors, and defended at a public Examination, a Thesis on some subject connected with Medicine. The Thesis may be printed at the discretion of the Graduate, with the approbation of three of the Professors.

By order of the College,

SAMUEL BARD, M. D. President.
JOHN W. FRANCIS, M. D. Register.

New-York, June 8, 1811.
